Taxing Wages - Italy

Tax on labour income

The tax wedge is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

**TAX WEDGE ON LABOUR INCOME**

\[
\text{(Personal income tax + employer and employer social security contributions (SSCs)) - Family Benefits} \\
\text{(Total labour costs (gross wages + employer SSCs))}
\]

Single worker

The tax wedge for the average single worker in Italy increased by 0.2 percentage points from 47.8 in 2018 to 48.0 in 2019. The OECD average tax wedge in 2019 was 36.0 (2018, 36.1). In 2019 Italy had the 3rd highest tax wedge among the 36 OECD member countries, occupying the same position in 2018.

In Italy, income tax and employer social security contributions combine to account for 85% of the total tax wedge, compared with 76% of the total OECD average tax wedge.

**Average tax wedge: One-earner married couple at average earnings, 2 children**

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Italy in 2019, this reduction (8.8 percentage points) was less than the OECD average (9.6 percentage points).

Italy had the highest tax wedge in the OECD for an average married worker with two children at 39.2% in 2019, which compares with the OECD average of 26.4%. The country occupied the 2nd highest position in 2018.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Italy in 2019, this reduction (8.8 percentage points) was less than the OECD average (9.6 percentage points).
Tax wedge trends between 2000 and 2019

In Italy, the tax wedge for the average single worker increased by 0.9 percentage points from 47.1% to 48.0% between 2000 and 2019. During the same period, the average tax wedge across the OECD decreased by 1.4 percentage points from 37.4% to 36.0%.

Since 2009, the tax wedge for the average single worker increased by 1.2 percentage points in Italy. During this same period, the tax wedge for the average single worker across the OECD increased by 0.5 percentage points.

Average tax wedge over time for a single worker

In Italy, the average single worker faced a net average tax rate of 31.6% in 2019, compared with the OECD average of 25.9%. In other words, in Italy the take-home pay of an average single worker, after tax and benefits, was 68.4% of their gross wage, compared with the OECD average of 74.1%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Italy was reduced to 20.0% in 2019, which is the 9th highest in the OECD, and compares with 14.6% for the OECD average. This means that an average married worker with two children in Italy had a take-home pay, after tax and family benefits, of 80.0% of their gross wage compared to 85.4% for the OECD average.

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.
