INTRODUCTION

This document presents the programme of the 3rd Public Voice conference, which will be held at OECD in Paris on 11 October 1999. This conference is co-organised by the Electronic Privacy Information Centre (EPIC) (http://www.epic.org) and Imaginons un réseau Internet solidaire (IRIS) (http://www.iris.sgdg.org), hosted by the Trade Union Advisory Committee to the OECD (TUAC) (http://www.tuac.org), and sponsored by the Global Internet Liberty Campaign (GILC) (http://www.gilc.org), with the help of the Trans-Atlantic Consumer Dialog (TACD) (http://www.tacd.org). The conference is organised in conjunction with the OECD Forum on Electronic Commerce (12-13 October 1999). For practical reasons, registration will only be open by invitation. Registration requests should be directed before 6 October 1999 to Andrew Shen (EPIC) at shen@epic.org. Practical information, as well as the URL of the web site of the conference will be available via the web pages of the OECD at http://www.oecd.org/dsti/sti/it/index.htm.
THE PUBLIC VOICE IN ELECTRONIC COMMERCE

OECD, PARIS, 11 OCTOBER, 1999

9h30-10h15 - Opening and Keynote Speeches

Herwig Schlögl, Deputy Secretary General, OECD

Yves Cochet, Vice-President, French National Assembly

10h15-11h30 - Panel 1 : Protection of Consumer Rights

Moderator: Dirk Klasen (AGV - TACD)

Panelists: Julian Edwards (CI - TACD) (invited)
Pippa Lawson (PIAC, Canada - GILC)
Jim Murray (BEUC - TACD)
Jytte Olgaard (Chair, OECD Committee on Consumer Policy)
TBD (UFC - Que Choisir, France) (invited)
TBD (Consumer org, USA - TACD) (invited)

Summary

The electronic purchase of goods and services by using the Internet provides new opportunities for consumers to use markets and price competition worldwide. However, consumers will not use this new chance if they cannot rely on a minimum of common standards of consumer protection. At present, due to the different rules which exist nationally or on the EU level private consumers do not actually have the same consumer rights which they are familiar with in their own country when they buy on the Internet. Therefore, it is necessary to agree on common standards of consumer protection dealing, inter alia, with information, applicable law and legal forum, terms and conditions of the contract, consumer complaints and dispute handling or advertising. This panel will discuss how far the OECD guidelines for consumer protection can promote a reliable environment for Internet shopping in the future and what is left to be done.
11h45-13h00 - Panel 2: Privacy and Personal Data Protection

Moderator: Dave Banisar (PI - GILC)

Panelists: Ulf Brühann (DG XV - EU) (invited)
Anne Carblanc (OECD Secretariat)
TBD (CNIL, France)
Caspar Bowden (FiPR, UK)
Alain Weber (LDH, France)
Roland Schneider (TUAC)

Summary

The Internet provides for many opportunities and dangers for the protection of individuals’ privacy and personal information. Detailed information about individuals’ entire lives including their interests, finances, and health can be collected, processed, and transferred around the world in seconds. Communications can be easily intercepted. Furthermore, worker privacy issues in the digital workplace are becoming a major concern for trade-unions. In response to these dangers, governments around the world are increasingly adopting new data protection and privacy laws. New tools are also being developed which allow for anonymous communications and transactions. This panel will examine some of the new privacy threats and the legal and technical responses that can be implemented on a global level.

15h00-16h15 - Panel 3: Internet Access and Development

Moderator: Meryem Marzouki (IRIS, France - GILC)

Panelists: Alain Baron (Sud-PTT, France)
Tracy Cohen (Univ. of the Witwatersrand, South Africa)
Eric Goldstein (HRW - GILC)
Harry Hochheiser (CPSR, USA - GILC)
Kate Raworth (UNDP)
Robert Shaw (ITU) (invited)

Summary

Recognized as one of the keys to maximizing development, Internet only could reach its positive social potential through access affordability all over the world. However, the deregulation of the Telecom industry has not yet resulted in providing universal service. Major studies and surveys show that market forces investments are not present in the places where access is most needed. This applies not only in poor communities of rich countries, but also, a fortiori, in developing countries, specially in rural areas: in its 1999 report on development, the UNDP shows the disparity of the Internet access users ratios among different parts of the world. Moreover, Internet governance is becoming a very hot issue, and new international bodies are being created to manage related questions, like the Domain Name System resolution. Panelists will present the status of Internet access in various parts of the world, and discuss the necessity of a regulatory framework to create the real conditions for universal access and affordability, in view of fair Internet development and use.
16h30-17h45 - Panel 4: Internet, the Future of Work and Quality of Life

Moderator: TBD (TBD, Sweden - TUAC) (invited)

Panelists: Gernot Erber (DIW, Germany)
Serge Leroux (CGT/ISERES, France)
Alain Lipietz (CEPREMAP/CNRS, France) (invited)
Philippe Quéau (UNESCO)
Luc Soete (MERIT/Maastricht Univ., The Netherlands) (invited)
Joel S. Yudken (AFL-CIO, USA - TUAC)

Summary

The Internet, particularly through electronic commerce, is considerably modifying relations between businesses and customers as well as between businesses themselves. This will effect working life as well as everyday life. It will also effect international relationships and trade agreements. Until now, these impacts have not been addressed sufficiently by national governments and international institutions. Instead, their main concerns were directed to promote and to ensure both free flow of capital and free trade of goods and services. However, new social challenges and new issues, brought about by the ever-growing use of the Internet for commercial purposes, have not been put on the political agenda. The panel is going to explore some of the challenges related to the transition towards the establishment of digital marketplaces. Particular attention will be given to the impact of e-commerce upon manufacturing industry and other sectors of the economy like services, media, to employment and employment strategies of firms, to education and training (skill developments, skill requirements), to the change working conditions and to the need to ensure social cohesion. Furthermore, the panel will deal with the impact of electronic commerce on the national taxation systems, with intellectual property rights and patentability issues. In short: this panel will discuss opportunities and ways to ensure that the ever growing use of the Internet goes along with democracy, social responsibility, equal opportunities and inclusion of all. It is intended to contribute to a framework towards fair Internet development and use from an inclusive Public Voice perspective.

17h45-18h15 - Conclusion

Summary of the key outcomes: Marc Rotenberg (EPIC - GILC)

Response: John Dryden (OECD)
