The job...

1. Review and input data submissions from Administrations and other sources. Check data for completeness, internal consistency and plausibility. Compare data with published sources for accuracy and consistency with definitions. Maintain appropriate documentation on data series. Organise and manage the data extraction and transformation from other OECD databases on macroeconomic and socio-economic data for inclusion into OECD Health Data.

2. Liaise with statistical offices and international organisations to resolve more difficult data anomalies and definitional issues, answer enquiries on data availability, sources and methods, etc.

3. Prepare tables and charts to be included in publications and provide statistical material (statistical tables, charts) for the analytical work of administrators. Contribute to the preparation of official documents and publications, including statistics.

4. Maintain regular contacts with national administrations and other international organisations to obtain and to improve the statistical information and metadata. Maintain effective contacts with other statistical staff within the Organisation.

The person we are looking for should have...

1. Secondary level of education, preferably post-secondary level; sound knowledge of mathematics and applied statistics, and good understanding of economic principles and economic statistics, such as National Accounts and price indexes.
Applications (in English or French) from nationals of OECD Member countries should quote reference EXD/HRM/VAC(2001)015 and be sent via our on-line application form on www.oecd.org/hrm by 1 March 2001.

Only candidates selected for interview will be contacted.

For more information on OECD and our recruitment, please see www.oecd.org

We are an equal opportunity employer and encourage applications from female candidates.
