OFFICE CIRCULAR

PRINCIPAL ADMINISTRATOR (GRADE A4), ENERGY ECONOMIC ANALYSIS STAFF, OFFICE OF THE EXECUTIVE DIRECTOR, COMBINED ENERGY STAFF

Closing date for applications: 29 July 1992

Duties:

• Under the general supervision of the Senior Advisor for Energy Economics:

1. Carry out economic and econometric analysis in the energy field related to the energy policy work of the International Energy Agency and undertake major studies of particular energy areas including, without limitation, analysis of macro- and micro-economic factors (internal or external to the energy sector), structural elements which affect the supply of or demand for energy, and various sectoral studies, as required.
2. Co-operate with various divisions and departments of the OECD, the Nuclear Energy Agency, and other national and international organisations, companies or research bodies, in the analysis of the impact of energy market developments on the macro-economic developments on supply of and demand for energy.

3. Contribute to the analysis of the relationship between energy use and the environment and the potential impact of possible environmental policies on energy markets.

4. Participate in the preparation of medium and long-term energy outlooks using econometric and other economic methodologies as appropriate.

5. Develop and maintain contacts with members of delegations, representatives of industry and other institutions involved in energy market assessments.

6. Carry out such other duties in the field of economic analysis and research as may be required in order to fulfil the work programme of the International Energy Agency.

Principal qualifications:

1. Advanced degree from a recognised university with a specialisation in economics, including knowledge of economic theory and quantitative methods.

2. Significant experience in the application of economic theory to the energy field.

3. Experience in the energy field, preferably with an energy company, government or an international organisation, with direct practical experience in the quantitative and qualitative analysis of energy markets.

4. Effective interpersonal skills.

5. Excellent ability to communicate effectively, both orally and in writing, in one of the official languages of the OECD (English and French) with a good working knowledge of the other official language.
