This document presents the 2015-16 Plan of Work of the “Greening Economies in the European Union’s Eastern Partnership Countries” project revised after the discussions at the 4th meeting of the EaP GREEN Steering Committee, 18 June, 2015 in Chisinau, Moldova.

For additional information, please contact: Mr. Krzysztof MICHALAK, Green Growth and Global Relations Division, Environment Directorate, tel: +33 1 45 24 96 00, e-mail: Krzysztof.MICHALAK@oecd.org
EAP GREEN PLAN OF WORK FOR THE PERIOD JULY 2015 – DECEMBER 2016

Introduction

1. This document presents the 2015-16 Plan of Work of the “Greening Economies in the European Union’s Eastern Partnership Countries” project (Box 1) revised after the discussions at the 4th meeting of the EaP GREEN Steering Committee (18 June, 2015 in Chisinau, Moldova).

2. The document includes detailed activities identified for implementation between July 2015 and December 2015. It also indicates major activities planned for 2016. It has been has been prepared by four implementing Partners (UNECE, UNEP, UNIDO and OECD) in accordance with the long-term (2013-16) Programme of Work of the EaP GREEN adopted at the 1st meeting of its Steering Committee on 26 April 2013 in Berlin, Germany [ENV/EPOC/EAP(2013)1].

---

Box 1. Greening Economies in the European Union’s Eastern Partnership Countries (EaP GREEN)

The overall aim of the project is to promote green growth in six countries of the Eastern Partnership (EaP): Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova and Ukraine. In particular, the project is intended to help the countries to decouple economic growth from environmental degradation and resource depletion. More specifically, the EaP GREEN aims to:

- Mainstream sustainable consumption and production into national development plans, legislation and regulatory framework with a view to providing a sound legal basis for future policy development, in line with the regional and international agreements and processes and consistent with existing EU acquis in the relevant policy areas;

- Promote the use of the Strategic Environmental Assessment (SEA) and Environmental Impact Assessment (EIA) as essential planning tools for an environmentally sustainable economic development; and

- Achieve a shift to green economy through the adoption of sustainable consumption and production practices in selected economic sectors (manufacturing, agriculture, food production and processing, construction).

Accordingly, the EaP GREEN is structured around three components: (1) Governance and financing tools; (2) SEA and EIA: accompanying SCP policy implementation; and (3) Demonstration Projects.

The EaP GREEN supports partner countries’ commitment to move towards a green economy as stated in the Joint Declaration of the Warsaw Eastern Partnership Summit and in the Declaration of the Seventh “Environment for Europe” Ministerial Conference held in Astana (September 2011). Its objectives are consistent with the vision agreed in the outcome document of the Rio+20 Summit.

The EaP GREEN is implemented over 48 months, starting from January 2013, with budget of EUR 12.5 million. Of this, 10 million is provided by the European Union and the rest by several OECD and EU governments and institutions, in particular the Netherlands, Norway, Slovenia, Switzerland and the Development Bank of Austria. The four implementing partners - OECD, UNECE, UNEP, and UNIDO – also provide co-financing.
Table 1. EaP GREEN Plan of Work for July 2015 – December 2016

<tbody>
<tr>
<td>1.1: Supporting Strategic Policy Setting</td>
<td>Lead partner: UNEP</td>
</tr>
<tr>
<td><strong>Context:</strong></td>
<td><strong>Objectives:</strong></td>
</tr>
</tbody>
</table>
| • None of EaP countries has established a coherent policy planning framework related to sustainable consumption and production (SCP) and green economy (GE) promotion. These goals need to be better reflected in in operational plans and programmes of the government and budgetary plans. | • Support the development of national GE and SCP policy frameworks.  
• Demonstrate environmental, economic and social benefits of the implementation of SCP and moving towards GE. |
| **Outcomes:**                             | **ACTIVITIES PLANNED FOR JULY-DECEMBER 2015** |
| • Resource efficiency and SCP policies are integrated into national economic and development planning and implementation processes.  
• National SCP programmes or action plans are developed and implemented, where requested. | **Belarus:**  
• Finalisation and dissemination of a regional review on SCP.  
• Provision of inputs to the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns (10YFP) web portal (Information Clearing House on SCP) with information from the EaP GREEN.  
• National awareness raising through targeted production and dissemination of information/communication material on the opportunities and benefits of SCP and Green Economy to journalists, national stakeholders and the public at large.  

**Belarus:**  
• Two expert consultation meetings on the assumptions and base lines for the Green Economy (GE) modelling report.  
• A workshop to discuss the results by national stakeholders.  
• Preparation of the draft GE modelling report.  

**Moldova:**  
• A launching event for the GE modelling analysis report.  
• Support the coordination of the work of the inter-ministerial Working Group on GE.  

**Belarus:**  
• Data collected and modelling analysis conducted.  
• Preliminary modelling results reviewed by experts and national stakeholders.  
• Green Economy modelling analysis report drafted and finalized in two languages.  

**Moldova:**  
• Green Economy modelling analysis report launched.  
• Priorities for Green Economy Action Plan identified and agreed upon.  
• Inter-ministerial Green Economy Action Plan drafted and submitted for approval / adoption.
Preparation of the inter-ministerial Green Economy Action Plan and submission of the draft Plan for approval / adoption.

**Ukraine:**
- Three national consultation meetings on the assumptions for the GE modelling scenarios and the presentation of preliminary results and their validation by national stakeholders.
- Preparation of the GE modelling and analysis for identified sectors.

**Regional:**
- Communication products on SCP and GE.
- Awareness raised among stakeholders and the broader public on opportunities and benefits of SCP and GE.

<table>
<thead>
<tr>
<th>Regional-level work</th>
<th>National-level work</th>
<th>Expected results</th>
</tr>
</thead>
</table>
| • A two-day training for selected journalists from the EaP region to enhance awareness and capacity for reporting on GE, SCP and environmental matters in the region.  
• A regional meeting to review the progress on GE policy implementation and capacity in the region and identify challenges and needs for future assistance. | • An event for the launch of the GE modelling analysis report.  
• A capacity building workshop on SCP and GE for national stakeholders.  
• Support the development of national policies and policy instruments for GE [pending agreement with NFP and EU Delegation in Belarus]. | • GE modelling report launched.  
• Capacity built and awareness raised among a number of national stakeholders on GE and SCP.  
• [National policies / policy instruments on GE developed]. |
| **Belarus:** | **Moldova:** | **Belarus:** |
| • Continuation of the support to the inter-ministerial Working Group on GE.  
• Identification of two priorities from the Green Economy Action Plan and assistance with their implementation. | • Green Economy Action Plan approved.  
• Inter-ministerial Working Group meets regularly and reviews implementation of Green Economy Action Plan. | • GE modelling report launched.  
• Capacity built and awareness raised among a number of national stakeholders on GE and SCP.  
• [National policies / policy instruments on GE developed]. |

---

1. An activity “Assistance to the development of a waste management strategy with a focus on GE” is cancelled due to lack of progress with the development of the Waste Strategy in Ukraine.

2. See footnote 1.
### Ukraine:
- A capacity building workshop on SCP and GE for national stakeholders.
- Support to the development of national policies and policy instruments for GE.
  
> [pending agreement with NFP and EUD Ukraine]

### Ukraine:
- Capacity built and awareness raised among a number of national stakeholders on GE and SCP.

### Regional:
- Journalists from the EaP region trained and capacity built on reporting on GE and SCP.

---

### 1.2: Progress measurement: Green Growth Indicators (GGIs)

#### Lead partner: OECD

#### Context:
- Changing the development path requires analytical evidence that resonates both with environmental and non-environmental communities. To generate such evidence, governments may need to revisit the set of indicators that they currently use. Although the EaP countries have a long history of collecting statistical data, the collected data are often patchy, insufficient in terms of quality and poorly used in decision-making. The OECD proposed a set of green growth indicators on the basis of existing work in international organisations, and in OECD and partner countries.

#### Objectives:
- Consensus on good practices and raised awareness about the value of GGIs.
- Adaptation of GGIs in three EaP countries.
- Identification of 6-7 headline GGIs for regional use.

#### Outcomes:
- Identification and use of national sets of GGIs.
- Better integration of economic and environmental decision-making.
- Evidence-based monitoring of transition towards green economy.

---

### ACTIVITIES PLANNED FOR JULY–DECEMBER 2015

<table>
<thead>
<tr>
<th>Regional-level work</th>
<th>National-level work</th>
<th>Expected results</th>
</tr>
</thead>
</table>
| **Regional** handbook and the Policy Brief on green growth indicators (September 2015)  
**A regional** meeting on GGIs in co-operation with the UNECE (November 2015).  
**Identification of common** headline indicators. | **workshop on measuring progress towards green growth in Ukraine** (July 2015, TBC).  
**workshop on measuring progress towards green growth in Armenia** (July 2015, TBC).  
**Report on green growth indicators in Armenia** (December 2015).  
**Report on green growth indicators in Moldova** (December 2015) | **Publication and use of draft GGIs-based reports for shaping up government agenda in Armenia, Moldova and Ukraine.**  
**Clear identification of actions to use systematically GGIs in the pilot countries and stakeholder agreement on the draft handbook.** |

---

3 An activity “Assistance to the development of a waste management strategy with a focus on GE” is cancelled due to lack of progress with the development of the Waste Strategy in Ukraine.
## Tentative Plan for 2016

</thead>
</table>
| • A **regional** meeting on GGIs in co-operation with the UNECE.  
  • Dissemination of the **regional** handbook and the Policy Brief on green growth indicators. | • workshop and report on measuring progress towards green growth in **Azerbaijan** jointly organized with the participation of the Ministry of Ecology and Natural Resources, Ministry of Economy and Industry and relevant stakeholders.  
  • workshop and report on measuring progress towards green growth in **Georgia**. | • Publication of GGIs-based reports for shaping up a road map and policies in **Azerbaijan and Georgia**.  
  • Development of GGI systems with underlying data flows in **five countries** for measuring progress towards green growth.  
  • Agreement on **common** headline indicators.  
  • **Regional** handbook on GGIs disseminated to a wide range of stakeholders. |

### 1.3: Identifying environmentally-harmful subsidies (EHS) and launching subsidy reform

**Context:**
- The benefits of reforming environmentally harmful subsidies (EHS) include, among others, reducing the use of resource intensive inputs and subsequent decrease in pollution levels, fixing market distortions; releasing and/or reallocating public funding to other areas, and saving or reducing debt. There is some evidence that EHS in the EaP countries, and particularly energy subsidies, may be significant. However, until now there has not been any consistent effort to analyse such subsidies in these countries and study the effects of their reform on country’s fiscal and environmental conditions. This is the first such project in the region.

**Objectives:**
- Raise awareness of policy makers in EaP countries of existing energy subsidies and their potential economic, social and environmental impacts  
  - Review and develop a consistent and comprehensive description of environmentally-harmful and economically wasteful energy subsidy schemes in EaP countries and provide robust estimates of their volumes by using an internationally recognised methodology;  
  - Build political support for energy subsidy reforms.

**Outcomes:**
- Number of subsidy schemes analysed and reforms proposed and agreed upon within the respective government.  
  - Existence of specific regulatory documents and decisions related to the EHS reform in the country.

### Activities Planned for July-December 2015

<table>
<thead>
<tr>
<th>Regional-level work</th>
<th>National-level work</th>
<th>Expected results</th>
</tr>
</thead>
</table>
| • Initial scoping report and a project kick-off meeting at the OECD Headquarters (end of July 2015, Paris). | • Collection of information and data available in the public domain in **Armenia, Azerbaijan, Belarus, Georgia and Ukraine** (July-October 2015).  
  • Preparation of draft country analytical chapters (November – December 2015). | • Major types of energy subsidy schemes in individual countries, provided at both national and sub-national level, identified and estimated.  
  • Individual chapters for **six countries** prepared in English and national languages. |
## TENTATIVE PLAN FOR 2016

<tr>
<td>• Draft summary analytical report on energy subsidies in <strong>all EaP countries</strong> (January – February 2016).</td>
<td>• Country-level stakeholder meetings in <strong>each EaP country</strong> to present, discuss and agree upon the findings and conclusions of the country analyses (March – May 2016).</td>
<td>• Stakeholder meetings organised in the countries and attended by relevant experts who take active part in the discussions.</td>
</tr>
<tr>
<td>• Final <strong>regional</strong> analytical report published in English and Russian (July 2016).</td>
<td></td>
<td>• Reaching agreement during discussions with governments on the results of the country analyses and on necessary energy subsidy reforms.</td>
</tr>
</tbody>
</table>

## 1.4: Creating market incentives for greener products

### Lead partner: OECD

**Context:**
- EaP countries struggle with a number of environmental challenges that can be addressed through economic instruments (EIs), including the rapid growth of the use of motor vehicles and associated emissions of carbon dioxide and local air pollutants, the lack of sound waste management solutions for end-of-life vehicles and their parts; the exponential increase of municipal solid waste from packaging and electric and electronic equipment; the indiscriminate use of pesticides and fertilizers in agriculture, etc. All EaP countries are interested in expanding the use of product-related EIs.

### Objectives:
- Facilitate the reduction of environmental impacts of priority, largely diffused manufactured products;
- Build capacity in EaP countries for introduction and/or reform of product-related EIs.

### Outcomes:
- Adoption of new or reformed policies and economic instruments for the management of environmentally harmful products

### ACTIVITIES PLANNED FOR JULY-DECEMBER 2015

<table>
<thead>
<tr>
<th>Regional-level work</th>
<th>National-level work</th>
<th>Expected results</th>
</tr>
</thead>
<tbody>

#### 1.5: Improving investment policies and access to finance

**Context:**
- Moving onto a greener, low-carbon and resource-efficient path of economic development requires significant investments. The public sector alone cannot bear the costs of such investments. In order to promote private sector finance, governments need to provide appropriate incentives. Commercial banks have a potentially important role to play in providing lending for green investments. However, under the current conditions in EaP countries the involvement of these banks is rather limited.

**Objectives:**
- Reaching consensus on the conditions and reforms that would enable commercial banks in the EaP countries to support investments in green projects
- Strengthening cooperation between governments and the private banking sector aiming to improve access to private finance

**Outcomes:**
- Agreement between the government and the banking sector on needed regulatory reforms
- Number of credit lines analysed and relevant policy recommendations made and agreed upon

**Lead partner:** OECD

### ACTIVITIES PLANNED FOR JULY-DECEMBER 2015

<table>
<thead>
<tr>
<th>Regional-level work</th>
<th>National-level work</th>
<th>Expected results</th>
</tr>
</thead>
</table>
| • No regional activities planned | Ukraine: | • A policy-relevant report and reform recommendations prepared and discussed at a stakeholder’s meeting in Ukraine.
- Mission to review the experience of Ukreximbank in Ukraine with the design and implementation of IFI-supported environmental credit lines (end of June 2015)
- Stakeholder meeting in Ukraine to present and discuss the major findings that have emerged from the analysis of the Ukreximbank experience with managing environmental credit lines (October 2015)
- Presentation of preliminary results of the project in Ukraine at the EAP Task Force meeting (7-8 October, 2015)

**Georgia (tbc):**
- Mission to review the experience of Georgia with the design and implementation of environmental credit lines (Sept - Oct. 2015)
- A kick-off mission to launch a review process of selected environmental credit lines in a Georgian bank (e.g. the Bank of Georgia) organised (to be confirmed by Georgia). |
#### Regional-level work

- Summary **regional** policy report of the main findings and observations from the country-level analyses.

#### National-level work

- Mission to review the experience of a third country (possibly **Moldova**) with the design and implementation of environmental credit lines (January 2015).
- Three awareness-raising seminars on environmental lending in the EaP countries where no individual case studies are prepared (**Armenia, Azerbaijan, Belarus**).**

#### Expected results

- **Georgia** (tbc): A policy-relevant report and reform recommendations prepared and discussed at a stakeholder’s meeting in Tbilisi.
- **Moldova** (tbc): A kick-off mission to launch a review process of selected environmental credit lines in a Moldovan bank.
- Summary policy report targeted at policy-makers in all EaP countries prepared and widely disseminated across the region.
- EaP policy makers actively participate in debates in the countries and reach agreement on necessary energy subsidy reforms.

### 1.6: Promoting public consumption changes through green procurement practices

**Context:**
Governments in the Eastern Partnership countries are important consumers: their expenditure represents some 20% of the GDP, ranging from 11.3% in Azerbaijan to 27.3% in Moldova. With the exception of Georgia and Ukraine, where governments have already taken specific steps to make their procurement practices more sustainable, none of the ENPI partner countries have national green public procurement policies in place. Even where relevant provisions for SPP have been enacted in legislation, the operational policies are lacking.

**Objectives:**
- To assist countries in the development and implementation of SPP policies by increasing awareness and building the capacities of policy makers and procurement managers.

**Outcomes:**
- Awareness raised and capacity strengthened on SPP approaches;
- National SPP Action Plans are developed in three target countries in coherence with existing SCP and sustainable development policies.

### Activities planned for July-December 2015

**Regional-level work**
- No regional activities planned.

**National-level work**
- **Belarus:**
  - The status assessment exercise (June 2015)
  - A legal review to identify possibilities to mainstream SPP within the existing legal and regulatory frameworks (June-July 2015).

**Expected results**
- **Belarus:**
  - Status Assessment questionnaire completed.
  - Legal review conducted highlighting the proposed regulatory changes to foster SPP implementation.
A prioritization exercise for the selection of main categories of sustainable products for inclusion in pilot tenders and procurement by selected public entities (July-August 2015).
- A market study on selected prioritized products to assess the existing capacity of the local market to respond to future SPP tenders (September 2015).
- Draft of the recommendatory SPP Action Plan and organization of a workshop to finalize the draft (November-December 2015).
- Priority sustainable products selected for inclusion in pilot tenders in 2016.
- Market study assessing the responsiveness of the market to SPP tenders completed.
- SPP Action Plan completed.

</tr>
</thead>
<tbody>
<tr>
<td>No regional activities planned.</td>
<td>All activities related to the next phase of the implementation are listed under Component 3.</td>
<td></td>
</tr>
</tbody>
</table>

**1.7: Greening of SMEs**

**Context:**
- While constituting a majority of businesses, small and medium-sized enterprises (SMEs) lack, to a large extent, the understanding that higher environmental performance can be a competitive advantage. Most importantly, they have limited capacity to interpret and respond to relevant policy incentives. Many EU and other OECD countries have addressed this challenge by implementing information-based tools and regulatory and financial incentives to encourage SMEs to improve their environmental performance, to comply with and go beyond regulatory requirements. However, EaP countries have given little consideration to the greening of small businesses.

**Objectives:**
- Establish a policy framework for improving the environmental performance of SMEs.
- Develop capacity in EaP countries to promote SME greening.
- Promote government-to-business and business-to-business dialogue on SME greening in the EaP region.

**Outcomes:**
- Policy and legislative changes in support to the SME greening.

<table>

Component 2: SEA and EIA: accompanying SCP policy implementation

### 2.1: Revision of national regulatory and legislative frameworks

**Context:** The existing environmental assessment legislation in many EaP countries, provides for environmental impact assessment (EIA) procedures at the national and transboundary context, and contains elements of strategic environmental assessment (SEA). However, there were indications that gaps in legislation and practice prevented countries from conducting EIA and SEA procedures in line with the Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention) and its Protocol on SEA, as well as with the relevant EU legislation. A review of national legislative and other regulatory framework on EIA and/or SEA in these countries has been recently undertaken, which has proven an efficient tool for identifying areas of concern and improvement.

**Objectives:** Promote the integration of EIA and SEA systems into the national legal, regulatory, and administrative frameworks of the partner countries. Improve understanding for and acceptance of the necessary measures for efficient implementation of SEA and EIA among national stakeholders.

**Outcomes:** Increased number of EaP countries, Parties of the Protocol on SEA and the Espoo Convention.

### ACTIVITIES PLANNED FOR JULY-DECEMBER 2015

</tr>
</tbody>
</table>

- Preparation of guidelines on developing national legislative framework on SEA (previously entitled “sub-regional overview”) (March – October 2015).
- Preparation of Good Practice recommendations on the application of the Convention to nuclear energy-related activities.  

- **Azerbaijan**: Assistance to the drafting of the SEA and transboundary EIA provisions to the draft environmental assessment law extended to November 2015 (originally planned for October 2014 – March 2015), incorporation of the results of the SEA pilot (November 2015).
- **Belarus**: Assistance to the drafting of the SEA provisions to the EIA law (March 2015 – December 2015), including development of amendments in June-July, 2015 and national consultations in August 2015 (tbc).
- **Georgia**: Preparation of the draft law on EIA and SEA (September 2014 – September 2015), Series of the meeting of the small working groups with the participation of public (June-July 2015) and the final consultation meeting (September 2015).
- **Moldova**: Three bylaws to enforce SEA law are prepared and submitted to the Parliament.
- **Ukraine**: Awareness raising event for high level officials to support adoption of the draft law on SEA (12 June 2015).
- **Regional**:  
  - Guidance for drafting SEA and EIA legislation prepared.
  - Subregional conference organized. Raised awareness among at least 30 experts in the participating countries about the legal requirements of the Protocol on SEA and EU SEA and EIA Directives.
  - Consultants for development of Good Practice recommendations on the application of the Convention to nuclear energy-related activities selected.

---

4 The inclusion of this activity was agreed at the fourth Steering Committee meeting (18 June 2015, Chisinau).
5 An activity “Press tour to raise awareness about SEA among various stakeholders (October 2015)” is cancelled following a request from the Ministry of the Environmental Protection of Georgia.
6 An activity “Preparation of bylaws to support the enforcement of the EIA law and the draft law on SEA in Moldova” originally planned for October 2014 - September 2015 was implemented in early 2015.
7 See footnote 4.
### 2.2: Capacity building on SEA/EIA procedures

**Context:**
- In absence of a legislative framework which requires mandatory application of SEA, the EaP countries lack capacities and practical experience in the application of the SEA in line with the Protocol on SEA and relevant EU legislation. Most of the plans and programme subject to SEA are sub-national or local land-use plan or other local plans which impact people’s everyday life. The capacity building activities will thus target both national and local authorities, whose involvement is vital for the development of successful SEA/EIA systems. National authorities will be enabled to provide advice and training on SEA to the local authorities. For better efficiency, training courses will be combined with carefully selected pilot SEA or EIA projects.

**Objectives:**
- Contribute to the development of national SEA/EIA systems and practice.
- Increase awareness and understanding of the benefits of SEA/EIA and facilitating acceptance among decision-makers, relevant authorities and the public.
- Elaborate and support implementation of recommendations for further improving the effectiveness of SEA and EIA systems.

**Outcomes:**
- Practical experience and national capacities for application SEA/EIA at the national and local level are available at the EAP countries.

### ACTIVITIES PLANNED FOR JULY–DECEMBER 2015

<table>

</tr>
</tbody>
</table>
**Sub-regional** train-the-trainers workshop on practical application of SEA (20-23 October 2015, Georgia).
- Preparation of the brochure on SEA benefits (June – October 2015)
- Preparation of a video on SEA procedure and benefits (June – October 2015)

**Azerbaijan**: Finalization of the SEA pilot project in energy sector (March – November 2015), including consultations with relevant authorities and interested public on the draft Strategy and SEA report (end of August 2015) and a final event in the beginning of November 2015.

**Georgia**:
- The SEA pilot project in waste management sector (June – December 2015), including an impact workshop in August 2015 and public consultations in the first part of October 2015.
- Expert support to the Ministry of Environmental protection in ensuring the quality EIA documentation (August 2015).

**Moldova**:
- Preparation of the final documentation on the local level SEA pilot by August 2015.
- Implementation of a SEA pilot project at the national level (November 2015 – September 2016), including grant application in September 2015 and a start-up workshop in November 2015.

**Ukraine**:
- SEA awareness raising workshops for sectoral authorities, including high level representatives (June 2015).
- SEA awareness raising event for environmental authorities (June 2015).

**SEA to plans/programmes**.
- Training methodology updated and used at the training events and disseminated.
- **Azerbaijan**: the SEA pilot project successfully implemented using best practices and lessons learned.
- **Armenia, Georgia, Moldova and Ukraine**: Pilot SEAs initiated. Their results are shared at the national training and regional conferences.
- **Armenia, Azerbaijan, Georgia, Moldova and Ukraine**: Guidance on application of SEA prepared.
- **Moldova**: Guidance on application of EIA prepared.
- **Ukraine**: 20 participants from the sectoral ministries familiar with the SEA draft law, SEA procedure and benefits; 20 representatives of the environmental authorities familiar with role of environmental authorities in SEA procedure.

**Regional level**:
- Up to 5 national experts from each country trained as trainer on practical application of SEA and at least 3 national experts delivered trainings at the national or local level.
- Promotional brochure and video prepared and used at the EaP GREEN SEA events and distributed among national authorities of the participating countries for national/sub-national use.

---

10 An activity “Development of guidelines on application of EIA (by December 2015)” planned to be part of the EaP GREEN will be implemented by Moldova with its internal resources.

11 An activity “SEA pilot project in waste management sector in Ukraine (November 2015 – September 2016), including grant application in October 2015 and a start-up workshop in November/December 2015” is cancelled due to lack of progress with the development of the Waste Strategy in Ukraine.

  o Guidance on application of SEA (Summer 2016). | • At least 15 participants from each country trained (as a national and/or local-level trainer) and at least 7 experts have practical experience on application of SEA to plans/programmes through participation in the pilot project. |
| • **Sub-regional** conference ‘Lessons learned from the SEA pilot projects in Armenia, Azerbaijan, Belarus, Georgia, the Republic of Moldova and Ukraine’ (September 2016, Ukraine). | • Azerbaijan:  
  o One national level training event on SEA (tentatively Spring 2016).  
  o Guidelines on application of SEA (Summer 2016). | • Armenia, Azerbaijan, Georgia, Moldova and Ukraine: (tbc) Pilot SEAs completed. Their results shared at the national training events and the regional conference. |
| | • Belarus:  
  o One national level training event on SEA (tentatively Spring 2016).  
  o Updated guidance on application of SEA (Summer 2016). | • Armenia, Azerbaijan, Georgia, Moldova and Ukraine: Guidance on application of SEA prepared a (for Belarus) updated |
| | • Georgia:  
  o Guidelines on application of SEA (Summer 2016).  
  o Awareness raising event for high level officials (Spring 2016) (tbc)\(^\text{12}\).  
  o Expert support and training to the Ministry of Environmental Protection in ensuring the quality of SEA and EIA documentation (January – May 2016) (tbc).\(^\text{13}\). | • Belarus: Guidance on application of SEA updated. |
| | • Moldova:  
  o A SEA pilot project at the national level (November 2015 – September 2016):  
  o Guidance on application of SEA (Spring 2016). | • Moldova: Guidance on application of EIA prepared. |
| | | • For all countries: At least 3 national experts delivered trainings at the national or local level. |
| | | • **Sub-regional** conference organised and lessons learned from the implementation of SEA pilot projects documented and disseminated at the national and sub-national level. |

\(^\text{12}\) This activity can only be conducted if substantial savings are made in the implementation of the pilot project in Georgia.

\(^\text{13}\) See footnote 12.
2.3: Strengthening the administrative capacities of the authorities in charge of the environmental assessment

**Context:**
- A clear definition of both the competent authorities in decision-making and the responsibilities for arranging public participation are needed for efficient EIA and SEA. In particular, in the case of SEA commitment and clear division of roles among other relevant authorities (planning, health, etc.) is required to achieve its targets of impacting strategic decision-making. For sectorial plans and programmes, joint capacity-development activities can help to strengthen coordination between government departments. This activity will provide for involvement of various authorities and include clarification of responsibilities for SEA and EIA procedures. It will be implemented through the activities 2.1 and 2.2.

**Objectives:**
- To define and clarify responsibilities and roles of competent authorities for SEA and EIA procedures.
- To improve inter-institutional cooperation and involve all the relevant actors in the legislative reviews, technical assistance, training on and pilot implementation of SEA/EIA.

**Outcomes:**
- Enhanced capacities of the administrative authorities in charge of the environmental assessment for conducting SEA and EIA.

Revision of the existing national regulatory and legislative framework and 2.2. Capacity building.

Component 3: Demonstration projects

3.1.1. RECP Human and Institutional Capacity Development

**Context:**
- SMEs in EaP countries, in particular from the targeted food processing, construction materials and chemicals sectors, lack access to quality, appropriate and affordable RECP advisory services, causing them to miss out on potentially costs saving opportunities for conservation of materials, water and energy and for reduction of emissions, effluents and wastes.

**Objectives:**
- To establish or strengthen a nationally appropriate mechanism for delivering value adding RECP services to enterprises and other organizations in each EaP country.

**Outcomes:**
- Total of 60 national experts trained and coached in application of basic RECP methods and techniques.
- A total of 15 short term trainings organized on advanced RECP topics.
- Three regional meetings of key national RECP experts.

**ACTIVITIES PLANNED FOR JULY-DECEMBER 2015**

<table>
<thead>
<tr>
<th>Regional Level Activities</th>
<th>National Level Activities</th>
<th>Expected results</th>
</tr>
</thead>
<tbody>
<tr>
<td>3rd and 4th regional coordination and planning meetings (Georgia in March 2015 and Ukraine in July 2015). Participation of national coordinators in global RECP networking conference and World Resources Forum (12-16 October 2015, Switzerland) to present EaP GREEN achievements and lessons learned, and facilitate further training and networking of key experts with related initiatives in EECCA region and beyond.</td>
<td>First round training and expert coaching completed for national experts in all six countries. Second round of training and coaching programme underway in all six countries. Meetings of RECP steering committees all six countries. Consultative dialogues on domestication of RECP in all countries, and publication of local RECP primers for each of the six countries. Start of series of topical RECP stakeholder dialogues in all six countries. Consultation and drafting of concepts for continued and institutionalized RECP service delivery in Armenia, Azerbaijan, Belarus and Georgia.</td>
<td>All countries: Minimum of 40 national experts trained in 2014 will be qualified for UNIDO RECP expert award and are continuing to contribute to adaptation and adoption of RECP in their home country. Some further 40+ national experts are undergoing training and working towards qualification as RECP expert in 2016. Nationally appropriate taxonomies and primers for RECP in SMEs developed and released in each country. Completed stakeholders mapping for RECP mainstreaming and scaling up in each country. RECP steering function strengthened in each country with engagement of government, business and civil society.</td>
</tr>
</tbody>

<tbody>
<tr>
<td>• 5th (and final) regional coordination and review meeting (Q2, TBC 2016)</td>
<td>• Second round training and expert coaching completed for national experts in each EaP country.</td>
<td>• Second group of some 40 national experts completed training and received RECP awards</td>
</tr>
<tr>
<td>• Participation of national coordinators in regional chapter meeting of RECPnet for EECGA region to foster networking, knowledge management and international cooperation (Q3, TBC 2016)</td>
<td>• Continuation and conclusion of topical RECP stakeholder dialogues in each country, and publication and dissemination of its results.</td>
<td>• Total of six topical RECP dialogues completed in each country, having resulted in improved understanding and awareness for need for and business potential of RECP among government, business sector and civil society.</td>
</tr>
</tbody>
</table>

3.1.2. RECP Implementation, Dissemination and Replication

Context:
• SMEs remain sceptical towards adopting RECP methods and techniques, due to lack of properly documented company examples with proven resource conservation, environment and economic benefits. Moreover, practical mechanisms for enterprise cooperation and joint learning at sector or regional level are lacking.

Objectives:
• To allow enterprises and other organizations in the EaP countries to implement RECP concepts, methods, practices and techniques and to monitor and verify their environment, resource use and economic benefits.

Outcomes:
• Detailed RECP assessments completed for at least 90 demonstration companies.
• Minimum of 50 enterprise success stories compiled.
• Some 25 replication programmes planned and delivered.
• Some 200 SMEs have completed a replication activity and 75% thereof has started implementation of RECP opportunities.

<td>• Increased awareness and understanding among government and business community of the benefits of RECP achieved by national enterprises.</td>
</tr>
<tr>
<td></td>
<td>• Completion of second round of RECP Clubs in two municipalities/regions in each country, each involving some 8-10 SMEs</td>
<td>• Some 12 municipalities around EaP region actively continue fostering RECP in local SMEs, with engagement of some 100 (new) SMEs across the region.</td>
</tr>
</tbody>
</table>

---

### 3.1.3. RECP Technology Support

**Lead partner: UNIDO**

**Context:**
- RECP implementation in industries is contingent on having appropriate RECP enabling technologies and equipment available to SMEs in local markets.

**Objectives:**
- To identify and promote the transfer and widespread deployment of appropriate and affordable RECP techniques and technologies for the target industry sectors.

**Outcomes:**
- Three sector based RECP technology needs and opportunity assessment reports published.
- Minimum of five RECP technology pilots prepared and promoted for implementation for each target sector.

| • No regional activities planned. | • Follow up support to most promising demonstration companies (from second batch) for techno economic evaluation and project planning for higher technology and investment options.  
• **National roundtables** on enabling implementation and investment in RECP technologies in target sectors | • Specific investment proposals developed and promoted for some 2-3 demonstration enterprises from second batch in each country. |

### 3.2. Stimulating innovation and more sustainable goods and services through sustainable public procurement

**Lead partner: UNEP**

**Context:**
- In order to move towards more sustainable consumption and production patterns, emphasis needs to be placed on the change of consumption behaviours both from institutional and individual consumers. Product information tools, such as eco-labelling, provide consumers with information about the product’s impacts and give market incentives to producers to produce environmentally and socially beneficial products. There is considerable lack of operational policies, even where GPP-relevant provisions have been. Following the development of SPP National Action plans in the target countries under Component 1 the demonstration component will focus on supporting the implementation of SPP.

**Objectives:**
- To effectively implement sustainable public procurement in targeted countries.
- To raise awareness of public authorities, producers and consumers about the potential of eco-labels, including through the dissemination of best practices for practical implementation of eco-label related EU directives to the industry and public.
- To increase understanding and skills of policy-makers in applying eco-labelling.

**Outcomes:**
- Increased public procurement of sustainable goods and services.
- Awareness and capacity of policy makers and private sector strengthened to enhance synergies between eco-labelling and SPP.

• List of existing ecolabels for three selected SPP priority products and sustainability criteria developed.  
• Updated guidelines for selected products/services for SPP in line with existing |
tools.

- Development of SPP tools incorporating sustainability criteria (updating and developing procurement guidelines for the products and services prioritized for SPP implementation, in line with existing ecolabels; customizing tender documents for prioritized products/services with appropriate technical specifications, sustainability criteria and/or direct reference to ecolabels, and award criteria) (June-August 2015).
- An information campaign on SPP targeting relevant stakeholders (June 2015-December 2016).
- Development of a communication strategy on SPP and ecolabels to be rolled out in 2015 and 2016 – (August 2015).
- Pilot tenders covering the prioritized sustainable products – (September-December 2015).
- Update of UNEP’s training materials.
- Incorporation of procurement guidelines and customization of tender documents for prioritized products in the training toolkit – (November-December 2015).
- Capacity building activities (‘training the trainers’) for public procurers on SPP and ecolabels – (November-December 2015).
- Information and capacity building activities for suppliers on compliance with SPP criteria and product sustainability certification, and dissemination of best practices for the implementation of ecolabel-related EU directives – (November-December 2015).
- Updated tender documents for selected products/services.
- Communication strategy developed and communication materials targeting relevant stakeholders disseminated.
- Roadmaps for each pilot tender and pilot tenders for prioritized sustainable products launched and awarded.
- UNEP training materials adapted to national needs incorporating procurement guidelines and tender documents for selected SPP priority products.
- Number of trainers and public procurers trained on the insertion of sustainability criteria with direct reference to ecolabels (where applicable) throughout the procurement cycle.
- Representatives of the private sector, chambers of commerce and industries trained on SPP criteria and product sustainability certification.
- Increased awareness on SPP and ecolabels among procurers and suppliers.
- Assessment on developing and integrating an SPP training module into existing governmental training programmes carried out.

product sustainability certification, and disseminate best practices for the implementation of ecolabel-related EU directives.
• A proposal for the revision of the current public procurement legislation.
• Integration of three new sustainable products in the procurement system using the UNEP Approach.
• A conference for a wide range of stakeholders and the public to present achievements and raise awareness.

3.3: Promoting Organic Agriculture

Lead partner: UNEP

Context:
• Application of green agricultural practices and technologies helps to simultaneously address issues of environmental degradation and poverty. Organic agriculture (OA) offers opportunities to countries in the EaP region to access international and especially, European markets, create new and more rewarding jobs, develop new businesses, address climate change and build natural capital on which prospects for sustainable economic growth and wealth creation depend. Significant opportunities exist for further promoting organic farming in Armenia, Moldova and Ukraine.

Objectives:
• Building the capacity of the private sector to access growing international and European markets for organic products;
• Assess the value and feasibility of a sub-regional organic standard.

Outcomes:
• Enhanced knowledge of market opportunities and barriers
• Improves capacities for production and trade of organic products.
• Increases number of companies and farmers that harness the trade opportunities of organic agriculture.

<table>

A regional workshop on the role of institutions for advancing the development of the organic agriculture sector in the second half of 2015 in Moldova.

A regional toolkit on marketing, packaging and branding.

Collection of success stories of Eastern European exporters.

February 2015 between selected companies and buyers.

Two training workshops for up to 30 selected farmers on the conversion from conventional to organic agriculture practices.

Support to selected farmers on the design of a business plan for the conversion to organic agriculture and the certification process of their farms.

A tailored awareness raising campaign to increase awareness of organic agriculture products in Moldova.

A local organic market in Chisinau on four consecutive weekends and a media campaign.

Number of new contacts and contracts of participating and supported companies with buyers at Biofach evaluated (increasing export volume of participating producers).

Dissemination of project publications, such as country studies, the market assessment report, country fact sheets and export success stories raised awareness and increased knowledge on export and market opportunities among policy makers, certification bodies and organic producers.

Up to 30 farmers trained on organic agriculture and certification practices and requirements.

Additional farmers have initiated the conversion of their farms to organic agriculture.

Awareness raised among the broader Moldovan population on the benefits of organic agriculture products.

</tr>
</tbody>
</table>

15 The inclusion of this activity was agreed at the fourth Steering Committee meeting (18 June 2015, Chisinau).

16 See footnote 15.
### Implementation of the communications strategy

**Context:**
- A Communication Strategy for the programme was developed in consultation with the programme’s implementing partners.
- Communications activities also aim to respond to the EU’s requirements on visibility as laid out in our agreement.

**Objectives:**
- To strengthen the EaP GREEN brand and achieve visibility for ongoing projects
- To promote the impact of the work conducted under the three components of the programme
- To raise awareness and generate support for the required policy measures and decisions on greening economies in the region
- Fundraising

**Outcomes:**
- A distinct and well-known visual identity for EaP GREEN.
- Brand recognition by target audiences.
- Supportive documents and advocacy available for partners and NFPs—such as brochures, flyers, country notes, website and social media.
- Continuous information flow and updates on ongoing activities and achievements through as many channels as possible.
- Development of story-lines for communications including production of videos and infographics for selected projects
- Work with the local and international media (as applicable).

### ACTIVITIES PLANNED FOR JULY-DECEMBER 2015

#### Regional Level Activities
- Maintain the EaP GREEN web content updated and create new content items in English and Russian.
- Feed the EaP GREEN resource library with publications and other outputs produced under Project Components.
- Continue feeding the Flickr platform—including the production of the audio-visual newsletter.
- Seek new avenues for disseminating work on social media.
- Assist Project Partners in the application of the EaP GREEN brand and visual identity.
- Prepare a new programme brochure on the achievements of the EaP GREEN programme.

#### National Level Activities
- Liaise with the National Focal Points and roll-out information pages about the EaP GREEN under the corporate website of each participating countries' Ministries of Economy and/or Environment (similar to action taken recently by Moldova).
- Update and release regular National Focal Point updates.
- Update one-page country information sheets; ensure dissemination to target audiences.

#### Expected results
- Established brand recognition and visibility for EaP GREEN.
- Availability of a range of professionally developed, up-to-date set of communications and advocacy materials.
- Editorial overview and communications plan around upcoming activities.
- Dissemination of EaP GREEN / OECD publications through the OECD iLibrary.
