

Better regulation – The aim is to bring about a significant change in day-to-day business operations

- To monitor this target we need new indicators
- Today:
 - Consultation with business –on every administrative level
 - SCM-mesurements interviews with business (3 300 until today)
 - Online dialogue between business and government (agencies and departements) www.enklareregler.se
- Challenge for new indicators:
 - Relevant for business
 - High degree of causality between effort and results
- Whether surveys of perceptions is the best way is still an open question
