

OECD Trade Facilitation Indicators – France

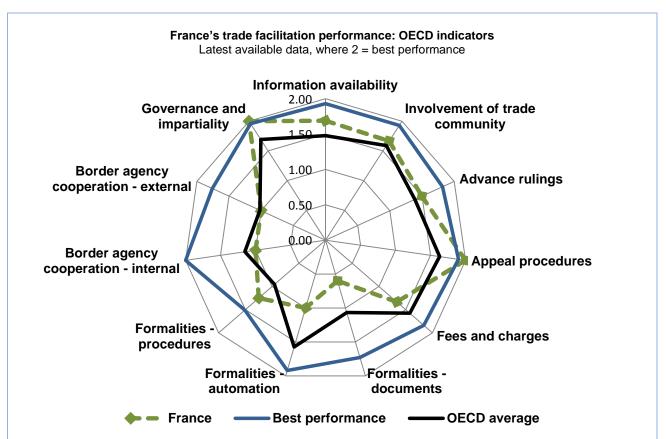

To help governments improve their border procedures, reduce trade costs, boost trade flows and reap greater benefits from international trade, OECD has developed a set of **trade facilitation indicators** that identify areas for action and enable the potential impact of reforms to be assessed.

Estimates based on the indicators provide a basis for governments to prioritise trade facilitation actions and mobilise technical assistance and capacity-building efforts for developing countries in a more targeted way.

OECD analysis shows that trade facilitation measures can benefit all countries in their role as exporters as well as importers, allowing better access to inputs for production and greater participation in the international trading system.

France's trade facilitation performance

- France performs better than the OECD average in the areas of appeal procedures, streamlining
 of procedures, governance and impartiality, and on par with the OECD average for information
 availability, involvement of trade community, advance rulings, fees and charges, and border
 agency co-operation (internal and external).
- France's performance for the **simplification and harmonisation of documents** and **automation** is below the OECD average.

OECD average includes the indicators' values for 25 OECD countries: Australia, Belgium, Canada, Czech Republic, Denmark, France, Germany, Greece, Hungary, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States. The analysis is based on country replies received by June 2010 and the set of indicators as constructed for OECD countries in "Trade Facilitation Indicators: The Impact on Trade Costs" (OECD Trade Policy Paper No. 118, 2011). "Best performance" denotes the average of the top quartile for each of the trade facilitation areas covered, across all countries within the database.

Areas for action in trade facilitation

OECD quantitative analysis for the group of developed countries, which includes France, shows that the areas with the greatest impact on increasing bilateral trade flows and reducing trade costs are: **information** availability, advance rulings, fees and charges, automation and streamlining of procedures. Taking into account the trade flow increase and costs reduction potential of the policy areas highlighted by the quantitative analysis, France would benefit from continued improvements in the following areas:

Information availability:

- Introduce a full-time hotline (24/7) for addressing enquiries to Customs.
- Introduce a user-friendly guide on appeal procedures.
- Publish examples of judicial decisions on the Customs website.
- Increase the quality and user-friendliness of the research/help function of the Customs website.

Advance rulings:

 Reduce the average issuance time for advance rulings, as it remains high when compared to the OECD average.

Fees and charges:

• Provide the necessary information on fees and charges on the Customs website.

Formalities – Automation:

• Increase the percentage of import and export procedures that can be cleared electronically.

Formalities - Procedures:

- Further reduce the average clearance time.
- Decrease the average time necessary to obtain the Authorised operator certification.
- Continue overall simplification of procedures in terms of both time and costs.

OECD Trade Facilitation Indicators

OECD has developed the following indicators to assess trade facilitation policies.

- Information Availability: Publication of trade information, including on internet; enquiry points.
- Involvement of the Trade Community: Consultations with traders.
- Advance Rulings: Prior statements by the administration to requesting traders concerning the classification, origin, valuation method, etc., applied to specific goods at the time of importation; the rules and process applied to such statements.
- Appeal Procedures: The possibility and modalities to appeal administrative decisions by border agencies.
- Fees and Charges: Disciplines on the fees and charges imposed on imports and exports.
- Formalities-Documents: Simplification of trade documents; harmonisation in accordance with international standards; acceptance of copies.
- Formalities-Automation: Electronic exchange of data; automated border procedures; use of risk management.
- Formalities-Procedures: Streamlining of border controls; single submission points for all required documentation (single windows); post-clearance audits; authorised economic operators.
- Internal Co-operation: Co-operation between various border agencies of the country; control
 delegation to Customs authorities.
- External Co-operation: Co-operation with neighbouring and third countries.
- Governance and Impartiality: Customs structures and functions; accountability; ethics policy.
