Capacity Building Needs: Responses from the World Bank Group

Carlos A. Primo Braga
Director, Economic Policy and Debt Department
The World Bank

OECD
November 2009
Outline

1. Why strengthening debt management?
2. What does the World Bank offer?
3. The World Bank’s assistance with a focus on Low Income Countries, under the Debt Management Facility
4. The World Bank’s assistance with a focus on Middle Income Countries
5. IFC’s assistance
6. Going forward
1. Why Strengthening Debt Management?

**Development needs of developing countries are large**

How to finance these needs at an acceptable cost with a prudent degree of risk, especially at a time when conditions in financial markets are severely constrained?

**Domestic debt markets are often shallow in developing countries**

How can potential benefits from developing domestic markets be exploited?

**Many governments strengthened their balance sheets over the past decade**

How to protect these sounder public debt structures and avoid exacerbating the crisis?

**After debt relief under the HIPC Initiative and MDRI, developing countries attracted new creditors and reached new markets**

How to build debt management capacity needed to manage new risks?

**Improved debt management practices:**

Help to address these questions; Contribute to macroeconomic stability; Facilitate maintaining debt sustainability; Protect government’s reputation; Have become even more critical in view of the implications of the financial crisis.
2. What does the WBG offer?

Economic Policy and Debt Department, the Treasury, and the Securities Markets Group of the Global Capital Markets Development Department offer a wide range of debt management advice and support.

Diagnostic tools for public debt management assessment and debt market development.

Advisory services grounded on international sound practices & expertise in the areas of:
- Governance
- Debt strategy design and risk management
- Debt sustainability analysis
- Capital market access strategy and implementation
- Domestic government debt market development
- Design of sequenced reform plans

Global public goods: Debt Management Performance Assessment (DeMPA) tool; Medium Term Debt Management Strategy (MTDS) toolkit; Debt Sustainability Framework (DSF) for Low Income Countries (LICs); publications on international sound practices.

Other services: Training, outreach events, including conferences & seminars.
3. WB’s Assistance with a Focus on LICs
WB’s Assistance under the Debt Management Facility (DMF)

The Debt Management Facility (DMF) is a multi-donor trust fund (so far involving Austria, Belgium, Canada, The Netherlands, Norway, and Switzerland) that:

- provides grant-based technical assistance (over an initial 4-year operational period)
- with a view to strengthen debt management capacity and institutions
- via the supply of global public goods and the delivery of technical assistance, while facilitating knowledge sharing and coordination among debt management providers

The DMF focuses on low-income countries, is demand-driven, and most DMF-financed activities are carried out with our Implementing Partners, including CEMLA, Commonwealth Secretariat, DRI, DMFAS Programme of UNCTAD, MEFMI, Pôle Dette and WAIFEM
DMF Activities

DMF finances technical assistance to strengthen debt management capacity and institutions through:

- Systematic application of the Debt Management Performance Assessment (DeMPA)
- Medium-term debt management strategies (MTDS), developed in partnership with the IMF
- Design of reform programs
- Training of regional debt management providers and country authorities
- Knowledge sharing and peer learning initiatives, such as the Debt Management Practitioners’ Program and the Debt Managers Network
- Analytical work and development
Technical Assistance Road Map

Possible follow-ups

Capacity building: DSA
- Hub training

Legal and other advice: Domestic market development
- Within country training

Capacity Building: Reform Plan
- Reform Plan TA mission
- Follow-up Reform Plan TA mission

Capacity building: Public Debt Management Strategy
- Hub training
- MTDS mission
- Follow-up MTDS training mission

Training / TA examples
What is the Debt Management Performance Assessment (DeMPA)?

- DeMPA is a methodology for assessing public debt management performance through a comprehensive set of performance indicators spanning the full range of government debt management functions
  - It is firmly grounded in the Public Expenditure and Financial Accountability (PEFA) methodology and offers a “drill down” on debt management

- It may be applied in all developing countries

- Covers all Central Government DeM and connected activities

- Flexible application in sub-national context

- Scoring methodology: quantifiable scores (A to D), where
  - Minimum requirement = Score C
    - Important for effective debt management
  - Absence of minimum requirement = Score D
    - Signals an area of priority attention
  - Sound practice = Score A  (B intermediate for more granularity)
  - Not rated – if process/system does not exist (e.g., derivatives)
DeMPA

Objective
- Assess public debt management performance capacity
- Monitor performance
- Design reform program
- Donor harmonization

Methodology coverage
- 15 Performance Indicators (PI)
- 35 Dimensions
- Covers six core DM functions

Implementation
- Assessment missions
- Performance Report
- No conditionality
- Report release at the authorities’ discretion
- Demand-driven
DeMPA implementation to date: 38 missions of which 9 under the DMF

* Missions undertaken in collaboration with DMF Implementing Partner(s).
Preliminary Results Based on 31 DeMPAs

- Legal framework
- Managerial Structure
- Debt Management Strategy
- Evaluation of Debt Management Operations
- Debt Reporting
- Audit
- Coordination with Fiscal Policy
- Coordination with Monetary Policy
- External Borrowing
- Domestic Borrowing
- Segregation of Duties, Staff Capacity and BCP
- Debt Administration and Data Security
- Cash Flow Forecasting and Cash Balance Management
- Loan Guarantees, On lending Derivatives

C or Higher Score
D

THE WORLD BANK
What is the MTDS?

- MTDS developed and being implemented jointly with the International Monetary Fund

- MTDS focuses on developing a financing strategy over the medium-term planning horizon of the government (usually 3-5 years), consistent with macro-economic settings and related debt objectives

- The MTDS defines
  - desired public debt composition and
  - a plan to achieve this composition
### Objective
- Provides guidance on the process for developing a plan that the government intends to implement over the medium-term to achieve a desired composition of government debt portfolio
- Evaluates the cost-risk tradeoffs associated with different strategies

### Methodology
- Guidance Note provides practical guidance on the process of developing an MTDS.
- The Analytical Tool (AT) provides a cost-risk framework to guide the MTDS decision-making process.
- A Handbook explains the use of the AT.

### Implementation
- Implementation mission plus training follow-up missions
- Report release at authorities’ discretion
- Demand driven

*Developed and implemented in partnership with the IMF*
Designing an MTDS

1. Identify the objectives for public debt management and scope of the MTDS
2. Identify the current debt management strategy and analyze cost and risk of the existing debt
3. Identify and analyze potential funding sources, including cost and risk characteristics
4. Identify baseline projections and risks in key policy areas — fiscal, monetary, external and market
5. Review key longer-term structural factors
6. Identify the cost-risk tradeoffs, rank alternative strategies
7. Review implications of candidate strategies with fiscal and monetary policy authorities, and for market conditions
8. Submit and secure agreement on the MTDS

Points to keep in mind:

- The MTDS should not be approached as the sole basis for decision-making, rather it is a supplement to experience, sound judgment, etc. – providing additional foundation for making better informed choices. In short, it helps strengthen the framework for decision-making.
- A scenario analysis model will not provide an “optimal” debt portfolio, but provides information that will allow cost-risk comparisons, and increases knowledge of the options and constraints facing the debt manager.
- Working with risk models requires a considerable investment in resources, and model development is an ongoing process.
The MTDS implementation to date:
9 missions, of which 4 under the DMF

FY08 (4)
- Bangladesh (P)
- Cameroon (P)
- Ghana (P)
- Nicaragua (P)

FY09 (2)
- Kenya*
- Moldova (P)

FY10
- Cape Verde*
- Zambia*
- Moldova (Follow-up)*
- Nigeria
- Tanzania
- Malawi
- Cameroon (Follow-up)
- Ghana (Follow-up)
- Bangladesh (Follow-up)
- Nicaragua (Follow-up)

* Missions undertaken in collaboration with DMF Implementing Partner(s).
Reform Plans

**Objective**
- Strengthen public debt management performance capacity, by preparing country-specific, detailed, and sequenced plans

**Methodology**
- Build upon DeMPA results
- Depend on the priorities articulated by the authorities and the ground-level assessment
- Focus on governance and institutional arrangements, staff capacity, cash management, operational risk management
- Could be tailored to include additional aspects of DeM

**Implementation**
- Reform plan missions
- Develop a log-frame analysis with a detailed Activity *Output* Sequence*Costing and Outcome Matrix
- Demand-driven
Reform Plan implementation to date: 5 countries, of which 2 under the DMF

FY09 (4)
- Albania
- Ghana
- Andhra Pradesh
- Congo, Republic of

FY10 (1)
- Bangladesh*

FY10 (Pipeline)
- The Gambia
- Solomon Islands
- Cameroon

* Missions undertaken in collaboration with DMF Implementing Partner(s).
Knowledge Products (PRMED and DMF)

• Publishes original analysis, most recently *Debt Relief and Beyond: Lessons Learned Challenges Ahead*

• Leads a comprehensive training program and conferences
  – Demand-driven training on DeMPA, Reform Plan, and MTDS
  – Workshops and conferences
    • October 2008 “Debt Relief and Beyond”
    • Upcoming: March 2010 in Tunis, “Sovereign Debt and the Financial Crisis: Will This Time be Different?”
Capacity Building

Training
• Comprehensive, demand-driven
• Covers DeMPA, Reform Plan, and MTDS
• For government officials and DeM TA providers
• About 8 training events this fiscal year

Debt Managers’ Practitioners Program
• Twofold objectives: To foster exchange of knowledge, techniques and skills and to strengthen voice of partner countries
• Two debt managers from Bhutan and Uzbekistan in residence with PRMED for 6 months from January to July 2010, working on debt management products and activities
• Thereafter three debt managers per year each for 3 months
Coordination and Information Sharing

- Missions and training events are undertaken jointly with Implementing Partners

- Development of a Debt Managers’ Network

- Organization of an Annual Stakeholders’ Forum

- Collaborative development of public goods, e.g. sub-national DeMPA

- Dissemination of relevant analytical work such as the upcoming book on “Sovereign Debt and the Financial Crisis: Will This Time be Different?”
4. WB’s Assistance with a Focus on MICs
The World Bank provides support to individual countries through advisory engagements that are customized to specific needs, typically in the areas of:

- **Governance**: including the legal framework, institutional arrangements, reporting and transparency
- **Debt management strategy and risk management**: determining the composition of public debt
- **Capacity and management of internal operations**: skill mix of staff, processes and procedures, and systems
- **Coordination** with cash management, macroeconomic policy, and debt market development
- **Debt management strategy implementation** and access to the capital and derivatives markets (with input from Treasury staff responsible for managing the World Bank’s balance sheet)
- Regulatory frameworks for **subnational borrowing** and debt management and subnational debt sustainability (also available for LICs)
Engagements for Sovereigns

Worked with over 40 countries to support the reform process through:

**Needs Assessment**
Comprehensive analysis of the current public debt management operation with recommendations for reform:
– Includes analysis of linkages to macroeconomic policy and cash management
– Could include evaluation of domestic debt market development

**Reform Plan**
Detailed and sequenced reform plan addressing weaknesses identified in the needs assessment:
– Includes expected outputs and outcomes, specific actions, sequencing and milestones, budgeting and resourcing
– May be used to seek support from other partners

**Reform Implementation**
– Usually in conjunction with development partners and consultants
– WB (PDM group) plays a key role in strategic oversight and ensuring quality control
– In cases, directly responsible for implementation
The Treasury has worked with over 40 countries across all regions of the world.

Note: Blend countries are those eligible for both concessional and non-concessional World Bank financing. Other countries include non World Bank-borrowing countries.
Knowledge Products

• Publishes original analysis

• Leads a comprehensive training and conference program
  – Debt Management Forum (Bi-annual)
  – Workshops on Debt Strategy Design and Debt Strategy Implementation (multi-country and tailored to specific countries)

• Collaborates with the teams within and outside the Bank to support capacity-building programs
5. IFC: An Example of Advisory Services (ESMID)

- **Efficient Securities Market Institution Development** (East Africa and Nigeria) -- A comprehensive and integrated approach to developing local bond markets
- 3 year, $5.5 million comprehensive program funded by SIDA, with advisory-investment linkages
- Special focus on long-term funding for critical sectors, including housing and infrastructure
- Transaction support component acts as catalyst and validates success in enabling environment work
- Sub-regional program for East Africa (Kenya, Rwanda, Tanzania, Uganda), to foster a regional market that can be accessed by smaller IDA countries
- And a country program for Nigeria given its size and its developmental needs
ESMID-Africa

**Advice on Legal and Regulatory Framework**
- Improve approval process
- Reduce costs
- Framework for new products

**Strengthening Market Infrastructure**
- Market Structure
- Clearing & Settlement
- Transparency & Information Dissemination

**Capacity Building**
- Certification/Licensing
- Training
- Develop regional provider

**Regionalization**
- Broadening & deepening markets
- Minimum common standards
- Consolidated infrastructure
- Cross border issues

**Transactions Support**
- Active support to issuers and intermediaries for replicable transactions
- Introduce new & innovative products
6. Going Forward

**Low-income countries**
- Under the DMF, the Bank’s debt management work program for low-income countries has been scaled up to apply per year: MTDS in up to six new countries; Reform Plans in up to six new countries; DeMPAs in up to 20 new countries
- More training activities on DMF related activities will be provided
- Implementation of the DeM Practitioner’s program and the Network for Debt Managers
- ESMID implementation

**Middle-income countries**
- Work program for middle-income countries will continue at full strength
- In the near term, governments are likely to put priority on assistance in responding to the crisis environment: Accessing international markets and further developing domestic markets; Scaling up operations to manage growing debt stocks and contingent liabilities
  Staying on track to achieving preferred portfolio compositions, despite a more difficult environment for strategy implementation

**All countries**
- Development of global public goods, knowledge products and tools continue
Thank You
