

STAN industry list

An important feature of STAN is the use of a standard industry list for all countries to facilitate international comparisons. The list is based on ISIC Rev. 4 (see the U.N.'s classifications registry for more details); it is compatible with the NACE Rev. 2 classification used by EU member countries.

[U.N.'s classifications registry](#)

The list is designed to provide users with enough detail to focus on technology- and/or knowledge-intensive industries while taking into consideration general data availability across countries (based on recent experience). Also taken into account is (i) the list used for manufactures in the old ISIC Rev. 3 version of STAN; (ii) compatibility with related OECD data sets such as ANBERD and the OECD's Input-Output tables; and (iii) the level of ISIC Rev.4 / NACE Rev.2 activity detail currently requested in the joint OECD/Eurostat official National Accounts (SNA) questionnaire.
