## INFORMATION SOCIETY IN THE CZECH REPUBLIC

### Households and individuals

Percentage of households\* equipped with selected information and communication technologies in the 4<sup>th</sup> quarter 2003 and 2004

\* Share in total number of households in the Czech Republic

Source: Czech Statistical Office, Survey on ICT usage in households & by individuals 2004

The Czech statistical office carried out the first annual survey on ICT usage in households and by individuals in the 4<sup>th</sup> quarter 2003. The survey followed up its pilot survey carried out in a limited number of respondents in 2002.

The second annual survey was carried out in the 4th quarter 2004. The survey was implemented in the framework of the CZSO's labour force sample survey (LFSS), in which separated questionnaire was used. This permitted to relate the ICT data to socio-demographic characteristics of persons in individual households. The survey was run on a sample of 10 000 individuals aged 15+ and its questionnaire comprised 57 ICT related questions, of which 13 for households and 44 for individuals. Computer Aided Personal Interview was used as a data collection method.

## Access of individuals to ICT

Percentage of individuals\* with access to mobile phone in the 4<sup>th</sup> quarter 2003 and 2004, by gender and age

\* Share in all persons aged 15+ in given group
