Annexes to STIP Compass: A tool for continuous monitoring and analysis of STI policies

22-23 October 2018
OECD Conference Centre, 2 rue André-Pascal, 75016 Paris

Delegates will find herewith the annexes providing information on the data reported within the STIP Compass database, for each country/territory participating in the database. Annex A lists the names of policy initiatives that require additional actions from country respondents, i.e. initiatives requiring additional inputs in text fields or those that are too broad and should be split into multiple initiatives. Annex B includes dedicated scorecards, providing various quality benchmarks of the current reporting in the database.

Contacts: Andrés BARRENECHE (Andres.Barreneche@oecd.org); Sylvain FRACCOLA (Sylvain.Fraccola@oecd.org); Michael KEENAN (Michael.Keenan@oecd.org); Dmitry PLEKHANOV (Dmitry.Plekanov@oecd.org); Blandine SERVE (Blandine.Serve@oecd.org)

JT03436937

This document, as well as any data and map included herein, are without prejudice to the status of or sovereignty over any territory, to the delimitation of international frontiers and boundaries and to the name of any territory, city or area.
Annex A: Curated initiatives requiring actions from country respondents

Despite efforts from the OECD Secretariat to fill gaps identified in policy initiatives reported with all mandatory fields filled in, in some instances this was not possible given the limited amount of information submitted, together with the fact that no additional information was found available online. Two types of initiatives require actions from country respondents:

(i) Initiatives that lack clarity in the mandatory basic textual fields (name in English, short description and objective(s)) or provide a very limited amount of information that do not allow a basic understanding the initiative.

(ii) Initiatives are excessively broad in scope and need to be split into multiple ones to increase granularity of information.

The tables below list these two types of initiatives, for each country/territory. National Contact Points (NCPs) and country delegates with initiatives listed for their countries/territories are asked to use the new monitoring tool [DSTI/STP(2018)8] (Section 4) to revise them accordingly.

1 Note by Turkey: The information in this document with reference to “Cyprus” relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Turkey recognises the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of the United Nations, Turkey shall preserve its position concerning the “Cyprus issue”.

Note by all the European Union Member States of the OECD and the European Union: The Republic of Cyprus is recognised by all members of the United Nations with the exception of Turkey. The information in this document relates to the area under the effective control of the Government of the Republic of Cyprus.

2 The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.

Annex B: STIP database scorecards

This annex provides dedicated scorecards for each country/territory. Each scorecard includes the following figures, giving different quality benchmarks of the current level of reporting in the database:

(i) **Number of initiatives per policy theme**: Shows the number of complete and incomplete initiatives\(^3\) reported in the database, for each of the main themes of the 2017 EC-OECD STIP survey. The STIP median is included to provide an indication of how many initiatives other countries have reported for each of these policy areas.

(ii) **Number of initiatives in the STIP database**: Aggregates the numbers presented in (i) and provides a benchmark of the level of reporting against the STIP median.

(iii) **Percentage of incomplete initiatives with data for mandatory fields**: Provides a view of what types of basic data are missing in incomplete initiatives.

(iv) **Percentage of initiatives with budget**: Indicates the proportion of initiatives that have budget data missing (field left blank or reported as “unknown”\(^4\)).

(v) **Percentage of complete initiatives with non-mandatory data**: Provides a view of what types of complementary data are missing in complete initiatives.

NCPs and country delegates are asked to examine these scorecards to identify those areas they need to prioritise efforts to improve their country’s data in STIP Compass, using the new monitoring tool [DSTI/STP(2018)8\(^\) (Section 4)]

\(^3\) For a given policy initiative, the mandatory fields that need to be filled in are: Name in English, short description, objective(s), type(s) of policy instrument, direct beneficiaries (target groups), name of responsible organisation and estimated budget per year (range in EUR or amount in national currency). When an initiative has data for all of these fields it is referred as a “complete” initiative, as opposed to those that do not, which are regarded as “incomplete”.

\(^4\) The possibility of reporting a budget as “unknown” is made available to allow countries the opportunity to complete the submission of the initiative and provide budget data at a later stage.
