Taxing Wages - Austria

Tax on labour income

The tax wedge is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

**TAX WEDGE ON LABOUR INCOME**

\[
\frac{(\text{Personal income tax} + \text{employee and employer social security contributions (SSCs)}) - \text{Family Benefits}}{\text{Total labour costs (gross wages + employer SSCs)}}
\]

Single worker

The tax wedge for the average single worker in Austria increased by 0.2 percentage points from 47.4 in 2017 to 47.6 in 2018. Austria had the 6th highest tax wedge in the OECD for an average married worker with two children at 37.4% in 2018, which compares with the OECD average of 26.6%. The country occupied the 8th highest position in 2017.

In Austria, income tax and employer social security contributions combine to account for 71% of the total tax wedge, compared with 77% of the total OECD average tax wedge.

**Average tax wedge: average single worker, no children**

One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

Austria had the 6th highest tax wedge in the OECD for an average married worker with two children at 37.4% in 2018, which compares with the OECD average of 26.6%. The country occupied the 8th highest position in 2017.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Austria in 2018, this reduction (10.3 percentage points) was greater than the OECD average (9.5 percentage points).

**Average tax wedge: One-earner married couple at average earnings, 2 children**
Tax wedge trends between 2000 and 2018

In Austria, the tax wedge for the average single worker increased by 0.3 percentage points from 47.3% to 47.6% between 2000 and 2018. During the same period, the average tax wedge across the OECD decreased by 1.3 percentage points from 37.4% to 36.1%.

Since 2009, the tax wedge for the average single worker decreased by 0.3 percentage points in Austria. During this same period, the tax wedge for the average single worker across the OECD increased by 0.6 percentage points.

Average tax wedge over time for a single worker

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

In Austria, the average single worker faced a net average tax rate of 32.8% in 2018, compared with the OECD average of 25.5%. In other words, in Austria the take-home pay of an average single worker, after tax and benefits, was 67.2% of their gross wage, compared with the OECD average of 74.5%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Austria was reduced to 19.6% in 2018, which is the 10th highest in the OECD, and compares with 14.2% for the OECD average. This means that an average married worker with two children in Austria had a take-home pay, after tax and family benefits, of 80.4% of their gross wage compared to 85.8% for the OECD average.
