

**Breakout Session 2: : How can
government policy, law
enforcement and regulatory
response be improved?**

Domestic Regulatory Structure

Noticed 3 Models:

- Plenary and regulatory authority
- No plenary authority – need law enforcement participate (slower response). Rough spots b/c of structure (CERTs sharing w/ LE, who coordinated domestic response)
- Some countries do not have cyber crime legislation

Possible improvements

- Joining the Convention of Cybercrime – provides substantive and procedural mechanisms for investigating cyber crime domestically. Applies to both models.
- Increase risk to criminals
- Law enforcement as an active partner w/ stakeholder
- ISP voluntary codes of practice where regulation doesn't exist or isn't feasible
