PROGRAMMER (GRADE B5), SYSTEMS DEVELOPMENT DIVISION, DIRECTORATE FOR COMPUTERS
AND COMMUNICATIONS

Closing date for applications: 22 March 1993

Duties:

The post-holder participates in the evaluation, installation, maintenance and support of large-scale administrative and financial applications, and in particular:

1. Participates in the implementation and maintenance of large-scale administrative and financial systems software and adapts such software to OECD’s specific requirements.

2. Develops and implements, in liaison with operations staff and systems engineers, procedures to ensure integrity and security of resources, including: system files, user data files, control files and libraries. Prepares related operating procedures and other technical documentation.
3. Helps ensure prompt resolution of operational problems encountered.
4. Carries out other related duties as required.

Principal qualifications:
1. Good general level of secondary and preferably post-secondary education.
2. Several years of programming experience in COBOL under the IBM VSE/SP operating system and CICS environments. Good familiarity with related system utilities (e.g., ICCF, POWER, DYNAM/D, VTAM).
3. Experience working with large-scale administrative and financial systems. Familiarity with Dun & Bradstreet’s "Expert" (formerly MSA) line of software would be an advantage.
4. Capacity to work under pressure, and to adapt quickly to changing responsibilities. Ability to work in a team environment, with a minimum of supervision.
5. Very good knowledge of one of the two official language of the Organisation (English and French), and working knowledge of the other.
