Taxing Wages - Spain

Tax on labour income

The tax wedge is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

The tax wedge for the average single worker in Spain increased by 0.1 percentage points from 39.4 in 2018 to 39.5 in 2019. The OECD average tax wedge in 2019 was 36.0 (2018, 36.1). In 2019 Spain had the 15th highest tax wedge among the 36 OECD member countries, compared with the 16th in 2018.

In Spain, income tax and employer social security contributions combine to account for 88% of the total tax wedge, compared with 76% of the total OECD average tax wedge.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Spain in 2019, this reduction (5.3 percentage points) was less than the OECD average (9.6 percentage points).

Spain had the 9th highest tax wedge in the OECD for an average married worker with two children at 34.2% in 2019, which compares with the OECD average of 26.4%. The country occupied the 10th highest position in 2018.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Spain in 2019, this reduction (5.3 percentage points) was less than the OECD average (9.6 percentage points).
Tax wedge trends between 2000 and 2019

In Spain, the tax wedge for the average single worker increased by 0.9 percentage points from 38.6% to 39.5% between 2000 and 2019. During the same period, the average tax wedge across the OECD decreased by 1.4 percentage points from 37.4% to 36.0%.

Since 2009, the tax wedge for the average single worker increased by 1.2 percentage points in Spain. During this same period, the tax wedge for the average single worker across the OECD increased by 0.5 percentage points.

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

In Spain, the average single worker faced a net average tax rate of 21.4% in 2019, compared with the OECD average of 25.9%. In other words, in Spain the take-home pay of an average single worker, after tax and benefits, was 78.6% of their gross wage, compared with the OECD average of 74.1%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Spain was reduced to 14.5% in 2019, which is the 21st lowest in the OECD, and compares with 14.6% for the OECD average. This means that an average married worker with two children in Spain had a take-home pay, after tax and family benefits, of 85.5% of their gross wage compared to 85.4% for the OECD average.

Employee net average tax rate

In Spain, the average single worker faced a net average tax rate of 39.5% in 2019, compared with the OECD average of 36.0%. In other words, an average single worker in Spain faced a net average tax rate of 39.5% in 2019, compared with the OECD average of 36.0%.
