
Description

To develop its Anti-Corruption Strategy, the Austrian Federal Procurement Agency (BBG) defined the following actions:

- Set precise organisational procedures (clear definition of roles and structures)
- Integrate anti-corruption measures in the workday life
- Constantly reassess and improve the strategy
- Constantly raise awareness of staff
- Sharpen the focus on the consequences of corruption

The Strategy contains an explicit regulation of the main values and strategies regarding prevention of corruption, clear definition of grey areas (e.g. the difference between customer care and corruption; what is permitted, what not), clear rules on accepting gifts as well as rules on additional occupation. It also offers the employees a clear view on emergency management.
