The complete document is only available in PDF format
The OECD Committee on Financial Markets and its PWB

Stephen A. Lumpkin
Senior Economist, Financial Affairs Division
Directorate for Financial and Enterprise Affairs
The overarching objective:

- “promote efficient, open, stable and sound financial systems, based on high levels of transparency, confidence, and integrity, so as to contribute to sustainable and inclusive growth”
The mid-level objectives:

- Enhance the **long-term efficiency, resilience, and transparency** of financial systems, including through the promotion and collection of internationally comparable financial statistics;
- Promote the contribution of financial institutions, including institutional investors, and capital markets **to savings and investment, to the financing of business and individuals and to growth**;
- Contribute to the **enhancement of policy approaches** in the financial sector;
- Promote **efficient and transparent public debt markets**; and,
- Promote **effective financial education and consumer protection** and the ability of individuals and businesses to access and use financial services and address risks.
Planned future work by the CMF

Emerging trends in the structure and efficiency of financial markets – impacted by
- low-interest, low growth environment (monetary policy)
- regulation (e.g. market making restrictions)
- structural & technological factors

FinTech and disruptive innovation in finance
- implications for bank business models and policy
- alternative financing for SMEs
- distributed ledger technology

Green finance and the role of the financial sector - opportunities and risks
- Mobilising capital for a transition to a green and climate-resilient economy
- Risks for the financial sector related to climate change and green financing (including stranded assets)
- Supporting G20 GFSG
