

MRV of Finance Received: Potential Practice and Issues in Indonesia

Suzanty Sitorus
Finance Working Group, National Council on Climate Change

Global Forum on Environment Event/
Climate Change Expert Group (CCXG) Seminar on MRV and Carbon Markets
Paris, 19-20 September 2011

Outline of presentation

- Regulatory framework for monitoring, evaluation and publication of international assistance
- Potential institutional arrangement for MRV of finance received
- Parallel tracks of tracking international climate finance
- Potential issues in the implementation of MRV of finance received

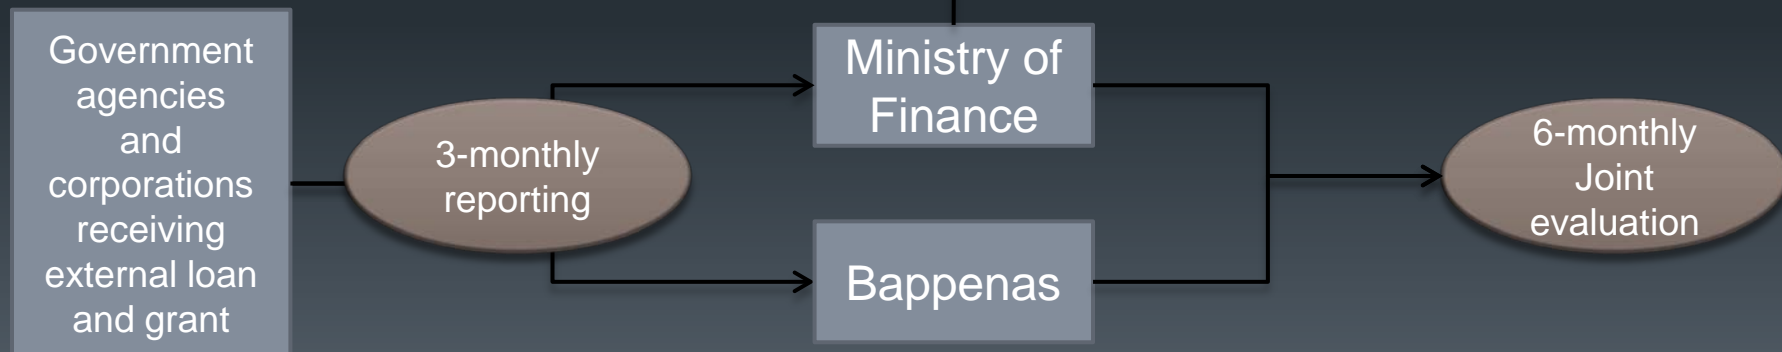

Reporting, monitoring, evaluation, publication of external loan and/or grants

- Government agencies or corporations receiving external loan and/or grants shall provide 3 monthly report to the Minister of Finance and Minister of Planning (Bappenas), with information on:
 - Procurement of goods and services
 - Physical progress of activities
 - Realisation of absorption
 - Problems in implementation
 - Follow-up on problems resolution.
- Ministry of Finance: 3-monthly monitoring, evaluation and reporting on **realisation of absorption** of external loans and/or grants & other financial aspects.
- Ministry of Planning: 3-monthly monitoring, evaluation and reporting on **performance of activities** financed by external loan and/or grants.
- Joint evaluation could be done by Ministry of Finance and Ministry of Planning once in every 6 months.

Publication on external loan and/or grants*

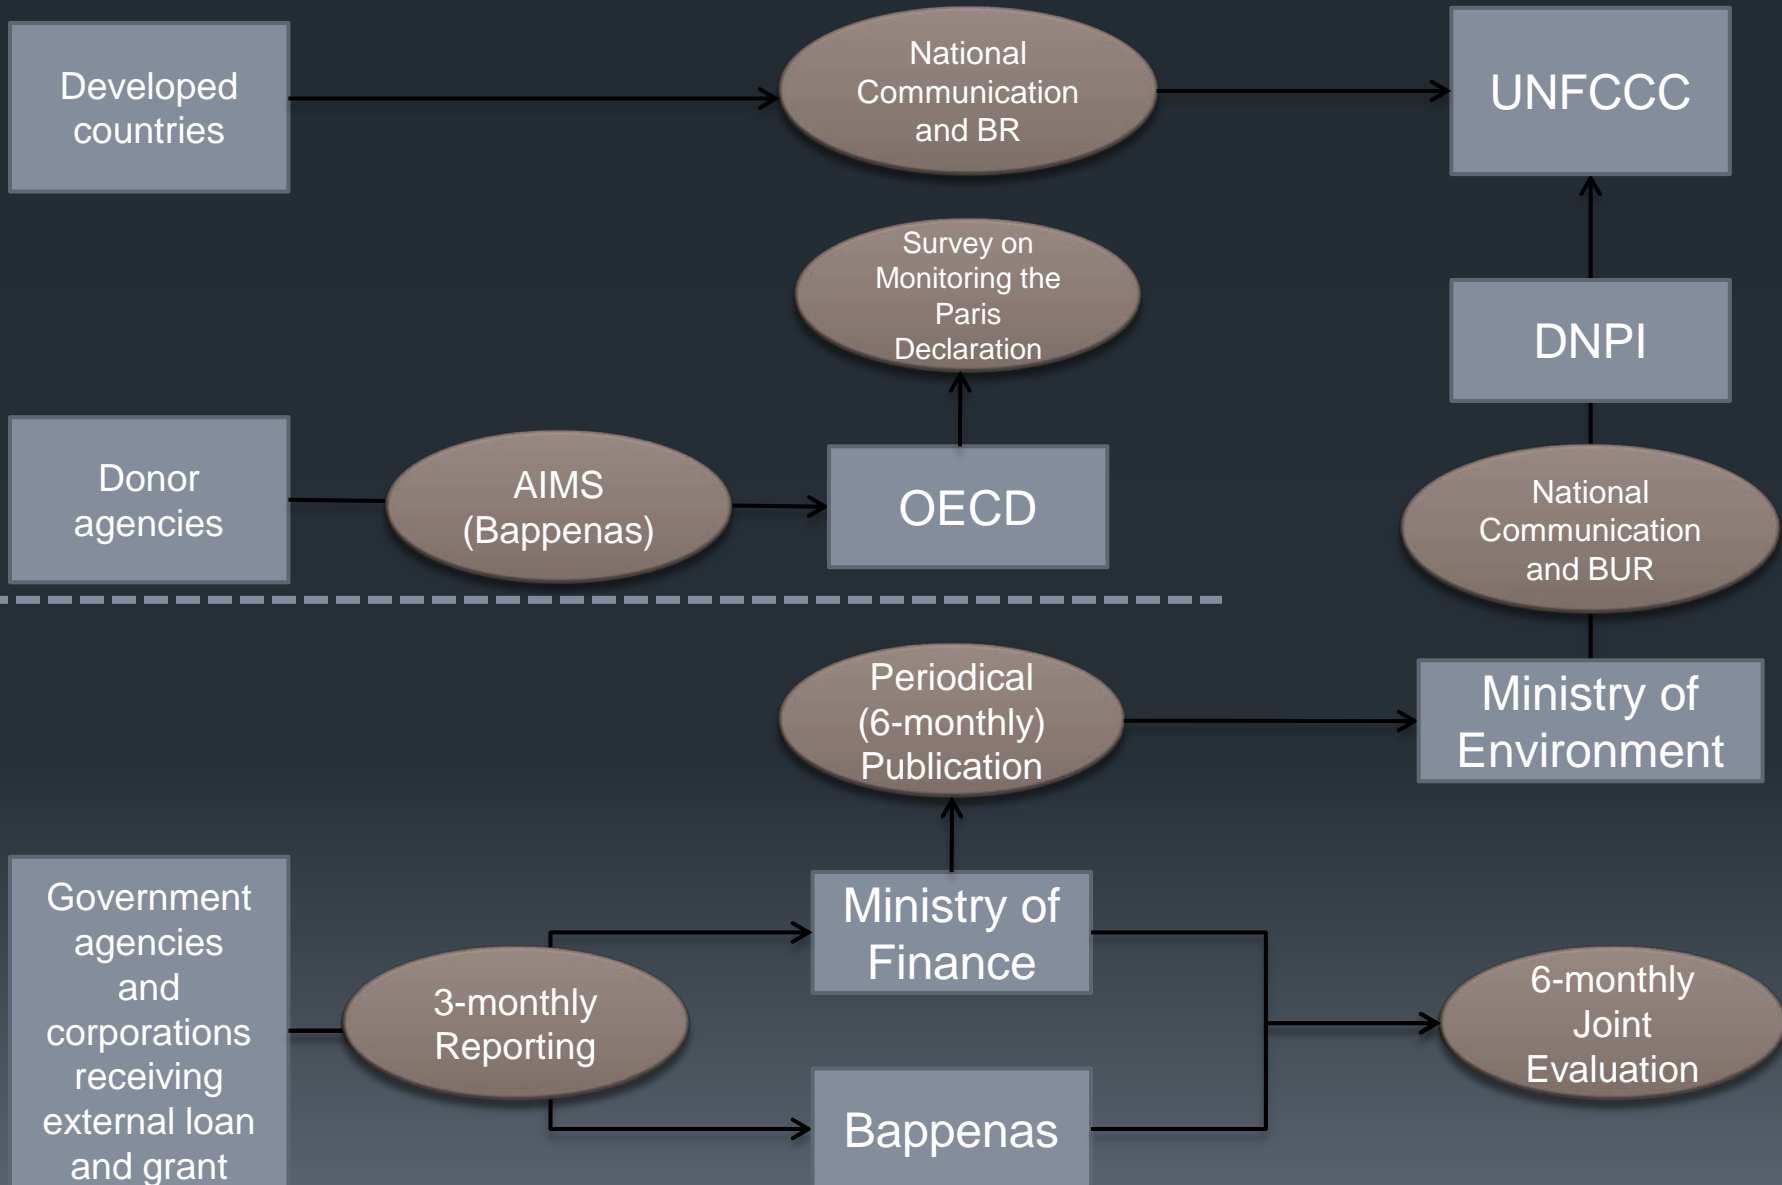

- Ministry of Finance publishes information on external loans and grant periodically at least once in every six months.
- Publication on external loans shall present info on:
 - External loan policy
 - Position on external loan including structure of maturity and interest composition
 - Sources of external loan
 - Realisation of absorption
 - Fulfilment of obligation (to repay the loan).
- Publication on grant, shall at least cover :
 - Grant policy
 - Amount, position, and composition of grant currencies
 - Sources and receivers of grant
 - Types of grant.

Possible institutional arrangement for MRV of finance received by Indonesia

→ = Flow of information

Parallel tracks of reporting on international climate finance

Aid Information Management System (AIMS)

AIMS is developed to support development partners and Government of Indonesia agencies to accelerate management of external assistances in effective and efficient way, through the preparation of a single system for implementation and monitoring and evaluation of external assistances. The Government and development partners will jointly carry out regular reviews on progress in implementing the commitments on aid for development

effectiveness and improve development outcomes through an objective country level mechanism. Aid Information Management System is described in the Jakarta Commitment as Central Information system used by government and development partners.

2011 Survey on Monitoring the Paris Declaration

Following the official launch of the 2011 Survey on Monitoring the Paris Declaration for Asia-Pacific region on 10-11 November 2010 in Siem Reap, Cambodia, the Government of Indonesia organized a

country launch of the 2011 Survey on 29 November in Jakarta. This is the third and last edition of the survey to determine whether the 2005 targets for Aid Effectiveness have been met. The first participation of Indonesia in 2007 led to the signature of the Jakarta Commitment, which with the second participation of Indonesia shows the full commitment to improve Aid Effectiveness in the country. The Survey will be conducted online and all development partners operating in Indonesia are invited to participate and complete the survey before 28 February 2011. [Click here to find out more about the survey and how to participate.](#)

Preliminary AIMS Workshop and Training for pilot donors

In quality of signatory of the Jakarta Commitment, Indonesia, along with 53 other countries in the World, took part in the survey of monitoring of the Paris Declar ...[read more](#)

Progress on monitoring, evaluation and publication of international assistance

- Information management, reporting and publication system for external loan is functional.
 - Debt and Management and Analysis System + External Debt Information System = **External Debt Statistics of Indonesia** (joint publication between Bank Indonesia and Ministry of Finance)
 - Data on external loan of Government of Indonesia, central bank and private sector
 - It can also be used to monitor potentials of external loan risks
- Tracking grants is more complex than external loan
 - Too many varieties in scheme and means of implementation, e.g. donor-executed grants, grants to NGOs

Issues

- Climate finance marker is inexistent
 - Definition of climate finance (vs development assistance) would need discussion with donor countries
 - Where and how to start?
- Comparability between national government reports to UNFCCC and other reports (incl. OECD survey)
 - Who has to do the analysis, comparability and verification?
- Reporting timeframe.
 - Domestic reports vs reports to UNFCCC (National Communication, BUR)
 - For comparability: NatCom/BUR vs NatCom/BR
 - National reports and non-UNFCCC reports, e.g. OECD survey.
- The need to incorporate MRV of finance from domestic sources.
 - Overall framework of MRV: mitigation and support should be coherent, considering 3 types of NAMAs.
- How to incorporate non-financial support, i.e. technology and capacity building, into the system?

Thank you
