

OECD Statistics Day
Celebrating "International Year of Statistics"

Making Statistics
and Everyone Count

5 April 2013
10h00 – 12h00
OECD Conference Centre

For a decade, the Statistics Directorate has organised annual "Statistics Days" with the objective to showcase OECD Statistics and the work of OECD statisticians. In 2010, the OECD Statistics Day was organised in conjunction with the United Nations' *World Statistics Day*, based on the values of service, integrity and professionalism.

Similarly, the next OECD Statistics Day is being organised in the context of the International Year of Statistics. **The International Year of Statistics, also known as [Statistics2013](http://www.oecd.org/statistics/Statistics2013), is a worldwide celebration and recognition of the contributions of statistical science.** Through the combined energies of organisations worldwide, *Statistics2013* aims to promote the importance of statistics to the broader scientific community, business and government data users, the media, policy makers, employers, students, and the general public.

One of the main objectives of *Statistics2013* is to increase public awareness of the power and impact of Statistics on all aspects of society. The next OECD Statistics Day will be the opportunity to present several OECD streams of work that contribute to this objective.

More on *Statistics2013* at the OECD, visit www.oecd.org/statistics/Statistics2013attheOECD.htm.

OECD Statistics Day Agenda
