

TABLE OF CONTENTS

CHAPTER I. RESOURCES FOR THE INFORMATION ECONOMY	9
Investment in ICT equipment and software	10
Consumption of and investment in ICT goods and services	12
ICT patents	14
Occupation and skills in the information economy	16
CHAPTER II. THE ICT SECTOR	19
ICT producing sectors	20
Size and growth of the ICT sector	22
The contribution of the ICT sector to employment growth	24
R&D in selected ICT industries	26
The contribution of the ICT sector to international trade	28
ICT sector exports: share in total exports and composition	30
ICT trade specialisation and comparative advantage`	32
Foreign affiliates in the ICT sector	34
CHAPTER III. ACCESS TO AND USE OF INFORMATION TECHNOLOGIES	37
Telecommunications networks	38
Internet infrastructure	40
Internet subscribers	42
ICT access by households	43
Internet access by households	44
Use of the Internet by individuals	46
Internet access and use by businesses	48
Internet access and use by enterprise size and industry	50
Perceived barriers to Internet access and use in the business sector	52
The price of Internet access and use	56
CHAPTER IV. ELECTRONIC COMMERCE	59
Infrastructure for electronic commerce	60
Measuring electronic commerce transactions	61
Internet and electronic commerce transactions	62
Internet and electronic commerce transactions by consumers	66
Internet transactions by product and cross-border	68
Drivers and inhibitors of Internet commerce	70
CHAPTER V. ICT IN EDUCATION AND GOVERNMENT	75
ICT in education	76
ICT in government	78

ANNEXES

Annex 1. The OECD definition of the ICT sector.....	81
Annex 2. The Product classification used to estimate ICT sector trade	85
Annex 3. The OECD model survey of ICT usage in the business sector	87
Annex 4. The OECD definitions of Internet and e-commerce transactions	89
Annex 5. Main OECD databases used.....	91

FIGURES

1.1.	ICT investment in OECD countries	11
1.2.	ICT investment by asset in OECD countries.....	11
1.3.	Software investment in OECD countries	11
1.4.	Investment in and consumption of ICT as a share of GDP	12
1.5.	Share of consumption of ICT goods and services in total household consumption.....	13
1.6.	Share of ICT investment in total non-residential gross fixed capital formation	13
1.7.	ICT patents as a percentage of total national patents filed at the EPO.....	15
1.8.	Share of ICT patents filed at the EPO	15
1.9.	Share of high and low skills within the ICT-related occupations in the European Union and the United States.....	17
1.10.	High-skilled ICT workers and high-skilled workers in the European Union and the United States.....	17
1.11.	Computer workers in the European Union.....	17
2.1	Share of ICT-producing activities in the non-agriculture business sector.....	21
2.2.	Composition of ICT sector production.....	21
2.3.	Share of ICT value added in business sector value added.....	23
2.4.	Share of ICT manufacturing in total manufacturing value added	23
2.5.	Share of ICT services in total business services value added	23
2.6.	Employment in the ICT sector, selected OECD countries	24
2.7.	The contribution of ICT services to business sector employment growth, selected OECD countries	24
2.8.	Share of ICT employment in business sector employment	25
2.9.	Share of ICT manufacturing in manufacturing employment	25
2.10.	Share of ICT services in market services employment	25
2.11.	Business R&D expenditure by selected ICT manufacturing industries	27
2.12.	Business R&D expenditure by selected ICT services industries.....	27
2.13.	Share of ICT manufacturing in total R&D expenditure of the manufacturing sector ..	27
2.14.	Share of OECD countries in OECD-wide R&D expenditure in ICT manufacturing...	27
2.15.	ICT trade by area.....	29
2.16.	OECD 16 and ICT-related trade.....	29
2.17.	ICT manufacturing trade	29
2.18.	ICT sector trade balance.....	29
2.19.	Composition of ICT sector exports, 1990-2000	30
2.20.	Share of ICT sector exports in total merchandise exports.....	31
2.21.	The composition of ICT sector exports, 2000	31
2.22.	ICT export specialisation index.....	33
2.23.	ICT import propensity index	33
2.24.	ICT intra-industry specialisation index	33
2.25.	Share of production (turnover) of foreign affiliates in computer manufacturing (ISIC 30).....	35

2.26.	Share of production (turnover) of foreign affiliates in electronic equipment manufacturing (ISIC 32)	35
2.27.	Share of production (turnover) of foreign affiliates in the telecommunications sector (ISIC 642)	35
2.28.	Share of production (turnover) of foreign affiliates in computer-related services (ISIC 72)	35
2.29.	Relationship between share of production and employees of foreign affiliates in computer manufacturing (ISIC 30)	36
2.30.	Relationship between share of production and employees of foreign affiliates in radio, TV and communications equipment (ISIC 32)	36
2.31.	Share of R&D by foreign affiliates in office, accounting and computing machinery (ISIC 30)	36
2.32.	Share of R&D by foreign affiliates in radio, TV and communications equipment (ISIC 32)	36
3.1.	Access paths per 100 inhabitants	39
3.2.	Broadband penetration rates in OECD countries	39
3.3.	Number of Internet hosts per 1 000 inhabitants	41
3.4.	Web sites per 1 000 inhabitants	41
3.5.	Internet subscribers per 100 inhabitants	42
3.6.	Households Internet access by income level	44
3.7.	Households with access to a home computer	45
3.8.	Households with access to the Internet	45
3.9.	Household access by type of service	45
3.10.	Individuals using the Internet from any location	46
3.11.	Individuals frequently using the Internet	46
3.12.	Internet use by type of activity	47
3.13.	Businesses with Internet access	49
3.14.	Businesses with home and third-party Web sites	49
3.15.	Business Internet access by type of service	50
3.16.	Business use of the Internet via broadband connection by firm size	50
3.17.	Internet penetration by size class	51
3.18.	Internet penetration by activity	51
3.19.	Perceived barriers by businesses	53
3.20.	Perceived cost barriers by businesses by firm size	54
3.21.	Businesses lacking qualified personnel or know-how to use the Internet by firm size	54
3.22.	Businesses facing security issues by firm size	55
3.23.	Lack of perceived benefits from Internet use by sector	55
3.24.	Price of leased lines in the OECD area	57
3.25.	Price of 40 hours of Internet use at peak times in PPP dollars	57
3.26.	Internet access prices and Internet hosts	57
4.1.	Internet commerce developments measured by the number of secure Web servers	60
4.2.	Distribution of e-commerce sales in European countries	62
4.3.	Businesses using the Internet for purchasing and selling	63
4.4.	Selling, delivering and paying over the Internet	63
4.5.	Internet purchases and sales by size class	64
4.6.	Internet purchases and sales by activity	65
4.7.	Individuals purchasing over the Internet	67
4.8.	Share of Internet sales by type of customer	67
4.9.	Consumers' Internet purchases by product	69
4.10.	Share of Internet sales in domestic and international markets	69

4.11.	Business motivations for Internet commerce	71
4.12.	Barriers to Internet commerce faced by businesses	71
4.13.	Small and large businesses facing barriers to Internet payments	72
4.14.	Small and large businesses facing logistics barriers	72
4.15.	Small and large businesses that find it too costly to develop and maintain an e-commerce system	72
4.16.	The nature of products is not suited for Internet sales.....	73
5.1.	Ratio of students to available computers in lower secondary education.....	77
5.2.	Percentage of lower secondary students using the available computers	77
5.3.	Reasons for not using available computers in lower secondary schools.....	77
5.4.	Percentage of 15-year old students using a computer at school at least a few times a week	77
5.5.	Government Internet access and Web sites in Australia	79
5.6.	Internet and e-mail access in Canada's public and private sectors	79
5.7.	Employees per PC in Japan's central government	79
5.8.	ICT use in the Finnish government	79

BOXES

1.1.	Measuring investment in ICT equipment and software	10
1.2.	Measures of ICT consumption and investment – the OECD database on purchasing power parities	12
1.3.	Patent indicators	14
1.4.	Measuring ICT-related skills.....	16
2.1.	International comparisons of ICT activities	20
2.2.	Measuring the contribution of the ICT sector to value added.....	22
2.3.	Measuring R&D expenditure in selected ICT industries	26
2.4.	Measuring ICT sector trade.....	28
2.5.	ICT specialisation indices	32
2.6.	Activity of foreign affiliates.....	34
3.1.	Measuring the telecommunications network.....	38
3.2.	Measuring the size and growth of the Internet.....	40
3.3.	Measuring Internet access using information on subscribers.....	42
3.4.	The comparability of household- and person-based indicators of Internet access and use and the OECD model questionnaire on ICT use in households/by individuals.....	43
3.5.	Measuring ICT access and use by businesses: OECD efforts to improve international comparability	48
3.6.	Measuring “perceived” barriers to ICT access and use in business surveys.....	52
3.7.	OECD Internet access price baskets	56
4.1.	Measuring electronic commerce: OECD definitions of Internet and electronic transactions.....	61
5.1.	OECD statistics on education.....	76
5.2.	ICT in government	78
