ANNOTATIONS TO THE DRAFT AGENDA

Item III

The Secretariat will report on the questionnaire responses it has received, as well as on other outreach matters, including its recent report on competition policy and regulatory reform in Brazil and its upcoming schedule. The Working Party will need to decide whether to have a roundtable in February, as originally contemplated, and if so to provide guidance concerning issues it wants to discuss.

Item IV

The Secretariat will describe developments concerning the CLP Division’s likely resources in 2001 and the OECD budget process. Later in the week, these issues will be discussed in the Bureau and the CLP.

Item V

BIAC has been invited to attend the roundtable.

Item VI

Item A has two parts. First, it will cover the planned work on cartels’ harm and on sanctions. The Secretariat did not have the resources to issue its planned questionnaire this summer, and it will present a draft questionnaire for delegates’ comments and an analysis of methodological approaches for using the questionnaire responses and possibly providing additional support with respect to cartels’ harm. It will also provide further analysis of the most efficient means of dealing with the two sanctions issues noted in the Cartel Report -- examining the type and amount of sanctions Members impose, and addressing the more complex task of assessing what are optimal sanctions for cartels. Second, the Secretariat will address the manner in which the Working Party might address investigation tools, including leniency, and international co-operation.

Item B relates specifically to the Working Party’s consideration of the Secretariat’s revised note on leniency programs. Since a CLP report on leniency programs would be useful in its own right and as a means for maintaining the anti-cartel programme’s momentum, delegates are asked to consider what kind of additional revisions would be necessary to convert the note into a CLP report that would ideally be approved for release in February.

Item VII

It is expected that John Clark, author of most of the recent merger notes and reports the Working Party has considered or forwarded for issuance by the CLP, will attend the meeting or at least be available by telephone.
