

OECD Trade Facilitation Indicators – Turkey

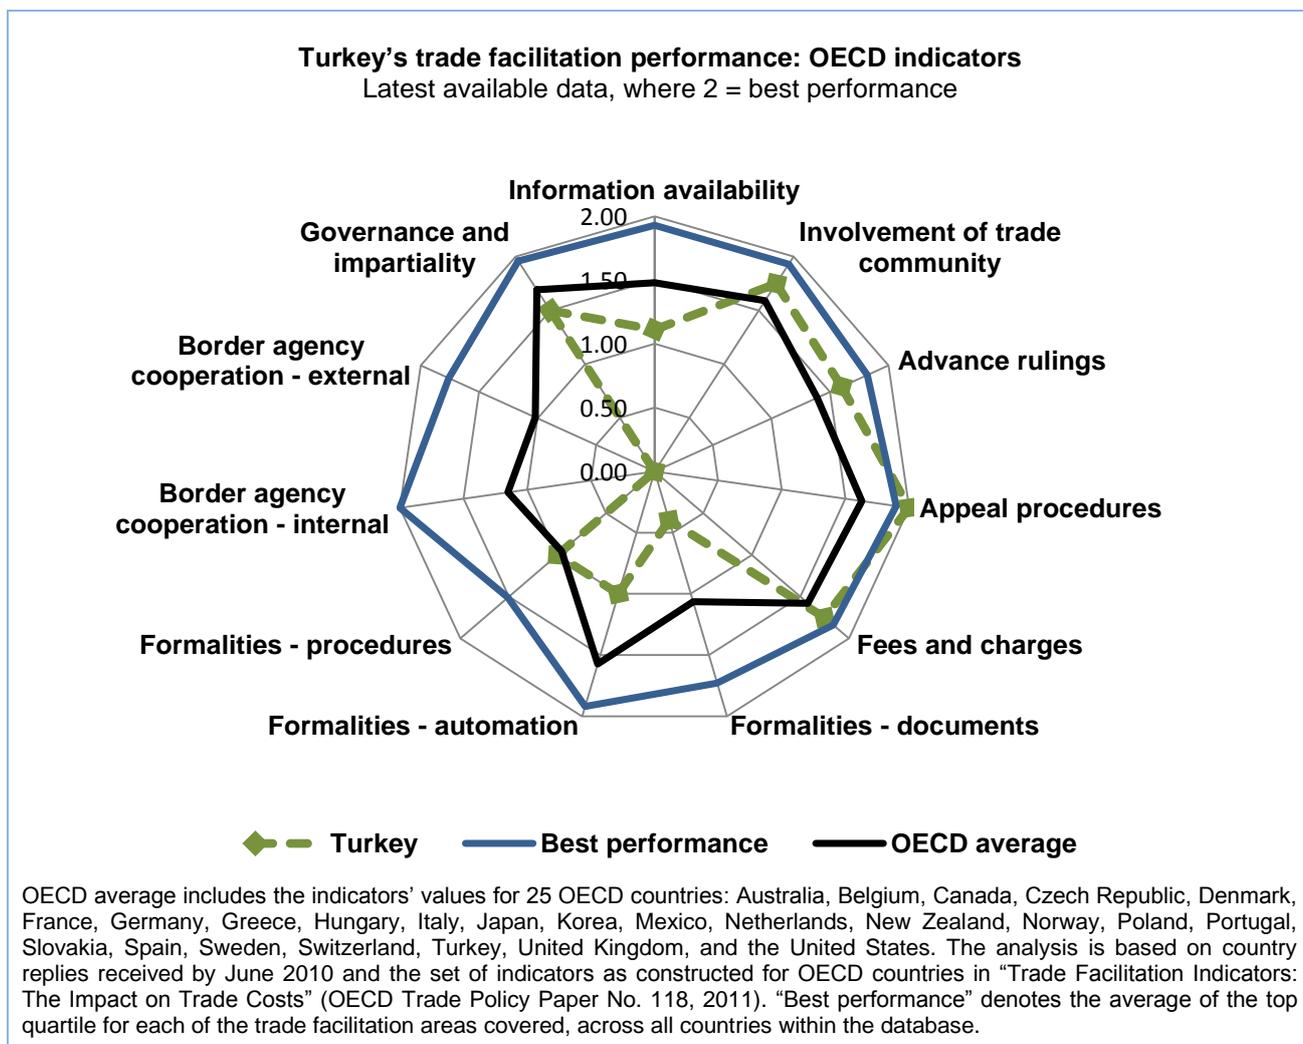

To help governments improve their border procedures, reduce trade costs, boost trade flows and reap greater benefits from international trade, OECD has developed a set of **trade facilitation indicators** that identify areas for action and enable the potential impact of reforms to be assessed.

Estimates based on the indicators provide a basis for governments to prioritise trade facilitation actions and mobilise technical assistance and capacity-building efforts for developing countries in a more targeted way.

OECD analysis shows that trade facilitation measures can benefit all countries in their role as exporters as well as importers, allowing better access to inputs for production and greater participation in the international trading system.

Turkey's trade facilitation performance

- Turkey performs significantly better than the OECD average in the area of **appeal procedures**, and on par with the OECD average for **involvement of the trade community**, **advance rulings**, and **streamlining of procedures, governance and impartiality**, according to OECD trade facilitation indicators.
- Turkey's performance for **information availability**, **simplification and harmonisation of documents**, **automation** and **border agency co-operation (internal and external)** is below the OECD average.

Areas for action in trade facilitation

OECD quantitative analysis for the group of developed countries, which includes Turkey, shows that the areas impacting the most trade flows and trade costs are: **information availability, advance rulings, fees and charges, automation and streamlining of procedures.**

Taking into account the trade flow increase and costs reduction potential of the policy areas highlighted by the quantitative analysis, Turkey would see increased trade volumes and reduced trade costs from continued improvements in the following areas:

Information availability:

- Introduce an online tool for providing feedback to Customs.
- Introduce the possibility of asking questions to the Customs authorities online.
- Allow users to download forms and documents on the Customs website.
- Publish decisions and examples of Customs classification on the Customs website.
- Provide the possibility to submit advance rulings requests online.
- Publish penalty provisions for breaches of import and export formalities.
- Publish examples of judicial decisions on the Customs website.
- Publish user manuals.
- Increase the quality and user friendliness of the research/help function of the Customs website.

Formalities – Procedures:

- Pursue efforts in view of a full implementation of a Single Window.
- Publish the average clearance time in a consistent manner and on a periodic basis, for all the major Customs offices.
- Pursue efforts for reducing clearance time.
- Continue overall simplification of procedures in terms of both time and costs.

OECD Trade Facilitation Indicators

OECD has developed the following indicators to assess trade facilitation policies.

- *Information Availability*: Publication of trade information, including on internet; enquiry points.
- *Involvement of the Trade Community*: Consultations with traders.
- *Advance Rulings*: Prior statements by the administration to requesting traders concerning the classification, origin, valuation method, etc., applied to specific goods at the time of importation; the rules and process applied to such statements.
- *Appeal Procedures*: The possibility and modalities to appeal administrative decisions by border agencies.
- *Fees and Charges*: Disciplines on the fees and charges imposed on imports and exports.
- *Formalities-Documents*: Simplification of trade documents; harmonisation in accordance with international standards; acceptance of copies.
- *Formalities-Automation*: Electronic exchange of data; automated border procedures; use of risk management.
- *Formalities-Procedures*: Streamlining of border controls; single submission points for all required documentation (single windows); post-clearance audits; authorised economic operators.
- *Internal Co-operation*: Co-operation between various border agencies of the country; control delegation to Customs authorities.
- *External Co-operation*: Co-operation with neighbouring and third countries.
- *Governance and Impartiality*: Customs structures and functions; accountability; ethics policy.
