² On 11 July 2017, the Argentinian Authorities started to publish a new national CPI (December 2016 = 100) covering the whole country. This officially reported CPI-series starts in December 2016, and has now been included in the G20 aggregate, from January 2018 onwards. The inclusion of the Argentinian CPI in the G-20 aggregate entailed a clear break in the series.

As a consequence of measures put in place by governments to reduce the spread of the Coronavirus (Covid-19), many statistical agencies are facing unprecedented collection, compilation and methodological challenges to develop indicators across a number of domains. To address these challenges, the statistical community is developing guidance, both conceptual and practical, to help ensure the continued delivery of timely and reliable statistics. However, in some cases, there will inevitably be an impact on quality and, as such, the statistics included in this press release may be subject to larger than normal uncertainty.
