The job...

1. Streamline existing regulatory databases and indicators and set up an efficient and user-friendly procedure for their future updating.

2. Carry out ad hoc statistical work on behalf of the economists of the Division, assisting in the testing of empirical relationships between economic variables.

3. Produce, as required, tables and graphs based on data contained in computer files describing regulatory developments in OECD countries.

4. Collect and carry out initial interpretation of statistical documentation pertaining to structural adjustment topics and prepare technical annexes (i.e. indicating sources, definitions, methods of calculation, etc.).

5. Undertake such other statistical tasks as may be required in the Division, including proof-reading of statistical material in both English and French and assisting in the finalisation and publication of the studies carried out by the Division.

The person we are looking for should have...

1. Post-secondary degree, with good knowledge of economics, statistics and applied econometric techniques. Familiarity with issues related to competition, regulation and industrial organisation would be an advantage.
2. Good knowledge of statistics and applied econometric techniques, with prior experience in database management and statistical and econometric analysis.

3. Ability to review statistical documentation related to structural adjustment topics and to prepare technical annexes on such issues.

4. Very good knowledge of database and spreadsheet software and statistical tools, such as Access, Fame and Troll, and good computer programming skills.

5. Good organisational skills, ability to work effectively in a multicultural environment on the basis of general instructions and with minimum supervision. Proven ability to meet strict deadlines.

6. Proven ability to exercise initiative and to undertake several projects simultaneously.

7. Very good spoken and written knowledge of one of the two official languages of the Organisation (English and French) and good knowledge of the other. Knowledge of other languages of Member countries would be an advantage.

N.B. The successful applicants will be required to have passed the OECD's test for Statisticians. Candidates shortlisted for interview will be contacted to arrange for a test to be held.

The appointment may initially be made at the level immediately below if the qualifications and professional experience of the selected applicant correspond to that level; in this case, the duties and responsibilities assigned to the post will be adjusted accordingly.

We are an equal opportunity employer and encourage applications from female candidates.

Applications (in English or French) from nationals of OECD Member countries should quote reference EXD/HRM/VAC(2003)061 and be sent via our on-line application form on www.oecd.org (click on recruitment) by 7th August 2003.

*Only candidates selected for interview will be contacted.*
