

Quarter 4 Look ahead

Discussions will continue on the feasibility of the laboratory opening event, and opportunities for organising the next National Policy Dialogue and associated event to present the results of EUWI+.

Other priorities include:

- Preparations for the SEA procedures on the draft national targets under the Protocol on Water and Health and their programme of measures in Ukraine will commence.
- Submission of the final report under SDG 6.5.2 indicator on transboundary water cooperation.
- The server installation and configuration of virtual machine for CGO will be implemented.
- The update of the State Water Monitoring Information System in Ukraine managed by the State Agency of Water Resources will proceed with in particular a draft report by the consultant for validation by SAWR and IOW.
- Procurement of laboratory consumables and small laboratory equipment (such as thermoreactor, semi automatic Kjeldahl analyser, solvent evaporator, rotavapor, etc.) for the CGO and Vyshgorod laboratory, as well as of a solid-phase extraction system for the Vyshgorod laboratory.
- Preparation of pre-audit reports summarising the status and developments in the EUWI+ partner laboratories towards ISO 17025 laboratory accreditation.
- Final transboundary coordination of groundwater bodies and of the groundwater monitoring network between Ukraine and Belarus in the Pripjat basin.
- Development of the Groundwater Monitoring Development Plan.
- Procurement of groundwater monitoring equipment
- Shipping of hydrobiological species identification literature (taxonomic keys for benthic invertebrates) and of a sub-sampling grid (AQEM).
- Delivery of a range of required equipment for biological surface water monitoring under the Water Framework Directive.
- Publication of two surface water training videos on EUWI+ website, with national language subtitles. Feedback from national experts will be collected.
- Finalisation and publication of the Surface Water Monitoring Development Plan.
- Assessment of results of the pollutant screening survey and selection of Dnipro basin-specific pollutants for the future Surveillance Monitoring; preparation, discussion and finalisation of the report on Investigative Monitoring by SAWR.
