The job...

1. Contribute to the development of the OECD Territorial Database by: i) proposing new indicators for the evaluation of territorial policies; ii) assessing the availability and co-ordinating the collection of relevant statistical data; iii) elaborating the new indicators.

2. On the basis of those indicators, carry out cross-country statistical analyses on economic issues related to territorial development policy and governance.

3. Draft reports and articles on these analyses (working documents, documents for submission to the Committee, OECD publications).

4. Participate in the statistical work related to the territorial reviews.

5. Co-ordinate the work of statisticians.

The person we are looking for should have...

1. An advanced university degree in economics.

2. At least three to seven years’ experience in applied economic analysis on territorial development issues. Experience in international comparative analysis would be an advantage.

3. Excellent ability to carry out econometric analysis using advanced statistical software. Familiarity with SPSS would be an advantage.

4. Significant experience in the management of large statistical databases.
