The PCSD online toolkit provides guidance and a screening tool that aims to support government and stakeholder efforts to:

- Conduct analysis on the synergies and trade-offs among the SDGs
- Identify institutional mechanisms for policy coherence
- Consider key elements to monitor, report and evaluate progress on policy coherence for sustainable development (SDG Target 17.14)

This tool is supplemented by thematic analysis developed by the OECD in three cross-cutting areas: food security, illicit financial flows and green growth.

The PCSD online toolkit aims to enable policy-makers, practitioners and stakeholders to use easily accessible guidance, tools and resources for strengthening their capacities to enhance policy coherence in the implementation of the Sustainable Development Goals.

The toolkit provides examples of good institutional practices in promoting policy coherence for sustainable development from the perspective of more than 20 countries and from the 8 Building Blocks approach.

1) A strategic vision underpinned by political commitment and leadership to enhance PCSD

2) Effective institutional mechanisms to address policy interactions across sectors and align actions between levels of government

3) A set of tools to anticipate, assess and address domestic, transboundary and long-term impacts of policies

The web-platform contains a list of available tools developed and piloted by organisations involved in the PCSD Partnership to support country efforts in enhancing policy coherence for sustainable development.
