

Name of collection: Survey on ICT Infrastructure in the Czech Educational Sector

<p>Nature of collection If possible, use the classification of collection types shown above e.g. <i>ICT use collection – business</i>. For “other” collections, provide details e.g. <i>Other ICT collection – ISPs</i>.</p>	ICT use collection – Educational sector
<p>Collection agency</p>	Institute for Information on Education (IIE); http://www.uiv.cz/
<p>General references to collection material Metadata, questionnaires etc</p>	The survey (set of basic questions) is focused on indicators related to the available ICT infrastructure (No. of PCs and PCs connected to the Internet) in Czech schools.
<p>Survey basis or vehicle E.g. Labour Force supplement, standalone survey, administrative byproduct data</p>	Set of questions (ICT module) on ICT infrastructure in Czech schools was embedded in the surveys used for the census surveys carry out by the Institute for Information on Education (a state-subsidized organization administered by the Ministry of Education, Youth and Sports of the Czech Republic for educational institutions).
<p>Frequency of collection</p>	Annually
<p>Collection history Reference dates and/or periods from the first to the latest collection</p>	2002 survey – Reference period: Year 2002 2003 survey – Reference period: Year 2003 2004 survey – Reference period: Year 2004
<p>Whether collection is mandatory or voluntary</p>	Voluntary: 2002 and 2003 survey Mandatory since the 2004 survey
<p>Scope and coverage of collection Target population in terms of size, industry, population groups etc</p>	Target population: all educational institutions ISCED level 1-5B (without universities: ISCED level 5A ad 6)
<p>Main classifications used E.g. industry, size, commodity, occupation</p>	Standard Classification of Education ISCED 97: level of education
<p>Collection methodology E.g. face-to-face, mail, Web, telephone interview</p>	Postal survey: 2002 and 2003 survey On-line completion for respondents available since the 2004 survey
<p>Reporting and Statistical units Enterprise, establishment, household, etc</p>	Official educational institutions (schools)
<p>Sample frame used</p>	School register
<p>Sampling method E.g. stratified random sampling, cluster sampling</p>	Sample survey: 2002 and 2003 survey Census: since 2004 survey
<p>Sample size For the most recent collection</p>	
<p>Response rate The responding proportion of the live in-scope population, most recent collection</p>	

<p>Methods for dealing with non-response (item and unit) Indicate whether imputations are made for non-response and a short description of methods used.</p>	<p>Not considered to be a significant issue.</p>
<p>Weighting of results Weighting method e.g. by employment, number of enterprises, revenue</p>	
<p>Relative standard errors (or coefficients of variation) on main aggregates For the most recent collection. These can be expressed as a range of values. For a given variable, the RSE or CV is equal to the ratio of the square root of the estimate of the sampling variance to the estimated value. It can be expressed as a fraction or a percentage.</p>	<p>Not available</p>
<p>Known data quality issues with this collection E.g. non-response bias, comparability problems over time, definitional issues, coverage deficiencies, timeliness of frame, high item non-response (identify topics which are particularly problematic).</p>	
<p>Output details Please list (or link to) relevant publications for this collection. You can also email relevant files to the OECD.</p>	<p>A Czech version of the main graphs and tables with main results from Survey (set of questions) on ICT Infrastructure in the Czech Educational Sector will be available free of charge on following special web page of the Czech statistical Office related to the Information Society Statistics:</p> <p>There was also prepared for last OECD WPIIS meeting a set of small brochures "Information Society in the Czech Republic" that included main statistical data from our surveys about ICT use in different sectors of our society.</p> <p><i>Note: Some basic data (tables and graphs) in English version will be available in November 2005 in the Statistical Yearbook of the Czech Republic 2005 (Chapter 13B. Information Society)</i></p>
