

CANADA: ESTIMATES OF SUPPORT TO AGRICULTURE

Contact person : Helene Bombrun

Email: Helene.Bombrun@oecd.org

Tel : (33-1) 85 55 49 00

DEFINITIONS AND SOURCES

Table 1. Agricultural Support Estimates / Total Transfers contains country Total Support Estimate (TSE) and derived indicators, which cover all agricultural production, i.e. all agricultural commodities produced in the country. Definitions of basic data sets refer to the specific programmes applied in the country. For the Producer Support Estimate (PSE) and Consumer Support Estimate (CSE), each policy measure is classified according to implementation criteria, which include: the *transfer basis* of support (output, input, area/animal numbers/receipts/income, and non-commodity criteria); whether support is based on *current or non-current basis*; whether *production is required* or *not* to receive payment. Each policy measure is also assigned several “labels” indicating additional implementation criteria. "MPS commodities", which vary across countries, are those for which the market price support is explicitly calculated in Tables 4.1 – 4.17.

Table 2. Breakdown of PSE by Commodity and Other Transfers provides a breakdown of the total PSE into four categories reflecting the flexibility given to farmers regarding which commodity to produce within the various policy measures. These categories are: Single Commodity Transfers (SCT); Group Commodity Transfers (GCT); All Commodity Transfers (ACT); and Other Transfers to Producers (OTP). All data sets in Table 2 come from Tables 1 and 3.1 – 3.17 where definitions are included.

Tables 3.1 – 3.17 Producer Single Commodity Transfers contain producer SCT by commodity, which are calculated for CANADA for the following commodities: wheat, maize, barley, soybeans, rapeseed, milk, beef and veal, pig meat, poultry, eggs, oats, flaxseed, potato, lentils, drypeas, beans provided that the value of production of that commodity exceeds 1% of the total value of production. In addition, SCT for “other commodities” is also calculated (Table 3.17), which covers transfers *to single commodities other than MPS commodities*. All data sets in the calculation of producer SCT by commodity come from Tables 1 and 4.1-4.17 where definitions are included.

Tables 4.1 – 4.17 contain **Market Price Support (MPS)** and **Consumer Single Commodity Transfers** (consumer SCT) by commodity, calculated for the same set of commodities as **Tables 3.1 to 3.17**. Definitions are provided only for basic data sets from which all the other data sets in this table are derived.

Definitions of the indicators, criteria for classification of policy transfers included in support estimation, and methods of calculation are contained in [the PSE Manual](#) (*OECD's Producer Support Estimate and Related indicators of Agricultural Support: Concepts, Calculations, Interpretation and Use*).

TABLE 1: CANADA: TOTAL SUPPORT ESTIMATE

Definitions:

I. Total value of production (at farm gate)

Total agricultural production valued at farm gate prices, i.e. value (at farm gate) of all agricultural commodities produced in the country [1].

I.1. Of which share of MPS commodities (%): Share of commodities for which MPS is explicitly calculated (in Tables 4.1-4.17) in the total value of agricultural production.

II. Total value of consumption (at farm gate)

Consumption of all commodities domestically produced valued at farm gate prices, and estimated by increasing the value of consumption (at farm gate) of the MPS commodities according to their share in the total value of agricultural production $[(II.1) / (I.1) \times 100]$.

II.1. Of which MPS commodities: Sum of the value of consumption (at farm gate prices) of the MPS commodities as indicated in Tables 4.1 to 4.17.

III.1 Producer Support Estimate (PSE)

Associated with total agricultural production, i.e. for all commodities domestically produced [Sum of A to G; when negative, the amounts represent an implicit or explicit tax on producers].

A. Support based on commodity output

A.1. Market Price Support

On quantities domestically produced (excluding for on-farm feed use -- *Excess Feed Cost*) of all agricultural commodities, estimated by increasing the MPS for the MPS commodities according to their share in the total value of agricultural production $[(\sum \text{MPS for MPS commodities}) / (I.1) \times 100]$.

A.2. Payments based on output

Agricultural Stabilization Act (ASA)

[Period of implementation: 1981-91, until 2001 for milk](#)

Payment per tonne based on participating producer's eligible grain sales. Voluntary stabilisation scheme financed by the federal and provincial governments. Payment calculated as the difference between the current market price and 90% (or some other levels) of the average market price of the previous five years adjusted for changes in costs relative to the average costs in the previous five years multiplied by marketed quantities. Data measures payment to producers by commodity.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment source: Both national and sub-national governments

Attribution to commodities; Payments are included in Wheat, Maize, Barley, Soybeans, Rapeseed, Milk, Beef, Pork, Oats and Other Crops Single Commodity Transfers.

National Tripartite Stabilization Program (NTSP)

[Period of implementation: 1986-92](#)

Payment per tonne based on participating producer's eligible sales of red meats, several field crop, some horticultural products, sugar beet and honey. Voluntary stabilisation scheme financed equally by producers, by some provincial governments and by the Federal Government. Two-thirds of stabilisation payments to farmers (i.e., government share of contributions) is considered for individual commodities.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO;
Payment source: Both national and sub-national governments
Payments are included in Wheat, Maize, Barley, Soybeans, Rapeseed, Milk, Beef, Pork, Drybeans and Other Crops Single Commodity Transfers.

Apple programs

Period of implementation: 1986 and 1988

Payments to compensate apple farmers for their losses. Compensation was negotiated after losses occurred. Limited programme information available.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;
Payment source: National government
Attribution to commodities; Payments are included in Other Crops Single Commodity Transfer.

PEI Hog Transition Program

Period of implementation: 2008

Payments to compensate hog farmers for their losses.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;
Payment source: Sub-national government
Attribution to commodities; Payments are included in Pork Single Commodity Transfer.

Hog Industry Loan Loss Reserve Program (HILLRP)

Period of implementation: 2012-16

Payment per hog/weaner, as part of AgriRecovery programme. Government guaranteed loans to ease short term liquidity problems by converting short term debt into longer term loans. Maximum loan will be based on fixed rates per animal produced over the course of the last or current tax year.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;
Payment source: National government (Cost shared 60/40)
Attribution to commodities; Payments are included in Pork Single Commodity Transfer.

B. Payments based on input use

B.1. Payments based on variable input use

Advance Payment Program (APP)

Period of implementation: 1986-2006

Consolidates the former Advance Payments for Crops Act and Prairie Grain Advance Payments Act. It provides cash advances with an interest-free feature on the first CAD 50 000 to eligible producers to store eligible crops after harvest. The advance is limited to a maximum of CAD 250 000 per producer and the guarantee rate cannot exceed 50% of the expected average farm gate price for the crop year. The advance must be repaid within a time frame, which cannot exceed 12 months. Federal expenditures on the interest paid by the Government of Canada to banks is allocated to crops based on which producer marketing organization acts as the agent for the loan.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: National government
Attribution to commodities; payments are included in All Crops Group Commodity Transfers (GCT1)

Spring Credit Advance Program (SCAP)

Period of implementation: 2000-06

Federally funded programme providing interest-free loans up to CAD 50 000 per producer to assist farmers in seeding crops. It is implemented in a similar manner as APP.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Crops Group Commodity Transfers (GCT1)

Freight assistance

Period of implementation: 1986-2006

Federal government expenditure to reduce transport costs through payments to railways to improve boxcars and railroad beds (Subsidiary Agreements to Economic and Regional Agreements in Manitoba) (*Rehabilitation of box cars*); and to the Canadian Wheat Board for the purchase and/or leasing of hopper cars to transport grain (*Payments to CWB for hopper cars*).

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Crops Group Commodity Transfers (GCT1)

Feed freight assistance

Period of implementation: 1986-96

Federal government programme to reduce transport costs of feed for feed-deficit areas (livestock)

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Canadian Livestock Drought Assistance Program (Greenfeed)

Period of implementation: 1988 and 2003

Payments per acre of crop harvested as greenfeed.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Fuel tax expenditures

Period of implementation: National until 1990 and Subnational from 1985

Federal tax rebates and exemptions calculated as the rate of rebate or refund times quantity of fuel. Provincial tax concessions are also included, measuring government expenditures.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Crow Benefit Offset (Alberta)

Period of implementation: 1986-94

Provincial government expenditures on payments to offset the cost increase incurred by livestock producers as a result of the artificially high feed grain prices resulting from subsidies under the Western Grain Transportation Act (Crow Benefit)

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: Sub-national governments

Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Greencover Canada

Period of implementation: 2003-2007

Payments for the conversion of land to permanent cover.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: YES;
Payment source: National governments
Attribution to commodities; payments are included in All Crops Group Commodity Transfers (GCT1)

New Advance Payments Program (APP)

Period of implementation: From 2007

Federally funded programme providing replacing the Spring Credit Advance Program and the old Advance Payments Program. Producers of crops and livestock may borrow up to CAD 1 000 000, with the first CAD 100 000 interest free and have up to 18 months for repayment. The interest free limit increased to CAD 250 000 for 2022 programme year and to CAD 350 000 interest free for 2023 programme year 2023. Cattle and hog producers are also eligible for advances in the case of severe hardship, with a longer repayment period.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: National government
Attribution to commodities; payments are included in All commodities except supply managed Group Commodity Transfers (GCT10).

Saskatchewan Feed and Forage Program

Period of implementation: 2011 and 2012

This programme supports livestock and forage producers affected by excess moisture with a maximum payment of CAD 50 000. The purpose of this initiative is two-fold: The first component provides transportation funding assistance to Saskatchewan livestock producers who are short of pasture and/or feed due to excess moisture conditions. Producers receive a specific payment rate per metric tonne/loaded mile or per head/loaded mile for different types of feed and livestock transported from 1 June 2010 to 1 August 2011. The second component provides financial assistance to Saskatchewan producers who reseed hay, forage or pasture land that has been damaged due to excess moisture conditions. A direct payment of CAD 30 per reseeded acre will be made to eligible producers for forage land reseeded from 1 June 2010 to 1 August 2011. Payments for the conversion of land to permanent cover.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Sub-national governments
Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Provincial financing assistance

Period of implementation: From 1985

Government expenditures on interest subsidies, loan defaults, and other credit programmes to farmers.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;
Payment source: Sub-national government
Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Feed and Transportation Assistance Initiative

Period of implementation: From 2003

This initiative provides assistance to livestock producers who are experiencing extraordinary costs due to extreme moisture conditions in maintaining the feed requirement for their breeding herds. This is a group of AgriRevery programmes, including Canada-Alberta Feed Transportation Assistance Initiative, Canada-Manitoba Feed and Transportation Assistance Initiative, Canada-Saskatchewan Feed Shortfall Assistance Program (CS-FSAP), Canada-BC Feed Assistance and Pasture Restoration Initiative, Canada-Manitoba Agricultural Recovery Program (transportation and forage shortfall assistance part), Canada-Manitoba Forage Shortfall and Restoration Assistance Initiative (transportation and forage shortfall assistance part), 2012 Canada-Quebec Livestock and Forage Transportation Assistance Initiative, 2012 Canada-Ontario Forage and Livestock Transportation Assistance Initiative, and Lake Manitoba Financial Assistance Program (Part B) – Agricultural Infrastructure, Transportation and Crop/Forage Loss Component

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: YES;
Payment source: Both National and sub-national governments
Attribution to commodities; payments are included in All Crop Group Commodity Transfers (GCT1)

Canada-Manitoba Agricultural Recovery Program

[Period of implementation: 2011-13](#)

This programme provides assistance to livestock producers in managing their feed needs due to the loss of pasture as a result of flooding in 2011 in the Lake Manitoba basin flood zone. Producer payment will be the lesser of the number of eligible livestock claimed or the number of pasture acres affected. Eligible animals include: cattle, bison, horses, sheep, goats, llamas, and alpacas.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;
Payment source: Both National and sub-national governments
Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Canada-Nova Scotia Maple Sector Initiative

[Period of implementation: 2016](#)

The programme provides assistance to commercial maple producers in Nova Scotia with the extraordinary costs for repairing sap collection systems due to the unusually heavy and repeated snowfalls late into the winter of 2015. Maximum available assistance through this programme is up to CAD 5.50 per affected tap. Eligible components of the collection systems are food grade mainlines/lateral lines, fittings, connectors, manifolds, spiels, t's, and support posts and wire for mainlines. Eligible expenses will be based on invoices dated from 1 February 2015 to 30 September 2016. Payment will be made based on 90% of eligible paid invoices to a maximum of CAD 5.50 per tap.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Both National and sub-national governments
Attribution to commodities; payments are included in Other Commodity Single Commodity Transfers

Canada-Nova Scotia Fire Blight Initiative (Tier One Assistance)

[Period of implementation: 2016](#)

The programme provides assistance to commercial tree fruit growers in Nova Scotia with the extraordinary costs directly associated with managing fire blight infection and re-establishing orchards removed due to fire blight infection. The ultimate goal is to reduce the high level of fire blight infection in fruiting orchards and help in managing future spread of infection. All tree fruit producers will be eligible for a payment of up to CAD 300 per acre for chemical spray expenses over the pre-disaster industry average of CAD 300 per acre. Payments will be based on the proof of purchase.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Both National and sub-national governments
Attribution to commodities; payments are included in All Fruits and Vegetable Group Commodity Transfers (GCT6)

AgriRecovery Bovine Tuberculosis Initiatives

[Period of implementation: 2017-18](#)

This item includes 2016 Canada-Alberta Bovine Tuberculosis Assistance Initiative and 2016 Canada-Saskatchewan Bovine Tuberculosis Assistance Initiative. This initiative provides assistance to cattle producers in Alberta and Saskatchewan to cover the extraordinary costs they are facing as a result of the quarantine measures ordered by the Canadian Food Inspection Agency following the discovery of a cow with bovine Tuberculosis in 2016. These costs include feeding and water infrastructure, feed for animals, transportation, cleaning and disinfection as well as interest costs on loans due to the circumstances.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: National government
Attribution to commodities; payments are included in Beef Single Commodity Transfers

2017 Canada-BC Wildfires Recovery Initiative

Period of implementation: From 2018

Payments to cover the extraordinary input costs incurred by British Columbia agricultural producers from the adverse effects of the wildfires.

Use of labels: Production and payment limits: YES limits per farm; Variable payment rates: NO; Input constraints: NO; Payment source: National and sub-national government (cost share 60-40)

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Emergency On-Farm Support Fund

Period of implementation: 2020

This programme provides CAD 35 million to boost protections for domestic and temporary foreign workers and address COVID-19 outbreaks on farms. The programme is to assist agricultural producers with some of the incremental costs for activities that improve the health and safety of all farm workers, domestic and temporary foreign workers (TFWs) by limiting the spread of COVID-19 in agricultural operations. The programme is to provide up to CAD 100 000 per recipient in non-repayable funding for emergency COVID-19 response activities.

The support is provided based on a 50/50 cost shared ratio. The federal government is to provide half of the cost of implementing the safety measures, while the applicant provides the remaining half. The cost share is to be 60/40 for applicants where the majority of the farm (more than 50%) is owned by one or more under-represented group.

Link: <https://www.agr.gc.ca/eng/agricultural-programs-and-services/emergency-on-farm-support-fund/?id=1600991301312>

Use of labels: Production and payment limits: YES (CAD 100 000 per recipient); Variable payment rates: NO; Input constraints: NO; Payment source: National;

Attribution to commodities: payments available to all producers (All Commodity Transfers (ACT))

Mandatory Isolation Support for Foreign Workers Program

Period of implementation: From 2020

This programme is a one-time CAD 84.4-million programme to help with the impacts of the COVID-19 pandemic on food supply in Canada by assisting the farming, fish harvesting, and food production and processing sectors. The programme assists Canadian employers with some of the incremental costs associated with the mandatory 14-day isolation period imposed under the *Quarantine Act* on temporary foreign workers upon entering Canada. The MISTFWP provides a maximum non-repayable contribution amount of CAD 1 500 for each temporary foreign worker.

Link: <https://www.agr.gc.ca/eng/agricultural-programs-and-services/mandatory-isolation-support-for-temporary-foreign-workers-program/?id=1588186409721>

Use of labels: Production and payment limits: NO/YES (Contribution amount CAD 1 500 for each temporary foreign worker but there is not limit on the number of foreign worker per business); Variable payment rates: NO; Input constraints: NO; Payment source: National;

Attribution to commodities: payments available to all producers (All Commodity Transfers (ACT))

2019 Canada-British Columbia Forage Freight Assistance Initiative

Period of implementation: 2020

This program provides financial assistance in Designated Area of British Columbia to help them deal with extraordinary costs, associated with the 2019 Floods. The programme provides financial assistance based on the following payment criteria:

1) Forage assistance. It is only provided for additional purchased forage above normal forage feed purchases, and assistance payment will be calculated as follow: Additional Purchased Forage CAD 45.50 per ton as justified by receipted costs = Forage Assistance. Forage assistance is limited by Receipts Costs. It will only be paid where forage purchases can be proven by receipts.

2) Payments for Eligible Livestock Transported to Feed. When it is more economical to truck Eligible Livestock to an alternate feed source a payment may be calculated as follows: A per head payment of up to CAD 7 per cow, bull and bred heifer, plus CAD 0.07 per kilometre for extraordinary animal transportation costs. If Eligible Livestock are normally trucked to an alternate feeding location, the Eligible Applicant is only eligible to CAD 0.07 per kilometer rate for those kilometers in excess of the normal hauling distance.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);

Variable payment rates: NO (CAD 45.50 per ton of purchased forage);

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to producers of eligible livestock that are breeding ungulates (included in All Ruminants Group Commodity Transfers (GCT8))

Canada-Manitoba 2021 AgriRecovery Drought Assistance Initiative – Livestock Feed and Transportation Drought Assistance

Period of implementation: From 2021

The Livestock Feed and Transportation Drought Assistance is a part of the Canada-Manitoba 2021 AgriRecovery Drought Assistance Initiative. The breakdown of expenditure between the components was estimated.

This programme provides financial assistance to livestock producers to purchase and test feed for livestock to maintain their breeding herds, including transporting purchased feed from distant locations. Eligible animals include breeding head of beef and dairy cattle, horses raised for pregnant mare urine (PMU), sheep, goats, bison and elk. Eligible producers owned or leased the eligible animals as of June 1, 2021 and continued to own or lease them to March 15, 2022. Producers may be eligible to apply for assistance to: 1) buy and test feed for eligible livestock; 2) transport purchased feed from distant locations.

Payments for feed assistance: Payments will be equal to 75% of the purchased cost of feed and feed testing that exceeds the producer share to a maximum per head payment. The maximum payment is CAD 250 per head for beef and dairy cattle, bison, elk and horses (PMU only) and CAD50 per head for sheep and goats. On a per head basis, a producer share will be applied CAD 50 per head for beef and dairy cattle, bison, elk, horses (PMU only) and CAD 10 per head for sheep and goats. Purchases must be supported by invoices and proof of payment indicating the type of feed purchased, the number of tonnes purchased, the purchase price, the name and contact information of the seller, the date purchased, and type of feed tested and test completed, if applicable.

Payments for feed transportation: Feed transportation assistance is provided for the movement of eligible hay, straw, greenfeed, stover, silage, grain and concentrates to eligible breeding animals to address feed shortages due to drought conditions. Transportation costs for eligible feed purchased and transported between June 1, 2021 and March 15, 2022, for a minimum distance of 40 kilometres up to a maximum one-way distance of 600 kilometres. Payments for hay, straw, greenfeed, stover and silage will be based on following rates: CAD 0.16 per tonne kilometre for the first 100 kilometres of a haul; CAD 0.10 per tonne kilometre for the remainder of a haul for up to an additional 500 kilometres; Payments for grain and concentrates, and high moisture feeds are based on a rate of CAD 0.05 per tonne kilometre up to 600 kilometres.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);

Variable payment rates: NO (payments are equal to 75% of the purchased cost of feed; or equal to CAD 0.16 or CAD0.10 per tonne kilometer for transportation);

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to producers of beef and dairy cattle, horses raised for pregnant mare urine (PMU), sheep, goats, bison and elk (included in All Ruminants Group Commodity Transfers (GCT8))

Canada-Ontario 2021 Dry Weather AgriRecovery Initiative - The Northwestern Livestock Assistance Initiative: Emergency Water and Temporary Fencing Assistance

[Period of implementation: From 2021](#)

The Northwestern Livestock Assistance Initiative - Emergency Water and Temporary Fencing Assistance is a part of the Canada-Ontario 2021 Dry Weather AgriRecovery Initiative. The breakdown of expenditure between the components was estimated.

This programme provides emergency support to livestock farmers in northwestern Ontario who have incurred extraordinary costs with sourcing emergency water or installing temporary fencing due to drought conditions. Projects eligible for funding are: 1) The installation of temporary fencing to allow for safe grazing of livestock on alternative premises; and 2) The delivery of water to livestock in Northwestern Ontario. Funding will be distributed on a cost-shared basis where the Ministry will pay for 70% of eligible costs and the recipient will be required to pay the remaining 30% of eligible costs. Each participant is eligible to receive up to a maximum of up to CAD 10 000 in total.

Use of labels:

Production and payment limits: YES (CAD 10 000 per recipient);

Variable payment rates: NO (70% of eligible costs);

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available livestock producers (included in All Livestock Group Commodity Transfers (GCT7))

Agricultural Climate Solutions – On-Farm Climate Action Fund

[Period of implementation: From 2021](#)

This initiative is to help farmers tackle climate change. The objective of the On-Farm Climate Action Fund is to support farmers in adopting beneficial management practices that store carbon and reduce greenhouse gases. The Fund will provide CAD 200 million from 2021 until 2024 for the adoption of beneficial management practices in three areas to store carbon and reduce greenhouse gas emissions directly on farms. The Fund will address barriers to wider adoption, including up-front implementation costs, lack of risk protection, minimal or delayed returns on investment and limited availability of information and agronomic services. Activities eligible for funding include: 1) Nitrogen management: agronomic services to develop farm-specific nutrient management plans, equipment modifications for fertilizer application in fields, and soil sampling and analysis. 2) Cover cropping: payment-per-acre to cover adoption or related costs such as seeds and equipment. 3) Rotational grazing: agronomic services to develop grazing management plans, interior cross fencing, water system infrastructure, legume and forage seeds. Other activities to support BMP adoption, like outreach, education, and training, will also be considered.

Use of labels:

Production and payment limits: YES;

Variable payment rates: NO;

Input constraints: NO;

Payment source: National government;

Attribution to commodities: payments available to all producers (All Commodity Transfers (ACT))

B.2. Payments based on fixed capital formation

Long term adjustment in horticulture (FSAM I and II) and Horti-plus (federal contribution):

[Period of implementation: 1991-97](#)

Government expenditures on payments to small investment projects

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Crops Group Commodity Transfers (GCT1)

Economic Recovery Assistance (Ice Storm):

[Period of implementation: 1997-99](#)

Mainly payments to compensate damages to inputs and equipment.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

FILA/FIMCLA

[Period of implementation: 1986-2008](#)

Payments to lenders on defaulted loans (net of user fees) under the loan guarantee programme for intermediate term credit.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Interest rebates

[Period of implementation: 1986](#)

Federal government expenditure on interest concessions to farmers under the Farm Loans Interest Rebates Act.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Provincial financing assistance

[Period of implementation: From 1985](#)

Government expenditures on interest subsidies, loan defaults, and other credit programmes to farmers.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;

Payment source: Sub-national government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Property tax exemptions

[Period of implementation: From 1985](#)

Provincial government expenditures in the form of tax exemptions on property.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: NO;

Payment source: Sub-national government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

National Farm Stewardship Programme (NFSP)

[Period of implementation: 2004-08](#)

Producers who have a completed and reviewed environmental farm plan or equivalent agri-environmental plan are eligible to apply for financial and technical assistance through the National Farm Stewardship Program and Greencover Canada to implement beneficial management practices identified in their environmental farm plan. Through provincially delivered programmes, approved applicants are eligible for a maximum of CAD 50 000 in federal funding through the NFSP, which has been raised from the original program maximum of CAD 30 000. Federal cost-shares remain at either 30% or 50% of eligible project costs, depending on the BMP category being applied for. The existing federal incentive funding limits will

continue to apply to each BMP category. A national list of BMP categories and associated practices has been developed to identify those BMPs eligible for assistance under the programme. Only BMPs that meet established criteria for the programme are included on the national list. Provincial-specific lists identify which BMPs from the national list are eligible for financial and technical assistance within each province. Please refer to provincial programme information for a listing of specific BMPs eligible in your province.

Use of labels: Production and payment limits: No; Variable payment rates: NO; Input constraints: YES;
Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Canadian Agricultural Loans Act

Period of implementation: From 2009

The CALA programme is a financial loan guarantee programme governed by Canadian Agricultural Loans Act that increases the availability of loans to farmers and agricultural cooperatives. Under the CALA the Government of Canada guarantees 95% of a loss associated with a registered loan issued by a designated financial institution. Farmers use these loans to establish, improve, and develop farms; while agricultural co-operatives also access loans to process, distribute, or market the products of farming. Expenditures reported under CALA are payments to lenders on loan defaults. Eligible commodities are defined in the Act or prescribed in regulation. The Act has a broad list of commodities under the definition of farming with the authority to prescribe additional crops or animals. There is a CAD 500 000 aggregate loan limit for any one farmer-borrower and a CAD 3 billion loan limit for each agricultural co-operative. The CALA programme builds on and replaces the previous Farm Improvement and Marketing Co-operative Loans Act (FIMCLA) programme.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Ontario Tornado Assistance Initiative - AgriRecovery

Period of implementation: 2010

This programme assists the pork industry to deal with immediate short-term cash-flow pressures. It was designed to increase access to credit for eligible producers currently producing hogs in Canada and who could provide a business plan which demonstrated that the business was or could be viable and had a reasonable prospect of repaying the loan. The loan period is, where possible, a 10 year period and shall not exceed a 15 year period. Expenditures reported under the HILLRP are payments to lenders on loan defaults.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Both National and sub-national governments.

Attribution to commodities; payments are included in All Crops Group Commodity Transfers (GCT1).

Manure Management Financial Assistance Program

Period of implementation: 2011-15

This programme assists the pork industry to deal with immediate short-term cash-flow pressures. It was designed to increase access to credit for eligible producers currently producing hogs in Canada and who could provide a business plan which demonstrated that the business was or could be viable and had a reasonable prospect of repaying the loan. The loan period is, where possible, a 10 year period and shall not exceed a 15 year period. Expenditures reported under the HILLRP are payments to lenders on loan defaults. For each loan registered, AAFC deposited a portion of the value of the loan in a reserve fund account with the lender. If a producer defaults on their HILLRP loan before 30 April 2025, a lender may draw a certain percentage from its reserve fund account, depending on when the default occurs.

Loan amounts approved by financial institutions were based on the producer's business plan and the size of operation from recent production and sales records, with the maximum loan amounts based on the following rates per animal: CAD 85 per market hog; CAD 30 per weaner; and CAD 25 per iso weaner

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;
Payment source: National government
Attribution to commodities; payments are included in Pork Single Commodity Transfers.

Beekeepers Financial Assistance Program

[Period of implementation: 2014-16](#)

This is a provincial programme that provides one-time assistance to beekeepers that lost over 40% of their colonies between 1 January 2014 and 31 October 2014. To be eligible for financial assistance of CAD 105 per hive, beekeepers must own a minimum of 10 registered bee hives in 2014. Payments will be issued in two installments: the first payment in early summer for winter losses and a second payment in December for any additional losses.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Sub-national government
Attribution to commodities; payments are included in Other Commodity Single Commodity Transfers

Marketing and Vineyard Improvement Program (MVIP)

[Period of implementation: From 2015](#)

This programme supports wine grape growers by providing funding for eligible vineyard improvements to adapt to ongoing and emerging vineyard challenges, and enable growers to produce quality grapes to meet the growing demands of Ontario wine manufacturers. The programme reimburses up to 35% of eligible vineyard improvement costs including wine grape vine removal, land preparation, vine trellis system, consultation with viticulture expert, improved viticulture practices, reducing cold injury, improved irrigation, pest management, and improved weather sensing. The majority of improvement expenses are reported under this area. This portion of the programme supports capital investment for vineyard improvements including, but not limited to, wine grape vine removal, land preparation, improved irrigation and weather sensing, and vine trellis systems.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Sub-national government
Attribution to commodities; payments are included in Other Commodity Single Commodity Transfers

Canada-Nova Scotia Fire Blight Initiative (Tier Two Assistance)

[Period of implementation: 2016](#)

This programme reimbursed up to CAD 400 for cost of the industry initiated inspection of fire blight. An additional payment of CAD 400 per acre was made for moderate to severely infected blocks as indicated on their inspection reports. Moreover, eligible participants with nursery trees on their inspection report will receive CAD 8 for each nursery tree that was removed, minus a 3% deductible on the total number of trees removed; Eligible participants with trees 10 years of age (including top grafted trees) or younger with moderate to severe infection as indicated on their inspection report will receive CAD 8 for each tree that was removed for orchard reestablishment, minus a 3% deductible on the total number of trees removed. Any trees that would normally be scheduled for destruction as part of the grower's production cycle or operational plan are not eligible for assistance

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;
Payment source: Both national and sub-national government
Attribution to commodities; payments are included in All Fruits and Vegetable Group Commodity Transfers (GCT6)

Dairy Farm Investment Program

[Period of implementation: From 2017](#)

This is a five-year programme providing assistance to dairy farmers to improve their productivity by upgrading their equipment to help them to adapt to the anticipated impacts from the Canada-European Union Comprehensive Economic and Trade Agreement (CETA). This programme support activities and equipment

that can improve the productivity of milk production in Canada. Eligible equipment includes robotic milking system, automatic feeding systems, herd management tools, cow comfort equipment, etc. Eligible activities include assessment of the dairy farms on how to improve efficiencies and productivity, installation of the eligible equipment and training to operate this new equipment.

Payment source: National government
Attribution to commodities; payments are included in Milk Single Commodity Transfers

Agricultural Climate Solutions – On-Farm Climate Action Fund

Period of implementation: From 2021

This initiative is to help farmers tackle climate change. The objective of the On-Farm Climate Action Fund is to support farmers in adopting beneficial management practices that store carbon and reduce greenhouse gases. The Fund will provide CAD 200 million from 2021 until 2024 for the adoption of beneficial management practices in three areas to store carbon and reduce greenhouse gas emissions directly on farms. The Fund will address barriers to wider adoption, including up-front implementation costs, lack of risk protection, minimal or delayed returns on investment and limited availability of information and agronomic services. Activities eligible for funding include: 1) Nitrogen management: agronomic services to develop farm-specific nutrient management plans, equipment modifications for fertilizer application in fields, and soil sampling and analysis. 2) Cover cropping: payment-per-acre to cover adoption or related costs such as seeds and equipment. 3) Rotational grazing: agronomic services to develop grazing management plans, interior cross fencing, water system infrastructure, legume and forage seeds. Other activities to support BMP adoption, like outreach, education, and training, will also be considered.

Use of labels:

Production and payment limits: YES;

Variable payment rates: NO;

Input constraints: YES;

Payment source: National government;

Attribution to commodities: payments available to all producers (All Commodity Transfers (ACT))

Egg-on Farm Investment Program (CPTPP)

Period of implementation: From 2021

This programme aims to help supply-managed poultry and egg producers adapt to market changes resulting from the implementation of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) and has been extended due to the Canada-United States-Mexico Agreement (CUSMA). The programme support on-farm investments in: increasing efficiency or productivity; improving on-farm food safety and biosecurity; improving environmental sustainability; and responding to consumer preferences (improving animal welfare, adopting alternative housing systems, transitioning to organic production, etc.). PEFIP will provide non-repayable contributions of almost CAD 647 million over 10 years. The funding allocations originally included: CAD 347.3 million for chicken producers; CAD 76.9 million for turkey producers; CAD 134 million for egg producers; and CAD 88.6 million for broiler hatching egg producers. Applicants have the flexibility to seek funding for eligible activities that started on or after March 19, 2019. The project activities must be completed by March 31, 2031. Eligible activities include, but are not limited to: hiring of external expertise to assess how the poultry and/or egg farm enterprise can improve efficiencies and productivity; construction of new infrastructure or expansion of infrastructure; building retrofits; purchase of equipment and/or fits-up of current facilities related to the installation and operation of equipment; conversion of poultry housing system; shipping, transportation and installation of eligible assets/materials (for example, construction materials, equipment, commercial off-the-shelf software and IT infrastructure); training related to other eligible project activities. Eligible project costs will normally be shared between AAFC and the applicant as follows: a maximum of 70% AAFC and a minimum of 30% applicant. PEFIP funding will be allocated by sector (chicken, turkey, eggs, and hatching eggs) and by province according to the provincial shares of the national quota/production as identified by each sector's

national marketing organization. An applicant's maximum funding amount, or share of the program budget, will be determined based on their share of provincial quota/production as identified by their respective provincial marketing board. Producers' share of quota/production will be determined based on quota holdings on January 1, 2021.

Use of labels:

Production and payment limits: YES (the applicants' maximum funding amount is based on his share of provincial quota/production);

Variable payment rates: NO (70% of eligible costs);

Input constraints: NO;

Payment source: National government;

Attribution to commodities: payments available to poultry and egg producers (chicken, turkey, turkey breeder, egg and broiler hatching eggs) (included in Eggs Single Commodity Transfer)

Agricultural Clean Technology - Adoption Stream

Period of implementation: From 2018

Agricultural Clean Technology (ACT) Programme aims to create an enabling environment for the development and adoption of clean technology that will help drive the changes required to achieve a low-carbon economy and promote sustainable growth in Canada's agriculture and agri-food sector. This programme offers support under two streams: 1) Research and Innovation Stream; and 2) Adoption Stream. The breakdown of expenditure between the streams was estimated.

The Adaptation Stream supports pre-market innovation, including research, development, demonstration and commercialization activities. It will support the purchase and installation of commercially available clean technologies and processes with a priority given to those that show evidence of reducing greenhouse gas (GHG) emissions, and other environmental co-benefits. Eligible activities under the Adoption Stream are of the following nature and type: green energy and energy efficiency; precision agriculture; and bioeconomy solutions. Eligible applicants are: for-profit organizations, including farm businesses and agri-food processors; not-for-profit organizations, including co-operatives; individuals, sole proprietors; and indigenous groups. Contributions under the Adoption Stream will be non-repayable. The maximum amount payable to a recipient will generally not exceed CAD 2 million per project. The maximum amount payable to a recipient with multiple projects will generally not exceed CAD 5 million. Eligible project costs will normally be shared as follows: Adoption Stream (For-profit) with a maximum contribution of 50% from the programme and a minimum contribution of 50% from the applicant; and Adoption Stream (Not-for-profit) with a maximum contribution of 75% from the programme and a minimum contribution of 25% from the applicant.

Use of labels:

Production and payment limits: YES;

Variable payment rates: NO;

Input constraints: YES;

Payment source: National government;

Attribution to commodities: payments available to all producers (All Commodity Transfers (ACT))

B.3. Payments based on on-farm services

Extension

Period of implementation: From 1986

Federal and provincial expenditures for the activities related to the provision of information, training and services directly to farmers.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: Both national and subnational governments

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Pest and disease control

Period of implementation: From 1986

Federal and provincial expenditures delivered directly to farmers and related to animal health, veterinary services and disease control.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: Both national and subnational governments

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Farm Debt Review Process

Period of implementation: 1987-97

Budgetary expenditure on government contributions to cover the arrangements between producers and the Farm Credit Corporation pursuant to the Farm Debt Review Act.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Marketing and Vineyard Improvement Program (MVIP)

Period of implementation: From 2015

Budgetary expenditure on government contributions to cover the arrangements between producers and the Farm Credit Corporation pursuant to the Farm Debt Review Act.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment source: National government

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

Canada-British Columbia Bovine Tuberculosis Assistance Initiative:

Period of implementation: 2008, 2010, 2011

This programme helps livestock producers in British Columbia with the extraordinary costs associated with the quarantine placed on their herds as ordered by the Canadian Food Inspection Agency (CFIA) following the discovery of a cow with Bovine Tuberculosis in British Columbia. Funding is provided to producers for: Cleaning and disinfection costs; Costs incurred for the replacement of corrals and other structures that were required to be cleaned and disinfected; Payment for the quarantine of livestock, calculated as Programme Payment = (Total number of eligible livestock) (number of days normal marketing of the animals was delayed) X (Per day value based on animal type) X (ninety percent); and Costs incurred for additional veterinary expenses a payment will be made on a per head basis.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO;

Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Canada-Manitoba Avian Influenza Assistance Initiative (Agri-Recovery Initiatives)

Period of implementation: 2010

This programme helps poultry producers with the extraordinary costs associated with the destruction of their poultry flock or quarantine of their hatchery that was ordered by the Canadian Food Inspection Agency following an avian influenza outbreak in Manitoba in 2010. Funding is provided to producers for:

- Turkey breeder operations whose flock was ordered destroyed to a maximum of CAD 97 936 including cleaning and disinfection of the animal premises and related costs; extraordinary costs for hydro, propane and fuel (gasoline and diesel); the costs of replacing the top surface of barn floor; cleaning supplies (including personal protection/ biosecurity supplies) rodent control products; and water and winter washing damage
- Quarantined turkey hatchery, to a maximum of CAD 120 938 including cleaning and disinfection of the hatchery and related costs; custom hatching of poults in Minnesota including mileage, export

papers, boxes and custom hatching fees; egg storage depots; and costs for the destruction of eggs (mileage and land fill costs).

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in Poultry Single Commodity Transfers

Canada-British Columbia Avian Influenza Assistance Initiative (Agri-Recovery Initiatives)

Period of implementation: 2015

This programme helps the poultry sector in British Columbia with the Extraordinary Expenses associated with the quarantine placed on flocks as ordered by the Canadian Food Inspection Agency (CFIA) following the discovery of avian influenza in British Columbia in December 2014. Funding is provided to producers for:

- cleaning and disinfection and composting costs incurred for turkeys, boiler breeders, and table egg birds;
- repair or replacement costs of equipment or production facilities damaged as a direct result of cleaning and disinfection activities; and
- extraordinary expenses for the destruction or disposal of eggs, chicks or birds that could not be marketed.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in Poultry Single Commodity Transfers

Agricultural Climate Solutions – On-Farm Climate Action Fund

Period of implementation: From 2021

This initiative is to help farmers tackle climate change. The objective of the On-Farm Climate Action Fund is to support farmers in adopting beneficial management practices that store carbon and reduce greenhouse gases. The Fund will provide CAD 200 million from 2021 until 2024 for the adoption of beneficial management practices in three areas to store carbon and reduce greenhouse gas emissions directly on farms. The Fund will address barriers to wider adoption, including up-front implementation costs, lack of risk protection, minimal or delayed returns on investment and limited availability of information and agronomic services. Activities eligible for funding include: 1) Nitrogen management: agronomic services to develop farm-specific nutrient management plans, equipment modifications for fertilizer application in fields, and soil sampling and analysis. 2) Cover cropping: payment-per-acre to cover adoption or related costs such as seeds and equipment. 3) Rotational grazing: agronomic services to develop grazing management plans, interior cross fencing, water system infrastructure, legume and forage seeds. C. Payments based on current area planted/animal numbers/receipts/income – production required

Crop Insurance payments

Period of implementation: From before 1986

Government contribution to a voluntary crop insurance scheme which covers between 70 and 90% of average yield (depending on the crop and province) over a 10 to 15 year-period. Farmers finance half of the scheme, but over the years government contributions have amounted to 56% of indemnities paid. Government

contribution for a crop in one year is calculated as 56% of indemnities for that crop in that year. Federal/Provincial cost share is assumed to be 50/50 until 2006, 60/40 thereafter.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in wheat, maize, barley, rapeseed, soybeans, oats, flaxseed, potato, lentils, drypeas, beans, milk and other commodities Single Commodity Transfers.

Special Canadian Grain Program (SCGP I & II)

Period of implementation: 1986-87

Government expenditures on payments to producers based on a formula which took into account seeded acreage, representative regional yields and a rate of assistance for each commodity proportional to its price decline.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government

Attribution to commodities; payments are included in wheat, maize, barley, rapeseed, soybeans, oats, and other commodities Single Commodity Transfers.

Plum Pox Virus Compensation Regulations

Period of implementation: 2001-10

Compensation is provided to growers who received a notice from the CFIA during the period from 2000 to 2003 for the treatment and disposal of trees and for the replanting of replacement trees. Programme was extended for seven years after 2003.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: National government

Attribution to commodities; payments are included in other commodities Single Commodity Transfers.

Feeder Calf Set-Aside Program:

Period of implementation: 2001-10

This programme provides cow-calf producers and backgrounders with the option of holding a portion of their 2004 eligible calf inventory from slaughter until 1 January 2006, in exchange for a per head payment of up to CAD 200. This per head payment is intended to cover the additional costs incurred in holding these animals from slaughter until 1 January 2006. Beef cow owners must enroll owned calves on his/her farm equivalent to 30% of the beef cows that calved (or will calve) on the farm in 2004.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in beef Single Commodity Transfers (SCT).

Feeder Calf Set-Aside Program:

Period of implementation: 2004-06

This programme provides cow-calf producers and backgrounders with the option of holding a portion of their 2004 eligible calf inventory from slaughter until 1 January 2006, in exchange for a per head payment of up to CAD 200. This per head payment is intended to cover the additional costs incurred in holding these animals from slaughter until 1 January 2006. Beef cow owners must enroll owned calves on his/her farm equivalent to 30% of the beef cows that calved (or will calve) on the farm in 2004.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Both national and sub-national governments

Attribution to commodities; payments are included in beef Single Commodity Transfers (SCT).

Assurance-stabilisation du revenu agricole (ASRA Québec)

Period of implementation: From 1986

Payment covering the difference between a "stabilised" price and the market price to participating producers, multiplied by production or sales. Government contributions to programme (i.e, two times producer contributions) are counted.

Use of labels: Production and payment limits: NO until 2010 YES since 2011; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area/ Animal number; Payment source: Sub-national government

Attribution to commodities; payments are included in wheat, maize, barley, rapeseed, soybeans, oats, potato, beef, pork and other commodities Single Commodity Transfers.

Market Revenue Program

Period of implementation: 1996-2004

Succeeded GRIP in Ontario only. No contribution from farmers. Crop-specific payments to farmers when market prices of eligible grains and oilseed crops are lower than support levels (85% of an average price over time).

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government

Attribution to commodities; payments are included in wheat, maize, barley, rapeseed, soybeans, drybeans and other commodities Single Commodity Transfers.

Potato Programs (PVYN, etc):

Period of implementation: 1992-93

Compensation payments based on area. The area for which payments applied was limited.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: National government

Attribution to commodities; payments are included in potato Single Commodity Transfers.

Western Grain Stabilisation Act (WGSA)

Period of implementation: 1986-90

Payment based on producer's eligible grain sales. Voluntary income stabilisation programme for Western grain farmers funded by both the Federal government (67%) and grain producers. Payment made when net cash flow (cash receipts minus cash variable costs) from eligible grain sales was less than the average net cash flow over the previous five years.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government

Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Provincial Stabilisation Programmes

Period of implementation: 1986-2007

Contributions or payments by provincial governments (other than Quebec) to stabilisation programmes (which did not involve the federal government).

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Receipts; Payment source: Sub-national government

Attribution to commodities; payments are included in All commodities except supply managed Group Commodity Transfers (GCT10).

Gross Revenue Insurance Plan (GRIP):

Period of implementation: 1991-95

Payment to crop producers based on the shortfall between market revenue and the target revenue for crops. Target revenue per acre for an individual crop is based on historical yields, a 15-year moving average of price and the level of crop insurance chosen by the producer. The plan is financed by farmers (one-third) and

government contributions (two-thirds). The government contribution to total payments, i.e. 67% of payments for each crop is considered.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government
Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Wildlife Crop Damage Compensation (waterfowl, big game)

Period of implementation: From 1986

Federal contribution to the Waterfowl Crop Damage Compensation Program and Big Game Damage Compensation Program. Both programmes compensate producers for part of yield losses to crops caused by animals. Like crop insurance, benefits are paid on an acreage basis. For the waterfowl program, allocation of the benefit by crop is based on administrative data.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government
Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Farm Support and Adjustment Measures II (FSAM I)

Period of implementation: 1991

Government expenditures on payments made on the basis of grain seeded acreage of crops other than horticulture and expenditures on "Long term adjustment in horticulture" FSAM I and FSAM II" (apple and potato programmes, grape and tobacco adjustment programmes) [which are included under B.1. Payments based on use of variable inputs] [FSAM I expenditures on crops other than horticulture are included in GRIP].

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government
Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Special Income Assistance Program (SIAP):

Period of implementation: 1990

Government expenditures on payments to producers provided under a flat rate per seeded acre, allocated to crops in proportion to seeded acreage.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: National government
Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Canadian Crop Drought Assistance Program (CCDAP):

Period of implementation: 1986-88

Government expenditures on payments to producers for production losses due to drought. Payments were provided per acre of crops planted.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government
Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Livestock Drought Assistance Program (LDAP):

Period of implementation: 1986

Government expenditures on payments to producers for production losses due to drought. Payments were provided per head of livestock. The Greenfeed program operated to make more feed available in the affected region, thereby reducing the price of feed is classified under B.1. Greenfeed is assumed to benefit only beef producers.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: National government
Attribution to commodities; payments are included in All livestock Group Commodity Transfers (GCT7).

BSE Recovery Program

[Period of implementation: 2003-04](#)

Federal-Provincial programme to compensate producers for losses resulting from price declines for cattle subsequent to discovery of a case of BSE in Canada. Producers who sell cattle who were already on feed before May 20 2003 are eligible. Payment is calculated by multiplying the total net live weight sold by an adjusted Market Loss Differential based on the US cash spot Market and current Canadian Exchange Rates.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO;

Payment eligibility: Receipts; Payment source: Both national and sub-national government

Attribution to commodities; payments are included in All livestock Group Commodity Transfers (GCT7).

Net Income Stabilization Account (NISA)

[Period of implementation: 1994-2003](#)

Federal and provincial expenditures on the voluntary farm income safety-net scheme, under which farmers set aside money in individual accounts, matched by government contributions. Farmers can make withdrawals from the account when the gross margin of the farm (gross revenue less cash costs) for eligible commodities (all commodities except supply-managed commodities) falls below the average gross margin of the preceding five years or when their taxable household income falls below a fixed level.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO;

Payment eligibility: Receipts; Payment source: Both national and sub-national government

Attribution to commodities; payments are included in All commodities but supply managed Group Commodity Transfers (GCT10).

Canadian Agricultural Income Stabilisation Programme (CAIS)—Stabilisation portion

[Period of implementation: 2003-06](#)

Successor programme to NISA. Programme insures a reference margin calculated (using tax data) for a five-year reference period. Producers choose a level of coverage between 70 and 92% of this margin and must keep an appropriate amount of funds in a CAIS programme account to cover co-payment of this coverage. In years where the producer's programme year margin falls below the reference margin coverage percentage, producers may withdraw money from the CAIS programme account to make up the shortfall, with government contributions covering between 50 and 80% of the withdrawal amount. Programme reforms in 2005 replaced the programme account and deposit requirements with a fee for coverage. Participants now receive a payment when triggered by their programme year margin according to level of coverage chosen.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO;

Payment eligibility: Income; Payment source: Both national and sub-national government

Attribution to commodities; payments are included in All commodities but supply managed Group Commodity Transfers (GCT10).

Agricultural Income Disaster Assistance Programme (AIDA) and Canadian Farm Income Program (CFIP)

[Period of implementation: 1998-2002](#)

Federal and provincial government expenditures on payments to farmers made when whole farm gross margin falls below 70% of the average of the previous three years' gross margins.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO;

Payment eligibility: Income; Payment source: Both national and sub-national government

Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Farm Income Disaster Program in Alberta

[Period of implementation: 1995-2002](#)

Government expenditures on payments to farmers made when current year programme margin falls below 70% of the average of the previous three years' programme margins. Programme margin is the difference between overall farm revenue and expenses.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government
Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Prince Edward Island Agricultural Disaster Programme (PEI-ADP)

[Period of implementation: 1995-97](#)

Government expenditures on payments to farmers made when current year programme margin falls below 70% of the average of the previous three years' programme margins. Programme margin is the difference between overall farm revenue and expenses. In 1996 and 1997 tax years, it is counted as a separate programme. Starting from tax year 1998, it is the provincial component of AIDA/CFIP and counted under that programme.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government
Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Whole Farm Disaster Pilot Program in British Columbia

[Period of implementation: 1997](#)

See PEI-ADIP

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government
Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Canadian Agricultural Income Stabilisation Programme (CAIS)—Disaster portion

[Period of implementation: 2003-06](#)

See CAIS-stabilisation portion

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government
Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Ontario Risk Management Programme

[Period of implementation: From 2007](#)

Expenditures

Use of labels: Production and payment limits: YES; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government
Attribution to commodities; payments are included in wheat, maize, barley, soybean, rapeseed, beans, flaxseed, beef, pork and other commodities Single Commodity Transfers

AgriInvest

[Period of implementation: From 2007](#)

Producers can contribute 1.5% of net sales to a special bank account, and the amount is matched by a government payment into the same account. The money can be withdrawn to be used for on-farm investments.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government
Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Agri-Stability

[Period of implementation: From 2007](#)

AgriStability pays the producer when their margin declines below their reference margin—nothing for the first 15% decline in margin, 70% of the difference for a current margin between 85% and 70% of the reference margin, and 80% of the difference for current margin less than 70% of reference margin.

AgriStability, together with AgriInvest, replaces the coverage previously provided under the Canadian Agricultural Income Stabilization (CAIS) programme. Farmers receive an AgriStability payment when their current year programme margin falls below 85% of their reference margin. AgriStability is based on margins. Payments are triggered under AgriStability when a producer's programme year margin falls below 85% of their average reference margin. Margin calculations are the same as for CAIS.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government Attribution to commodities; payments are included in All Commodity Transfers (ACT).

Agri-Québec

Period of implementation: From 2010

This programme is offered to all agricultural and aquaculture businesses in Québec but does not cover commodities under supply management. With this programme, agricultural producers can contribute 3% of the adjusted net sales (ANS) to a special account with the government matching producers' contribution. There is a limit of CAD 1.5 million imposed on the ANS.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: YES; Payment eligibility: Receipts; Payment source: Sub-national government Attribution to commodities; payments are included in All commodities except for supply managed Group Commodity Transfers (GCT10).

Manitoba Forage Shortfall and Restoration Assistance Initiative (CM-FSRAI)

Period of implementation: 2012-14

This initiative provides financial assistance to livestock and forage producers who are experiencing extraordinary costs due to excess moisture conditions in 2011. The programme consists of three components. The third component is:

- Damaged forage land assistance to help cover a portion of the additional costs incurred to restore producers' water-damaged forage land. Producers are eligible for programme payments of up to CAD 30 per acre (cost-shared) CAD 20 per acre (provincial) for forage restoration of acres destroyed and reseeded to tame forage.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area ;Payment source: Both National and sub-national governments Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Canada-Manitoba Agricultural Recovery Program (Provincial portion)

Period of implementation: 2011-12

This initiative provides financial support to Manitoba producers affected by extended periods of excess moisture in 2011.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both National and sub-national governments Attribution to commodities; payments are included in All Livestock Group Commodity Transfers (GCT7)

Canada-Nova Scotia Strawberry Assistance Initiative - AgriRecovery

Period of implementation: 2014-15

This initiative provides assistance to commercial strawberry producers in Nova Scotia with the extraordinary costs associated with removing and replacing strawberry plants due to a virus. Eligible producers must have been in production before 2009 and destroyed acreage during the 2013 programme year or destroy before 2014 growing season. Payments to producers are based on 70% of eligible extraordinary costs to re-establish strawberry acres and are calculated based on the two following components:

- 1) A **base payment per acre** which is representative of incremental cost of labour and materials:
 - Matted Row Production: CAD 1 450 per acre;
 - Plastic Mulch System: CAD 3 100 per acre;

- Nursery Systems CAD 3 100 per acre.

2) An **additional payment** for eligible replacement strawberry plants no greater than:

- CAD 105 per 1000 plants planted on eligible acres;
- CAD 210 per 1000 plugs planted on eligible acres.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area ;Payment source: Both National and sub-national governments .

Attribution to commodities; payments are included in other commodities Single Commodity Transfers

2017 Canada-Quebec Hail Assistance Initiative

Period of implementation: 2018

2017 Initiative Canada-Québec d'Aide aux entreprises agricoles affectées par des épisodes exceptionnels de grêle en 2017: This initiative provides assistance to Québec agricultural producers to cover part of the additional expenses incurred to maintain or resume productions activities. The financial assistance takes the form of a lump sump payment equal to percentage of the eligible value or the equivalent of the eligible value of the crops affected by the hail. This percentage is based on the average level of damage intensity attributed per crop for the area in which the affected areas are produced or associated.

Use of labels: Production and payment limits: YES per farm; Variable payment rates: YES based on an applied rate according to the percentage or yield losses; Input constraints: NO; Payment eligibility: Income; Payment source: Both national and sub-national government (Cost shared 60/40).

Attribution to commodities; payments are included in All Crop Group Commodity Transfers (GCT1).

2018 Nova Scotia Frost Loss Program

Period of implementation: 2018

This programme provide financial assistance to Nova Scotia farmers affected by crop production and financial losses due to frost/freeze in June 2018. Financial assistance is based on 50% of the value of production loss, calculated using the applicants yield based in the previous three crop years, subtracting the 2018 crop yield and multiplying the difference at a predetermined price for the commodity, minus and adjustment for AgriInsurance for insurable commodities. The AgriInsurance adjustment is the calculated benefit at a 70% coverage level less the producer premium cost for the coverage. Producers not enrolled in AgriInsurance, where a plan was available for their respective commodities, will still be adjusted at the 70% coverage level.

Use of labels: Production and payment limits: No; Variable payment rates: Yes based on losses; Input constraints: NO; Payment eligibility: Area; Payment source: Provincial.

Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Agri-Recovery Cattle Set-Aside Program - COVID-19

Period of implementation: 2020

1. *2020 Canada-Ontario COVID-19 Beef Emergency Feed Maintenance Initiative:* This programme helps to cover increased costs of feeding and setting aside market-ready cattle due to COVID-19 related processing delays. Due to the backlog that is resulting from a reduction in processing capacity at livestock processing plants, beef farmers can apply to keep their feedlot cattle or cull cows on farm for an additional 63 days. Intake for the initiative is assessed on a weekly basis.

The first intake set-aside period was on 28 December 2020. Applicants may not enroll more than 500 Surplus Animals per intake period. Producers receive CAD 2.00 per day per surplus animal where the Surplus Animal is Feedlot Cattle and CAD 1.60 per day per surplus animal where Surplus Animal is Cull Cow.

Total funding for this initiative is limited to CAD 5 million.

Link: <https://www.agricorp.com/en-ca/News/2020/Pages/AgriRecovery-CanadaOntarioCOVID19BeefEmergencyFeedInitiative.aspx>

2. *2020 Canada-Alberta Fed Cattle Feed Cost Offset Initiative:* This programme has two components: 1) the Fed Cattle Feed Assistance, a retroactive payment for cattle set aside from 1 May to 30 June 2020 and

second, 2) a Bid Set-Aside process for cattle set aside starting 29 June 2020. It provides compensation for the extraordinary feed costs incurred by Eligible Participants due to the reduced slaughter capacity and backlog resulting from the COVID-19 global pandemic; and support the management of market ready cattle through the slaughtering process.

Fed Cattle Feed Assistance Component of Program: Eligible Participants receive a payment for the number of days that Eligible Animals were fed. Up to CAD 2.00 X Total number of Eligible Animals X number of days Eligible Animals were fed prior to being marketed, up to a maximum of 35 days. Eligible Participants can apply for compensation of their feed costs incurred between 1 May 2020 and 30 June 2020 for Eligible Animals.

Fed Cattle Feed Assistance Component of Program: Eligible Participants receive a payment for the number of days that Eligible Animals were fed. Up to CAD 2.00 X Total number of Eligible Animals X number of days Eligible Animals were fed prior to being marketed, up to a maximum of 35 days. Eligible Participants can apply for compensation of their feed costs incurred between 1 May 2020 and 30 June 2020 for Eligible Animals.

Total funding for this initiative is limited to CAD 43 million.

Link: <https://afsc.ca/income-stabilization/agrirecovery/>

3. *2020 Canada-Saskatchewan Livestock Set Aside Program*: This programme provides compensation for the extraordinary feed costs incurred by Eligible Producers due to the reduced slaughter capacity and backlog resulting from the COVID-19 global pandemic; and support the management of market ready cattle and bison through the slaughtering process. description

Eligible Producers are paid CAD 2.00 per day and per set aside Eligible Animals for no less than 30 days or more than 63 days. This is equivalent to a maximum payment per head of CAD 126. Payments are available to beef and bison producers. The final release of all Eligible Animals from Set Aside is to occur on or before 31 March 2021.

Total funding for this initiative is limited to CAD 12.5 million.

4. *2020 Canada-Manitoba Finished Cattle Feed Assistance Program*: This programme provides assistance to Manitoba cattle producers who experienced extraordinary feeding costs and an inability to market finished cattle due to Alberta slaughter plant closures and disruptions caused by COVID-19.

Eligible applicants will receive CAD 1.20 per Eligible Animal for each day in the Extraordinary Feeding Period to a maximum of 63 days. The maximum payment is CAD 75.60 per head. Cattle must have been slaughtered between 29 April 2020 and 31 December 2020. The Extraordinary Feeding Period for these cattle must have been greater than 14 days. The Extraordinary Feeding period begins on the later of 15 April 2020, or when cattle reached the minimum weight for eligibility. The Extraordinary Feeding Period ends on 31 December 2020, or the slaughter date of the cattle, whichever is earlier.

Total funding for this initiative is limited to CAD 2.5 million.

Link: <https://www.gov.mb.ca/agriculture/financial-assistance/cattle-feed-assistance.html>

Use of labels: Production and payment limits: Yes (As part of the AgriRecovery Framework, a payment limit of CAD 3 million per participant is applied to all AgriRecovery Initiatives. Total funding for each initiative is limited); Variable payment rates: No; Input constraints: No; Payment eligibility: Animal number; Payment source: Both national and sub-national government (Cost shared 60/40).

Attribution to commodities; payments are included in beef Single Commodity Transfers (SCT).

2020 Canada-Ontario COVID-19 Hog Maintenance Feed Initiative

Period of implementation: 2020

This program provides financial assistance to hog farmers to cover the increased costs of feeding market-ready hogs while they had to keep them on the farm because of the temporary processing plant closures due to COVID-19 outbreaks.

The Initiative operates based on two time periods. The time period is based on pre and post 1 October 2020. The manner in which Payments are calculated depends on whether the claim arises before 1 October 2020 or after 1 October 2020. Payments for the time period prior to 1 October 2020, are calculated using an estimated average of Surplus Animals in Ontario for each week that there was a COVID-19 event and are

based on industry data. Payments after the initiative came into effect (after 1 October 2020) is CAD 0.95 per animal and per day to a maximum of CAD 28.50 per Surplus Animal. Ninety-five cents (CAD 0.95) are paid for each Surplus Animal enrolled in the Initiative for each day each Surplus Animal is enrolled within the Enrollment Period of the Initiative, minus a 7-day deductible, to a maximum of CAD 28.50 per Surplus Animal. Enrollment Number Requirements After Initiative Came Into Effect.

Use of labels: Production and payment limits: Yes (As part of the AgriRecovery Framework, a payment limit of CAD 3 million per participant is applied to all AgriRecovery Initiatives Total funding for this initiative is limited to CAD 5 million); Variable payment rates: Yes (prior to 1 October 2020) / No (after 1 October 2020: CAD 0.95 per animal and per day); Input constraints: No; Payment eligibility: Animal number; Payment source: Both national and sub-national government (Cost shared 60/40). Attribution to commodities; payments are included in Pork meet Single Commodity Transfers (SCT).

2020 Canada-New Brunswick Hog Recovery Initiative

Period of implementation: 2022

This initiative provides financial assistance to assist hog producers with extraordinary costs of feed, destruction and disposal costs related to COVID-19 disruptions or plant closures at processing facilities. Payment is available for surplus hog impacted by COVID-19 events between 15 March 2020 and 12 March 2021. Eligibility for feed costs will be calculated by comparing average dressed weight per shipment to the previous average dressed weight per shipment (increase in average dressed weight) and translated into three payment levels per pig: CAD 2.28 for an increase of 5 kg to 10 kg; CAD 6.27 for an increase of 10 kg to 15 kg; and CAD 10.83 for an increase of more than 15 kg. A payment of CAD 8.63 per surplus hog for costs to humanely slaughter and dispose of surplus hogs on farm between 15 March 2020 and 12 March 2021.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);
Variable payment rates: NO (payments per hog);
Input constraints: NO;
Payment source: National and sub-national governments;
Attribution to commodities: payments available to hog producers (included in Pork Meat Single Commodity Transfer)

2020 Canada-Prince Edward Island Hog Recovery Initiative

Period of implementation: 2021

This initiative provides financial assistance to assist hog producers with extraordinary costs of feed, destruction and disposal costs related to COVID-19 disruptions or plant closures at processing facilities. Payment is available for surplus hog impacted by COVID-19 events between 15 March 2020 and 12 March 2021. Eligibility for feed costs will be calculated by comparing average dressed weight per shipment to the previous average dressed weight per shipment (increase in average dressed weight) and translated into three payment levels per pig: CAD 3.80 for an increase of 5 kg to 10 kg; CAD 10.45 for an increase of 10 kg to 15 kg; and CAD 18.05 for an increase of more than 15 kg. A payment of CAD 14.38 per surplus hog for costs to humanely slaughter and dispose of surplus hogs on farm between 15 March 2020 and 12 March 2021.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);
Variable payment rates: NO (payments per hog);
Input constraints: NO;
Payment source: National and sub-national governments;
Attribution to commodities: payments available to hog producers (included in Pork Meat Single Commodity Transfer)

2021 Canada-Alberta Hog Recovery Initiative

Period of implementation: 2021

This programme provides compensation for the extraordinary feed, destruction and disposal costs due to the reduced slaughter capacity at hog processing plant as a result of the COVID-19 global pandemic. The programme was announced on 5 March 2021. To be eligible for a compensation, producers must own market-ready hogs intended for processing between 8 February and 31 March 2021, which were held back from shipping due to reduce processing capacity at the Red Deer Olymel hog slaughter facilities. There are two components to the programme: the maintenance feed costs and the destruction and disposal cost. Under the hog maintenance feed component, producers received a payment of CAD 0.95 per day and per eligible animal for a maximum of 23 days or CAD 21.85 per animal. Under the hog destruction and disposal component, producers received a payment of up to 90% of the extraordinary costs for the humane destruction and disposal of animals incurred between 8 February 2021 and March 2021. Eligible costs per eligible animal include: transportation to processor (up to CAD 5.00); Humane slaughter at processor or other acceptable methods (up to CAD 50.00); transportation to land fill (up to CAD 15.00); and landfill tipping fee (up to CAD 15.00).

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to hog producers (included in Pork Meat Single Commodity Transfer)

2021 Canada-Alberta Livestock Feed Assistance Initiative

Period of implementation: 2021-22

This programme provides compensation for the extraordinary costs due to the drought and the extreme high temperatures of 2021; and supports the management and maintenance of Alberta's breeding animals.

To be eligible for a compensation, producers must be responsible for feeding and primary care of the eligible animals located in Alberta. Eligible animals must be breeding female animals and be grazing animals, which include but not limited to: horses, cows/bison, elk/yak/muskox, deer/llamas, sheeps/goats/alpacas. The total maximum payment available for feed purchase is based on the category of eligible animals and the animal conversion. The cattle/bison maximum payment is CAD 200 per eligible animal.

Use of labels:

Production and payment limits: YES;

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to ruminant producers (included in Ruminants Group Commodity Transfers (GCT8))

L'Initiative Canada-Québec d'aide aux éleveurs pour atténuer l'impact de la COVID-19 en 2020-2021

Period of implementation: 2021

This initiative aims to support livestock intended for human consumption and who have incurred exceptional costs: for keeping surplus animals on farms; and to carry out the humane slaughter of surplus animals if required. The financial assistance offered takes the form of a lump sum paid per animal corresponding to 90% of the exceptional daily costs incurred for the maintenance of farmed animals intended for slaughter for human consumption and the costs inherent in the operations necessary for humane slaughter and the disposal of surplus animals on farms, where applicable. Part 1: Compensation for keeping eligible animals on farm. The calculation of the compensation for keeping eligible animals in breeding takes into account the category of animals, the number and weight of eligible animals, the maximum number of days kept in breeding and

the maximum amount per day. Part 2: Compensation for the costs inherent in the human slaughter of surplus eligible animals on farms. The maximum costs compensated to the participant for operations related to humanitarian slaughter, including transportation costs, slaughter and disposal of animal carcasses, are established according to the categories of animals and the operations carried out. However, culled animals should not end up on the market for human consumption.

Use of labels:

Production and payment limits: YES;

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to producers of feeder pigs, slaughter steers (cattle), milk-fed calves, red deer, elk, bison and wild boar (included in Ruminants Group Commodity Transfers (GCT8))

2018 Canada-Prince Edward Island Fall Harvest Recovery Initiative

Period of implementation: 2020

This programme provides financial assistance to help agricultural producers of vegetables recover from the extraordinary costs associated with excessive moisture and cold temperatures during the 2018 fall harvest. It provides financial assistance to producers for extraordinary harvest recovery costs, additional field work expenses and storage/recovery costs. Eligible crop means beets, broccoli, brussel sprouts, cabbage, carrots, cauliflower, parsnips, potatoes, rutabagas, and onions. The programme provides financial assistance to an Eligible Applicant based on the following payment criteria: 1) harvest recovery expenses: a payment of up to CAD 85 per harvested acre of an eligible crop(s) for the extraordinary costs related to harvest activities; 2) extraordinary fieldwork expenses: a payment of up to CAD 35 per seeded acre of an eligible crop(s) for the extraordinary costs associated with the fieldwork necessary to destroy acres of unharvested eligible crop(s) and to address the compaction and trenching in harvested acres; 3) grading and storage recovery: a payment of up to CAD 65 per harvested acre of an eligible crop(s) for the extraordinary costs associated with grading, packing, washing and drying the fall crop as well as additional washing, disinfection, and disposal costs associated with storage. Broccoli, cauliflower and brussel sprouts are not eligible for the grading and storage recovery payment.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to producers of beets, broccoli, brussel sprouts, cabbage, carrots, cauliflower, parsnips, potatoes, rutabagas, and onions (included in Vegetables Group Commodity Transfers (GCT12))

2021 Canada-Saskatchewan Drought Initiative

Period of implementation: 2021-22

This programme provides compensation to producers for extraordinary expenses related to maintenance of breeding livestock and transportation costs due to drought conditions in 2021. This initiative consists of two payments totaling up to CAD 200 per head for eligible female breeding cattle, with adjustments made on animal unit equivalents for other livestock. Initial payment provides immediate funding support to livestock producers, CAD 100 per eligible breeding female of animal unit equivalent owned inventory as of 1 August 2021. The second payment provides up to CAD 100 per eligible breeding female or animal unit equivalent owned inventory as of 31 December 2021. Eligible livestock are Canadian-owned female beef and dairy cattle, bison, elk, sheep or goats that are bred or intended to be bred. This initiative covers 70% of extraordinary cost per head. Extraordinary costs may include: feed, transportation of water, transportation of

livestock, labour, temporary fencing, alternative grazing arrangements, the deficiency of the value of pasture production or winter feed production, or any other costs related to the 2021 drought.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives: this limit is split equally between payment 1 and payment 2);

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to producers of beef and dairy cattle, bison, elk, sheep and goats (included in Ruminants Group Commodity Transfers (GCT8))

Canada-Manitoba 2021 AgriRecovery Drought Assistance Initiative - Livestock Transportation Drought Assistance & Herd Management Drought Assistance

[Period of implementation: 2021-22](#)

The Livestock Transportation Drought Assistance and Herd Management Drought Assistance are parts of the Canada-Manitoba 2021 AgriRecovery Drought Assistance Initiative. The breakdown of expenditure between the components was estimated.

Livestock Transportation Drought Assistance: This programme provides financial assistance to producers to offset freight expenses associated with moving their breeding herd to an alternate feeding location due to shortages of feed. Eligible animal include breeding of beef cattle, sheep, and goats. Eligible producers owned or leased the eligible animals as of 1 June 2021 and continued to own or lease them to 15 March 2022. Livestock transportation assistance is provided for eligible activities and expenses incurred from 1 August 2021 to 30 June 2022: transportation costs associated with moving eligible breeding female animals and breeding males to an alternate feeding location to meet their winter feeding requirement; cost for eligible animals, transported between 1 August 2021 and 30 June 2022, for a minimum distance of 40 kilometres up to a maximum one-way distance of 1 000 km. Payments will be based on the number of head and kilometres as indicated below: breeding beef cattle at CAD 0.08 per head per loaded kilometre; breeding sheep and goats at CAD 0.03 per head per loaded kilometre.

Herd Management Drought Assistance: This program provides financial assistance to livestock producers in offsetting the cost of replacing breeding animals when culling is above normal due to shortage of feed due to drought. Producers may be eligible to apply for assistance to: purchase replacement breeding females; retain replacement females from their existing herd or flock. Eligible animals includes breeding females of beef cattle, bison, elk, sheep and goats. The breeding females must be sold during the 16 March 2021 to 15 March 2022 time period and contribute to a decline in the applicant's inventory of eligible breeding females on 16 March 2022. The payments are made for breeding females purchased or retained. Payments per head for each animal type are as follow: beef cattle, bison, elk: CAD 250; sheep and goats: CAD 50. Producers are paid these rates based on the increase in the breeding female inventory between 16 March 2022 and 31 January 2023.

Use of labels:

Production and payment limits: YES (as part of the AgriRecovery Framework, a payment limit of CAD 3 000 per participant is applied to all AgriRecovery Initiatives);

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to to producers of ruminants (included in Ruminants Group Commodity Transfers (GCT8))

Canada-Ontario 2021 Dry Weather AgriRecovery Initiative – Transported Feed

[Period of implementation: 2021-22](#)

The Ontario Transported Feed AgriRecovery Initiative a part of the Canada-Ontario 2021 Dry Weather AgriRecovery Initiative. The breakdown of expenditure between the components was estimated.

This programme provides immediate emergency support/relief to Producers in Northwestern Ontario who have incurred extraordinary costs to source feed or transport Livestock arising from drought since June of 2021. Each participant is eligible to receive up to a maximum of CAD 600 000 in total support under this initiative. There is also a maximum payment per animal that a producer can receive: 1) CAD 220.00 for cows; 2) CAD 23.02 for sheep and goats. The following assumptions were applied to calculate the transported feed assistance for cows: 1) cows consume 43 pounds of hay per day; 2) Transported hay is CAD 0.14 per pound. The transported feed assistance payment calculation will be the difference between feed need and feed available, where Total feed need is the number of head times 43 lbs per day times 365 days for cows; and Feed available is the sum of hay grown, calculated by total hay and pasture times the dry weather yield, and hay obtained from the beef farmers of Ontario.

Use of labels:

Production and payment limits: YES (CAD 600 000 per recipient);

Variable payment rates: NO (CAD 0.14 per pound of transported hay);

Input constraints: NO;

Payment source: National and sub-national;

Attribution to commodities: payments available to producers of cattle, bison, elk, equine, alpacas and llamas, deer, sheep and goats livestock producers (included in Ruminants Group Commodity Transfers (GCT8))

Canada-British 2021 Columbia Flood Recovery Program for Food Security

[Period of implementation: 2022](#)

The programme provided a one-time funding for uninsurable infrastructure repair and cleanup costs and return to production expenses to producers who were affected by flooding and landslides from November 2021.

Use of labels:

Production and payment limits: YES;

Variable payment rates: NO;

Input constraints: NO;

Payment source: National and sub-national governments;

Attribution to commodities: payments available to breeding livestock producers (included in Livestock Group Commodity Transfers (GCT7))

D. Payments based on non-current area planted/animal numbers/receipts/income – production required

Canadian Farm Families Options Program (CFOP)

[Period of implementation: 2006-07](#)

The Canadian Farm Families Options Program is a federal programme open to farm families or individual farmers who have a total income of less than CAD 25 000 or less than CAD 15 000 respectively, in all provinces and territories. To be eligible farmers must have gross farm incomes of at least CAD 50 000 and must have filed farm income with the Canada Revenue Agency (CRA) for 2005 and for 2006. The Options payment will bring the total income of a farm family up to a maximum of CAD 25 000 or CAD 15 000 for individual farmers each year. For example, if a farm family has a total income of CAD 17 000, the calculated benefit is CAD 8 000. Participants must commit to completing one of the following within two years of their application to Options: A Farm Business Assessment offered by the Canadian Farm Business Advisory Services (CFBAS) or an equivalent, or an Individual Learning Plan and skills training through the Canadian Agricultural Skills Service (CASS) or an equivalent

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO;

Payment eligibility: Income; Payment source: National government.

Attribution to commodities; payments are included in All Commodity Transfers (ACT)

AgriInvest Kickstart

Period of implementation: 2007-08

A one-time payment to producers to put a starting amount of money into AgriInvest accounts (See AgriInvest).

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.

Attribution to commodities; payments are included in All commodities except for supply managed Group Commodity Transfers (GCT10).

Manitoba Forage Restoration Assistance Program and Livestock Feed Assistance Programs (MFRFAP) - AgriRecovery

Period of implementation: 2009

Through this programme Manitoba forage producers were paid a maximum of CAD 40 per acre for the re-establishment of forage crops, forage seed fields and pasture affected by flooding in 2008.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national government.

Attribution to commodities; payments are included in All livestock Group Commodity Transfers (GCT7).

Manitoba Livestock Feed Assistance Program

Period of implementation: 2009

This programme provided assistance to Manitoba livestock producers in designated areas who were short of over-winter feed due to flooding and excess moisture conditions in the fall of 2008. Under the Manitoba Livestock Feed Assistance Program, eligible producers receive a direct per head payment based upon their breeding herd inventories of cattle, other ruminants and horses owned as of 31 December 2008.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Both national and sub-national government.

Attribution to commodities; payments are included in All livestock Group Commodity Transfers (GCT7).

Pasture Recovery Initiative (PRI) – AgriRecovery

Period of implementation: 2010

This cost-shared initiative provides CAD 50 per head for breeding cattle and other breeding livestock in order to help producers buy feed in 2010 while damaged pastures recover from drought in 2008 and 2009. Payments are based on eligible breeding animals traditionally pastured in designated areas as of 1 January 2010. Eligible animals include: cattle, horses, bison, elk, deer, llamas, sheep, goats, and alpacas. Eligible producers are those who were in production during 2009, owned and were responsible for the costs of production as of 1 January 2010.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Both national and sub-national government.

Attribution to commodities; payments are included in All livestock Group Commodity Transfers (GCT7).

Prairie Excess Moisture Initiative (PEMI) – AgriRecovery

Period of implementation: 2010

This cost-shared programme provides assistance to producers affected by excess moisture and flooding in spring 2010. The programme gave a maximum CAD 30 per acre assistance to producers to adopt measures to protect, rehabilitate and manage damaged crop land affected by flooding in 2010. Eligible acres included either acres unseeded by 20 June 2010 or the seeded crop lost by flood by 8 July 2010, for a minimum 25 affected acres. Eligible crops include all except forage crops.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national government.

Attribution to commodities; payments are included in All crops group commodity transfers (GCT1).

Canada-Manitoba Agricultural Recovery Program – AgriRecovery

Period of implementation: 2011-12

This is a cost-shared programme that assists producers with a fixed payment of CAD 15 per acre to help with the cost of restoring the land after two years of flooding and excess moisture in 2008 and 2009. The number of eligible acres is based on the acres reported by the producer on their 2009 Seeded Acreage Report as too wet to seed. Eligible producers were in production in 2009 and claim a minimum of 5 acres in the affected area.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national government.

Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Canada-Manitoba Agricultural Recovery Program – AgriRecovery

Period of implementation: 2011-12

This is a cost-shared programme that assists producers with a fixed payment of CAD 15 per acre to help with the cost of restoring the land after two years of flooding and excess moisture in 2008 and 2009. The number of eligible acres is based on the acres reported by the producer on their 2009 Seeded Acreage Report as too wet to seed. Eligible producers were in production in 2009 and claim a minimum of 5 acres in the affected area.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national government.

Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

Lake Manitoba Financial Assistance Program (Part B)

Period of implementation: 2012-15

This portion of the programme component is for lost agricultural production including crop land/crop loss, forage restoration, and unseeded land. Compensation to producers is based on a fixed payment amount for crop acres that were impacted by excess moisture:

- CAD 30 per acre payment for crop acres left unseeded or were flooded out
- CAD 50 per acre for forage restoration.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government.

Attribution to commodities; payments are included in All Commodity Transfers (ACT).

2014 Portage Diversion Fail-Safe Compensation Program

Period of implementation: 2014-15

This programme provides financial assistance to Manitoba Agricultural producers in the Designated Area affected by flooding in 2014.

Programme payments will be calculated as the total of the following:

- Production loss payment = the difference between Probable Yield and the Harvested Yield, multiplied by the Compensation Value then multiplied by the Eligible Acres for each applicable crop;
- Forage Establishment payment = the Compensation Value multiplied by the Eligible Acres of Forage Establishment;
- Unseeded Land payment = the Compensation Value multiplied by the Eligible Acres of Unseeded Land;
- Forage Restoration payment = the Compensation Value multiplied by the Eligible Acres of Forage Restoration ; and
- Debris Clean-up payment = the Compensation Value multiplied by the Eligible Acres for Debris Clean-up.

Compensation Value means for crops, the AgriInsurance dollar value for a crop; in the case of Forage Restoration, Forage Establishment or Unseeded Land is CAD 100.00 per acre; and in the case of Debris Clean-up is CAD 25.00 per acre.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government.

Attribution to commodities; payments are included in All crops Group Commodity Transfers (GCT1).

AgriRecovery Initiatives - 2009 Alberta H1N1 Assistance Program

Period of implementation: 2010

This programme assists the Alberta hog producers who were affected by the discovery of the H1N1 influenza virus in their herd in April 2009. The programme will provide financial compensation to assist with extraordinary expenses and losses directly and indirectly related to the discovery of H1N1 including: Purchased feed that was unutilized and subsequently destroyed after the discovery H1N1; Purchase costs of breeding animals due to the “ordered destruction” of the H1N1 in their herd; and Costs associated with the cleaning and disinfecting of the hog facilities after the destruction of the herd.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Sub-national government.

Attribution to commodities; payments are included in Pork Single Commodity Transfers.

AgriRecovery Initiatives - Canada-Alberta Salmonella Enteritidis Initiative

Period of implementation: 2012

This programme assists the Alberta hog producers who were affected by the discovery of the H1N1 influenza virus in their herd in April 2009. The programme will provide financial compensation to assist with extraordinary expenses and losses directly and indirectly related to the discovery of H1N1 including: Purchased feed that was unutilized and subsequently destroyed after the discovery H1N1; Purchase costs of breeding animals due to the “ordered destruction” of the H1N1 in their herd; and Costs associated with the cleaning and disinfecting of the hog facilities after the destruction of the herd.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Sub-national government.

Attribution to commodities; payments are included in Poultry Single Commodity Transfers.

Ontario Edible Horticulture Support Program

Period of implementation: 2018

Payments are based on allowable net sales (ANS) of edible horticulture. The tier and associated rate that will be used for the initial calculation of a Participant's Programme Payment for both the 2018 and 2019 Programme Years will be as follows:

- Two and one half percent (2.5%) of ANS up to one million dollars (CAD 1 million).
- Two percent (2%) of ANS between one million dollars and one cent (CAD 1 000 000.01) to two million five hundred thousand dollars (CAD 2.5 million).
- One and one half percent (1.5%) of ANS between two million five hundred thousand dollars and one cent (CAD 2 500 000.01) to five million dollars (CAD 5 million).
- One percent (1.0%) for ANS between five million dollars and one cent (CAD 5 000 000.01) and ten million dollars (CAD 10 million).
- Any remaining ANS greater than ten million dollars (CAD 10 million) is not eligible for a Programme Payment calculation.

Use of labels: Production and payment limits: YES; Variable payment rates: YES; Input constraints: NO; Payment eligibility: sales; Payment source: Sub-national government.

Attribution to commodities; payments are included in All commodities except supply managed Group Commodity Transfers (GCT10).

Support measure for Grain Corn Producers to mitigate the impact of the propane price increase in Québec in 2019 (Soutien aux producteurs de maïs-grain pour atténuer impact hausse du prix du propane)

Period of implementation: 2020

This program reduces the impact of grain corn producers of higher propane prices used for drying grain corn that was harvested from November 2019, i.e. time of the outbreak of the strike.

Financial assistance takes the form of a lump sum amount set at CAD 23.50 per hectare for eligible grain corn acreage up to CAD 50 000 per agricultural business for the duration of the measure.

Link: <https://www.fadq.qc.ca/documents/soutien-aux-producteurs-de-mais-grain-pour-attenuer-limpact-de-la-hausse-du-prix-du-propane-au-quebec-en-2019/>

Use of labels: Production and payment limits: YES (A payment limit of CAD 50 000 per agricultural business); Variable payment rates: NO (Fixed payment of CAD 23.50 per hectare); Input constraints: NO; Payment eligibility: area (Payments based on hectare); Payment source: Sub-national government (Provincial program only).

Attribution to commodities; payments are included in Maiz Single Commodity Transfers.

E. Payments based on non-current area planted/animal numbers/ receipts/income – production not required

Western Grain Transition Payment Program (WGTPP)—Direct Payment

Period of implementation: 1995-97

The WGTP Program was announced in 1995 to provide transitional assistance to the owners of eligible western farmland who were directly affected by the termination of grain freight subsidies previously provided under the Western Grain Transportation Act (WGTA). Government expenditure on a one time payment to producers (spread over two fiscal years) who are owners of eligible prairie farmland, plus estimated fiscal benefit (tax concession) to farmers on this payment (which was treated for tax purposes as a capital gain rather than as current income). Eligible land was land on which an eligible crop of grain was grown in 1994 and summer fallow land on which eligible crop was grown in 1993. Eligible crops were those that were eligible for subsidies under WGTA. Payments were based on acreage of eligible land, productivity factor, distance factor and provincial allocation factor.

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government.

Payments are included in Other Transfers to Producers.

Western Grain Transition Payment Program (WGTPP)—Capital Payment Benefit

Period of implementation: 1995-96

Tax concession calculated as the difference between the effective value (CAD 2.2 billion) and CAD 1.6 billion, counted as "capital payment benefit".

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government.

Payments are included in Other Transfers to Producers.

CAIS Inventory Transition Initiative (CITI)

Period of implementation: 2006-07

CITI is a one time payment of CAD 900 million. The funds will be delivered to producers by recalculating how the Canadian Agricultural Income Stabilization (CAIS) programme values inventory change for the 2003, 2004, and 2005 CAIS programme years. CAIS information that producers have already submitted for 2003, 2004 and 2005 will be used to recalculate benefits using a new method of inventory valuation. To ensure that payments do not exceed the CAD 900 million spending cap, payments will be recalculated and producers will receive a percentage of the total payment as follows: For 2003 - 50% of the total payment; For 2004 - 50% of the total payment; For 2005 – 40% of the total payment

Use of labels: Production and payment limits: NO; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Area; Payment source: National government.
Payments are included in Other Transfers to Producers.

Arable Acres Supplementary Payment Program

Period of implementation: 1996

Government expenditure on a one-time payment to landowners who grew crops that were not eligible for the WGTPP above, plus estimated fiscal benefit (tax concession) on this payment (as for the WGTPP above). The payment was provided at a flat rate per acre for three types of land (CAD 9.56 per acre for irrigated arable land, CAD 6.50 per acre for dryland arable land, and CAD 3.71 per acre for improved pasture. Tax concession is estimated as 37.5% of the payment.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: National government.
Payments are included in Other Transfers to Producers.

Western Grain Transportation Adjustment Fund (WGTA) - Freight Cost Pooling Assistance Program, Phase I and Phase II

Period of implementation: 1995-97

In Eastern Saskatchewan, CAD 27 million was paid to eligible farmers, based on deliveries of wheat and barley to the Canadian Wheat Board during the previous crop year (1995/96). In Manitoba, CAD 22 million was paid out to eligible producers based upon gross sales of wheat and barley, reported for the 1995 tax year. A further CAD 11 million in Manitoba was paid to eligible producers of all commodities (including wheat and barley) based on gross sales reported for the 1995 tax year.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included Other Transfers to Producers.

Canada-Saskatchewan and Canada-Manitoba Adjustment Programs (C-SAP and C-MAP)

Period of implementation: 2000-01

Government budgetary expenditures (40% provincial-60% federal) on payments based on a percentage of the first CAD 125 000 of producers' historical sales of WGTA-eligible commodities during the 1994-98 period.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: Both national and sub-national government.
Payments are included in Other Transfers to Producers.

Alberta's Farm Income Assistance Program (FIAP)

Period of implementation: 2000-02

Provincial budgetary expenditures on initial and supplement payments based on area seeded in previous year and on payments to arable land not actually seeded. There is no obligation to produce or plant anything after the base year.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Edible Horticulture, Grain and Oilseed Payments (Ontario)

Period of implementation: 2001

Federal expenditures on a one-time payment announced after the beginning of the 2001 crop year. For crops, it is implemented in a similar manner to the Market Revenue Program [C] but the payment is based on the spread from 90% to 94% of the indexed moving average price for the crop year 2000. For horticultural commodities, the payment is based on a percentage of producers' historical net sales of eligible commodities

during the 1995-99 period. Edible Horticulture payment and Grains and Oilseeds payment accounted for separately in database.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included in Other Transfers to Producers.

Grain Stabilization Payment (Ontario)

Period of implementation: 2000

Provincial expenditures matching federal expenditures on the above payment for crops. It is implemented in a similar manner to the Market Revenue Program [C] but the payment is based on the spread from 85% to 90% of the indexed moving average price for the crop year 2000.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Farm Income Adjustment Program (Prince Edward Island) and Farm Income Support Program (Nova Scotia)

Period of implementation: 2001

Federal expenditures on a one-time payment announced after the beginning of the 2001 crop year. The payment is based on net sales of eligible commodities during the 1995-99 period and there is no requirement involving upcoming production.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included in Other Transfers to Producers.

Farm Assistance Program (New Brunswick)

Period of implementation: 2001

Federal expenditures on a one-time payment announced after the beginning of the 2001 crop year. The payment is based on qualifying sales of eligible commodities in 2000 and there is no requirement involving upcoming production.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included in Other Transfers to Producers.

Assistance Program (British Columbia)

Period of implementation: 2001

Federal expenditures on a one-time payment announced after the beginning of the 2001 crop year. There is a payment based on previous plantings and a payment based on qualifying sales of eligible commodities in the 2000 tax year. For both, there is no requirement involving upcoming production.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included in Other Transfers to Producers.

Apple Transition Payments

Period of implementation: 1996-2001

Payments based on 1993 and 1994 production.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included in Other Transfers to Producers.

Agricultural Policy Framework (APF) Transition Funding

Period of implementation: 2002-2003

CAD 600 million per year paid into producer's NISA accounts on the basis of 1997-2002 sales. CAD 150 million of this reserved for non-participants in NISA affected by the new programme. Payments are to cover costs of new producer obligations under the APF programmes.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.

Payments are included in Other Transfers to Producers.

Transitional Industry Support Program General Payment and Direct Payment

Period of implementation: 2004

This is a one-time programme. The TISP payment has two components: A general payment for all eligible Canadian producers made on the basis of historical farm receipts, and a direct payment to producers of cattle and other ruminants. The general payment distributes the funds by cash payment directly to producers, based on their average eligible net sales (ENS) for the years 1998 to 2002, or average ENS for those years where Net Income Stabilization Account (NISA) data is available. Producers of all commodities except supply-managed commodities are eligible to receive the general payment. The direct payment makes a flat rate payment of up to CAD 80 per bovine animal to livestock producers based on their herd inventories as of 23 December 2003. The direct payment is targeted to producers directly impacted by the BSE situation. Producers of most cattle and ruminant animals are eligible. This includes all bovine animals (including dairy heifers), with the exception of mature bulls and cows (i.e. cows that have calved and bulls older than one year). This also includes other ruminants such as bison, sheep, goats, elk, and deer. The direct portion of the payment is allocated to beef and other livestock according to administrative data. This programme was entirely funded by the Federal government. General Payment and Direct payment are accounted for separately in database.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.

Payments are included in Other Transfers to Producers.

Farm Income Payment

Period of implementation: 2005

This is a one-time programme. The Farm Income Payment has two components: A general payment for all eligible Canadian producers made on the basis of historical farm receipts, and a direct payment to producers of cattle and other ruminants. Producers of all commodities except supply-managed commodities are eligible to receive the general payment. The direct payment is targeted to producers directly impacted by the BSE situation. Producers of most cattle and ruminant animals are eligible. This includes all bovine animals (including dairy heifers), with the exception of mature bulls and cows (i.e. cows that have calved and bulls older than one year). This also includes other ruminants such as bison, sheep, goats, elk, and deer. Any producer who received assistance under the Transitional Industry Support Program in 2004 will automatically receive a cheque for the Farm Income Payment. General Payment and Direct payment are accounted for separately in database.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.

Payments are included in Other Transfers to Producers.

Canada-Ontario General Top-up Payment

Period of implementation: 2003-04

Initial payments based on 10% on 2004 CAIS payments. Final payment amount yet to be determined. Initial payments beginning in May 2006. Final payment early 2007.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.

Payments are included Other Transfers to Producers.

Cull animal programme

Period of implementation: 2003-06

The programme covers 8% of beef cows and 16% of dairy cows that a producer owned on 1 September 2003. A comparable programme is being offered to producers of other ruminants affected by border closures. There are two components to the Cull Animal Program: 1/ A provincially funded per head payment based on a percentage of your registered breeding herd on 1 September 2003. This payment is initiated as soon as the administration receives your inventory registration forms. Sales or slaughter documentation are not required. 2/ Federally funded payments based on culled animals that are sold for slaughter from 1 September 2003 to 31 December 2004. Documentation of sale for slaughter is required.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Both national and sub-national government. Payments are included in Other Transfers to Producers.

Provincial CAIS Enhancements

Period of implementation: 2006-13

Top-ups to CAIS program

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Income; Payment source: Sub-national government. Payments are included in Other Transfers to Producers.

Cover Crop Protection Program (CCPP)

Period of implementation: 2005-09

The CCPP is a national initiative that provides financial assistance to Canadian producers who are unable to seed commercial crops due to spring flooding or excessive field moisture. The CCPP provides a one-time payment of CAD 15 per acre for eligible claims of 10 acres or more. To be eligible for CCPP, producers must be enrolled in production insurance.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Income; Payment source: National government. Payments are included in Other Transfers to Producers.

Grains and Oilseeds Payment Program (GOPP)

Period of implementation: 2005

The Grains and Oilseeds Payment Program (GOPP) is a one-time, CAD 755 million programme for producers of grains, oilseeds, or special crops. GOPP provides a payment to producers based on average net sales of eligible grains, oilseeds and special crops from 2000 to 2004. Producers with sales of eligible grains, oilseeds and special crops in 2004 who participated in the Canadian Agricultural Income Stabilization (CAIS) programme for 2004 will automatically receive a payment.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Income; Payment source: National government. Payments are included in Other Transfers to Producers.

Ontario Grain and Oilseed Payment Program (OGOPP)

Period of implementation: 2006-07

Payments are based on a producer's 2005 acreage and their historical average farm yield. The crop-specific payment rates are based on the difference between the support price and the market price, pro-rated for the dollars available. The support prices were determined using 90% of the 15-year indexed Ontario average price. Payments are calculated as follows: 90% x 2005 acres x Average farm yield x Payment rate. The following crops are eligible under the Ontario Grain and Oilseed Program: Corn, Soybeans, Winter wheat, Red spring wheat 1, Spring grains, Canola, White Beans, 2 Coloured beans, Seed corn, Popping corn, Sunflowers, Field peas, Flax, Triticale, Faba beans, Buckwheat, Millet, Rye, Sorghum, Spelt, Farm fed grains and oilseeds.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Ontario Edible Horticultural Crop Payment

Period of implementation: 2006

Producers will receive 2.6% of their eligible net sales for the 2004 crops eligible for the Ontario Edible Horticulture Crop Payment (2005 crops for new farmers). If there are funds remaining after all applicants have been paid, a final payment will be made to all eligible producers. For example: If Eligible Net Sales = CAD 100 000 Benefit = CAD 100 000 x 0.026 = CAD 2 600. There is a CAD 500 000 cap on payments under the Ontario Edible Horticulture Crop Payment.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Income; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Canada-BC Livestock Drought Assistance

Period of implementation: 2007-08

Livestock owners who owned eligible breeding livestock (breeding males and bred females) in any of the six drought-designated districts in northern British Columbia can apply for federal financial assistance to help offset the costs incurred during the drought in 2006. Such costs include those related to purchasing and hauling feed, and/or water for breeding livestock during the drought. Payments are based on breeding livestock totals as of 12:01 a.m. on 31 December 2006 and are paid on a per-head basis with a different rate specified for each animal type. This is a one-time programme for 2007 only.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: National government.
Payments are included in Other Transfers to Producers.

Cost of Production Payment

Period of implementation: 2007-2009

Payment based on reported sales of eligible commodities for tax purposes in 2004, 2005 or 2006 (see the Eligible Commodities List enclosed). Products under supply management (milk, chickens, turkeys and eggs) are not eligible for a COP payment. The payment is equal to 2.36% of the average eligible net sales (ENS) from 2000 to 2004. As a general rule, the ENS corresponds to the sum of all sales of eligible agricultural commodities and crop insurance. One-time programme for 2007 only.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: National government.
Payments are included in Other Transfers to Producers.

Ontario Cost Recognition Top-Up Program

Period of implementation: 2007-10

Provincial enhancement to Cost of Production Payment, increasing the amount paid by two-thirds. See COP payment above for labelling information. One-time programme for 2007.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Golden Nematode Disaster Program

Period of implementation: 2007-08

Programme provides payment to 1/ help producers with the costs of disposal of potatoes from fields that have tested negative; 2/ a per hectare support payment to help potato producers and producers of nursery and greenhouse crops with extraordinary costs not covered under existing programmes; and 3/ funding to cover

the producer share of eligible costs for participating in the Farm Business Assessment (FBA) and the Specialized Business Planning Services - components of the Canadian Farm Business Advisory Services (CFBAS).

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: National government.
Payments are included in Other Transfers to Producers.

Circovirus Program

Period of implementation: 2006-09

This programme compensates hog producers affected by the post weaning multi-systemic wasting syndrome (PMWSF). To be eligible for this programme, farmers need to have registered for 2005 CAIS. A farmer is compensated if the mortality rate of feeder pigs was higher than 6% in the 2005 CAIS programme year. For each eligible hog, the producer receives CAD 62.67, corresponding to two-thirds of the estimated loss.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Manitoba Ruminant Assistance Program

Period of implementation: 2008

Programme to compensate for high feed costs. Payment is equal to 2% of net sales with a possible additional 1% payment contingent on funding. Eligible net sales are the annual sales less the total annual purchases of all eligible livestock. Producers must have had eligible net sales in the 2005 or 2006 taxation year, or were new producers in 2007. Producers must have owned or leased eligible livestock (cattle, bison, sheep, goats, elk and deer) in 2007.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: Both National and sub-national government.
Payments are included in Other Transfers to Producers.

PEI Hog Transition Program

Period of implementation: 2008

Payment to help producers exit the sector.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Ontario Cattle, Hog and Horticulture Payment

Period of implementation: 2008-09

To be eligible for the OCHHP, producers must have received a federal Cost of Production (COP) payment and/or an Ontario Cost Recognition Top-up (OCRT) payment, and at least half of their total commodity sales as reported to the Canada Revenue Agency (CRA) in 2005 and/or 2006 must have come from any combination of cattle, hogs, or horticulture. Eligible producers will receive a payment based on their historical allowable net sales (ANS) between 2000 and 2004. There are three payment scenarios: 1/ For eligible producers with at least 50% of their sales coming from cattle and/or hogs, the payment rate is 12% of their ANS as calculated from their COP statements. 2/ For eligible producers with at least 50% of their sales coming from horticulture, the payment rate is 2% of their historical ANS as calculated from their COP statements. 3/ For producers who require a combination of horticulture and cattle/hogs to meet the 50% requirement, the payment rate is calculated based on the weighted proportion of their sales in each eligible commodity.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Receipts; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Cull Breeding Swine Program

[Period of implementation: 2008-09](#)

Eligible producers receive CAD 225 per breeding swine culled after 14 April 2008. Reimbursement is also made for costs of slaughter and carcass disposal. For producers who sold animals before that date, a payment of CAD 225 per breeding swine less the selling price was given to approved producers that sold animals from 1 November 2007 until 13 April 2008.

Use of labels: Production and payment limits: YES; Variable payment rates: YES; Input constraints: NO; Payment eligibility: Animal number; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Saskatchewan Unseeded Acreage Support

[Period of implementation: 2006](#)

The Unseeded Acreage Payment provides CAD 10 per acre to producers who were unable to seed at least 95% of their normal seeded acreage.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Saskatchewan Cattle and Hog Support Program

[Period of implementation: 2009](#)

This programme provides assistance to help Saskatchewan cattle and hog producers address their cash flow needs and retain their breeding herds. Saskatchewan will be eligible for:

- a CAD 40 payment per head for all beef breeding cows and bred beef heifers owned as of 1 January 2009;
- a CAD 20 payment per market hog sold for slaughter between 1 July 2008 and 31 January 2009;
- a CAD 10 payment per head for all weanlings, iso-weanlings and feeder hogs produced between 1 July 2008 and 31 January 2009.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Animal number; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Quebec Nematode Assistance Program

[Period of implementation: 2009-10](#)

This programme provides assistance to Quebec potato producers and nursery growers affected by golden nematode. It provides a per hectare payment to potato producers to help them to transition to new production and for nursery growers a payment per plant destroyed to cover marketing and destruction costs.

Use of labels: Production and payment limits: NO; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national government.
Payments are included in Other Transfers to Producers.

Excess Moisture and Flood Initiative

[Period of implementation: 2011-13](#)

This is a AgriRecovery including Canada-British Columbia Excess Moisture Initiative, Canada-Alberta Excess Moisture Initiative II (CAEMI II), Canada-Saskatchewan Excess Moisture Program, Canada-Quebec Excess Moisture Initiative, Canada-Manitoba Agricultural Recovery Program, and New Brunswick Excess Moisture Initiative.

Use of labels: Production and payment limits: YES; Variable payment rates: NO; Input constraints: NO; Payment eligibility: Area; Payment source: Both national and sub-national government.
Payments are included in Other Transfers to Producers.

Spring Blizzard Mortalities Assistance Program

Period of implementation: 2011-12

This programme provides assistance to Manitoba producers who experienced livestock deaths occurring between 29 April and 5 May 2011 as a result of weather conditions (i.e. freezing rain, blizzard, and previous moisture conditions) on 29-30 April.

Use of labels: Production and payment limits:NO; Variable payment rates: NO; Input constraints: NO;
Payment eligibility: Animal number; Payment source: Sub-national government.
Payments are included in Other Transfers to Producers.

Agriculture Flooding Assistance Program

Period of implementation: 2011-14

This programme provides assistance to Manitoba producers who experienced livestock deaths occurring between 29 April and 5 May 2011 as a result of weather conditions (i.e. freezing rain, blizzard, and previous moisture conditions) on April 29-30.

Use of labels: Production and payment limits:NO; Variable payment rates: NO; Input constraints: NO;
Payment eligibility: Area; Payment source: Sub-national government.
Payments are included Other Transfers to Producers.

Dairy Direct Payment Program

Period of implementation: From 2019

As a result of market access commitments made under recent international trade agreements, namely the Canada-European Comprehensive Economic and Trade Agreement (CETA), the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and the Canada-United States-Mexico Agreement (CUSMA), this programme provides payments to cow's milk producers during the budget year ending on 31 March. Individual payments are based on the percentage of each holder's quota relative to the provincial quotas of 31 August .

Use of labels: Production and payment limits:NO; Variable payment rates: NO; Input constraints: NO;
Payment eligibility: Receipts; Payment source: National government.
Payments are included in Milk Single Commodity Transfers.

F. Payments based on non-commodity criteria

F.1. Payments based on long-term resource retirement

Grape and Wine Adjustment Programs and Tobacco Adjustment Programs

Period of implementation: 1988-93

Government expenditure on payments for acreage reduction.

Use of labels: Input constraints: VOLUNTARY (other); Payment source: National government.
Payments are included in Other Transfers to Producers.

Tobacco Adjustment Assistance Program

Period of implementation: 1986-2006

The TAAP was designed to aid in the transition of the Canadian tobacco growing industry by permanently retiring Basic Production Quota through a reverse auction process

Use of labels: Input constraints: VOLUNTARY (other) ; Payment source: National government.
Payments are included in Other Transfers to Producers.

Tobacco Transition Program

Period of implementation: 2009

This programme provides assistance to farmers who wished to transition out of the industry. It provided federal funding of CAD 1.05 per pound of Basic Production Quota to participating producers. Producers who participated in the programme cannot re-enter tobacco production in Canada.

Use of labels: Input constraints: VOLUNTARY (other) ; Payment source: National government.
Payments are included in Other Transfers to Producers.

Hog Farm Transition Program

Period of implementation: 2010-2011

This programme is open to producers that were in hog production as of 1 April 2009 and were willing to commit to setting aside their entire hog production facilities for three years. Production facilities must remain empty for the entire 3-year period, starting on the date the barns were completely depopulated. All producers who derive income from hog production and who have inventories as at 1 April 2009 are eligible. Producers must own the hogs and barns in order to be eligible. There are no maximums on individual payments; however there will be maximum per animal unit equivalent bids set by the Programme Administrator. Producers submit bids indicating the amount they are willing to accept to halt production and participants are selected through a tender process.

Use of labels: Input constraints: VOLUNTARY (other); Payment source: National government.
Payments are included in Other Transfers to Producers.

F.2. Payments based on specific non-commodity output

F.3. Payments based on other non-commodity criteria

G. Miscellaneous payments

Residual amount.

Period of implementation: 1986-Present

Payments are included in Other Transfers to Producers.

III.2 Percentage PSE

$$[100 \times (\text{III.1}) / ((\text{I}) + (\text{Sum of A2 to G}))]$$

III.3 Producer NPC

For all agricultural commodities the producer NPC is estimated as a weighted average of the producer NPC calculated for the individual MPS commodities and shown in Table 4. For each commodity Producer NPC = [domestic price received by producers (at the farm gate) + unit payments based on output] / border price (also at the farm gate).

III.4 Producer NAC

$$[1 / (100 - (\text{III.2})) \times 100]$$

IV. General Services Support Estimate (GSSE)

Total budgetary expenditure to support general services provided to agriculture [Sum of H to M].

H. Agricultural Knowledge and Innovation System

H.1. Agricultural Knowledge Generation

Both federal and provincial level expenditures for Departmental Research Activities, Other Knowledge Generation, Research and Development Initiatives and Research Centres are included in addition to the federal level expenditure for Support of new Agri-based Products.

H.2. Agricultural Knowledge Transfer

H2.a. education

Both federal and provincial level expenditures for Agricultural College/University and Agricultural Specific Education are included.

H2.b. extension services

Both federal and provincial level expenditures for Business Development Initiatives, Business Management Initiatives, Departmental Advisory Services, Leadership Initiatives and other External Advisory Services and Other Knowledge Transfer, and Veterinary College are included in addition to the federal level expenditure for Agricultural Policy Research Network Contribution, Agricultural Greenhouse Gases Program, Agri-Food Innovation Program and Canadian Agri-Science Clusters.

I. Inspection and Control

I.1. Agricultural product safety and inspection

Both federal and provincial level expenditures for Safety and Inspection Service and Initiatives are included.

I.2. Pest and disease inspection and control

Both federal and provincial level expenditures for Biosecurity System Initiatives, Pest and Disease Initiatives, Safety and Inspection Initiatives are included in addition to the federal expenditure for Traceability System Initiatives.

I.3. Input control

No entry

J. Development and maintenance of Infrastructure

J.1. Hydrological Infrastructure

Both federal and provincial level expenditures for Hydrological Infrastructure Services are included.

J.2. Storage, marketing and other physical infrastructure

Both federal and provincial level expenditures for Departmental Environment Services and Initiatives, Land Management Initiatives, and Other Storage, Marketing and Other Physical Infrastructure Initiatives and Services are included.

J.3. Institutional infrastructure

Both federal and provincial level expenditures for Agricultural Boards and Commissions, Grants to Producer Institutions, and Other Institutional Initiatives and Services are included.

J.4. Farm restructuring

No entry

K. Marketing and promotion

K.1. Collective schemes for processing and marketing

Both federal and provincial level expenditures for Departmental Marketing Services, Market Development Initiatives and Marketing / Regulatory are included in addition to the federal expenditure for Agri-Marketing Program. The Market Development Program for Turkey and Chicken as well as part of the Indigenous Agricultural and Food Safety Initiative are also included.

K.2. Promotion of agricultural products

Both federal and provincial level expenditures for Fairs and Exhibitions, Promotional Initiatives and Services are included in addition to the provincial level expenditure for Buy Local Programs. The federal AgriCommunication Program is also included.

L. Cost of Public stockholding

No entry

M. Miscellaneous

No entry

V.1 Consumer Support Estimate (CSE)

Associated with agricultural production, i.e. for the quantities of commodities domestically produced, excluding the quantities used on-farm as feed -- excess feed cost. [Sum of N to Q; when negative, the amounts represent an implicit tax on consumers].

N. Transfers to producers from consumers

Associated with market price support on all domestically produced commodities, estimated by increasing the transfers calculated for the MPS commodities according to their share in the total value of production $[(N.1) / (I.1) \times 100]$.

N.1. Of which MPS commodities: Sum of the values of transfers from consumers to producers associated with market price support for the MPS commodities as calculated in Tables 4.1 to 4.16.

O. Other transfers from consumers

Transfers to the budget associated with market price support on the quantities imported of domestically produced commodities, estimated by increasing the transfers calculated for the MPS commodities according to their share in the total value of production $[(O.1) / (I.1) \times 100]$.

O.1. Of which MPS commodities: Sum of the transfers to the budget associated with market price support on the quantities imported of the MPS commodities as calculated in Tables 4.1 to 4.16.

P. Transfers to consumers from taxpayers

P.1. Commodity specific transfers to consumers

Sum of commodity specific transfers from taxpayers to consumers (farm gate level) from Tables 4.1, 4.2 and 4.17, including:

Price Pooling Program (PPP) (under the Agricultural Marketing Programs Act): Government expenditures on payments to certain co-operatives (including tree fruit) offering price guarantees to farmers (Formerly known as the Agricultural Product Co-operative Marketing Act (APCMA)).

Agricultural Products Board (APB): Budget expenditures covering losses incurred by the APB while buying and selling grapes and maple syrup.

Pool deficit: Federal government expenditures on guarantees offered to deficits in Canadian Wheat Board Pool Accounts resulting from market returns lower than initial payments to producers. Data available by commodity.

P.2. Non-commodity specific transfers to consumers

Sum of non-commodity specific transfers from taxpayers to consumers, including:

First level processing: Classified as a part of GSSE until 2013 and from 2017 onwards. Sum of grants to enterprise at first level of processing.

Surplus Food Purchase Program (2020): This programme is part of the government of Canada's emergency response to the current COVID-19 crisis. This is a time-limited programme (2020) to help manage and redirect existing surpluses to organizations addressing food insecurity and to avoid food waste. It will provide an opportunity for non-profit and for-profit organizations across the supply chain to bid on significant volumes of surplus products at the cost of production or less, processing them where necessary for longer shelf life and distributing to food serving agencies. Surplus food, once acquired and processed (if needed), must be donated to food serving agencies for distribution to food vulnerable populations; it cannot be resold and cannot generate any profits for processors or distributors, although the program may cover costs incurred across the value chain. Link: <https://www.agr.gc.ca/eng/agricultural-programs-and-services/surplus-food-rescue-program/?id=1591298974329>

Local Food Infrastructure Fund (2019-2022): This programme is aimed at community-based, not-for-profit organizations with a mission to reduce food insecurity by establishing and strengthening their local food system. Part of the fund is to allow small community-based organizations to improve their infrastructure and purchase equipment directly related to the accessibility of healthy, nutritious, and ideally, local foods within their community. The impact must be targeted and immediate, and must be directly related to addressing food insecurities and increasing the accessibility of healthy, nutritious and ideally local foods within their community(ies). Another part of the fund is to support more complex, multi-year projects that strengthen local food systems.

Emergency Food Security Fund (2020-21): This programme support national, regional, and local organisations across Canada that are able to reach people and communities experiencing food insecurity and who have been impacted by COVID-19. This fund supports the purchase and distribution of food and other necessities on an emergency basis across the country. The government of Canada is working with key national and regional agencies that have an established network and distribution system for

food aid and providing food to those in need. Examples of key national and regional agencies which received support: Food Banks Canada, Second Harvest, Community Food Centres Canada, Breakfast Club, Salvation Army, and La Tablee des Chefs.

Q. Excess Feed Cost

Associated with market price support on quantities of domestically produced crops and used on-farm as feed as calculated (Sum of *Excess Feed Cost* in the MPS Tables 4.1, 4.2 and 4.4).

V.2 Percentage CSE

$$[100 \times (V.1) / ((II) + (P))]$$

V.3 Consumer NPC

For all agricultural commodities the consumer NPC is estimated as a weighted average of the consumer NPC calculated for the individual MPS commodities and shown in Table 2. For each commodity consumer NPC = domestic price paid by consumers (at the farm gate)/ border price (also at the farm gate).

V.4 Consumer NAC

$$[(1 / (100 - (V.2))) \times 100]$$

VI. Total Support Estimate

$$[(III.1) + (IV) + (P)] \text{ and } [(R) + (S) - (T)]$$

R. Transfers from consumers

$$[(N) + (O)]$$

S. Transfers from taxpayers

$$[(III.1) - (N) + (IV) + (P)]$$

T. Budget revenues

$$[(O)]$$

TABLE 2. CANADA: BREAKDOWN OF PSE BY COMMODITY SPECIFICITY AND OTHER TRANSFERS

All data sets in Table 2 to come from Tables 1 and 3.1 to 3.17 where definitions are included.

Definitions:

I. Producer Single Commodity Transfers (producer SCT): the annual monetary value of gross transfers from consumers and taxpayers to agricultural producers, measured at the farm level, arising from policy measures directly linked to the production of a single commodity such that the producer must produce the designated commodity in order to receive the payment. This includes policies where payments are specified on a per-commodity basis [Sum of SCTs for individual commodities from Tables 3.1-3.17].

Percentage producer SCT: is the commodity SCT expressed as a share of gross farm receipts for the specific commodities (including support in the denominator). This indicator can be expressed for the total SCT (Table 2), or for a specific commodity (Table 3.1 to 3.17).

$$\%SCT = 100 * SCT / (\text{Value of production}_{COM} + A.2_{COM} + B_{COM} + C_{COM} + D_{COM})$$

$$\textit{Share in Total PSE (\%): } SCT_{SHARE} = 100 * SCT / PSE$$

II. Group commodity transfers (GCT): the annual monetary value of gross transfers from consumers and taxpayers to agricultural producers, measured at the farm gate level, arising from policy measures whose payments are made on the basis that one or more of a designated list of commodities is produced. That is, a producer may produce from a set of allowable commodities and receive a transfer that does not vary with respect to this decision [GCT = B_{GROUP} + C_{GROUP} + D_{GROUP}].

$$\textit{Share in Total PSE (\%): } GCT_{SHARE} = 100 * GCT / PSE$$

Transfers to specific groups of commodities: the GCT indicator is calculated for Australia for the following groups of commodities: All crops, fruits and vegetables, all livestock, and ruminants.

III. All commodity transfers (ACT): the annual monetary value of gross transfers from consumers and taxpayers to agricultural producers, measured at the farm gate level, arising from policy measures that place no restrictions on the commodity produced but require the recipient to produce some commodity of their choice [ACT = C_{ALL} + B_{ALL} + D_{ALL}].

$$\textit{Share in Total PSE (\%): } ACT_{SHARE} = 100 * ACT / PSE$$

IV. Other Transfers to Producers (OTP): the annual monetary value of gross transfers made under policies that do not fall in the above three cases (SCT, GCT, ACT). That is, payments that do not require any commodity production at all. [OTP = E + F + G]

$$\textit{Share in Total PSE (\%): } OTP_{SHARE} = 100 * OTP / PSE$$

$$\textbf{V. Total PSE: } PSE = A + B + C + D + E + F + G = SCT + GCT + ACT + OTP$$

Percentage PSE: $\%PSE = 100 * PSE / (\text{Total Value of Production at farm gate} + A.2. + B + C + D + E + F + G)$

TABLE 3. CANADA: PRODUCER SINGLE COMMODITY TRANSFERS (BY COMMODITY)

Tables 3.1 to 3.17, provide information on Producer Single Commodity Transfers (PSCT) for the following commodities: wheat, maize, barley, soybeans, rapeseed, milk, beef and veal, pig meat, poultry, eggs, oats, flaxseed, potato, lentils, drypeas, beans and “other commodities”. All data sets in the calculation SCT by commodity come from Tables 1 and 4.1 – 4.17 where definitions are included.

Definitions:

I. Level of production: Data from respective commodity Tables 4.1 – 4.17 (Market Price Support tables)

II. Value of production (at farm gate): Data for respective commodity Tables 4.1 – 4.17 (Market Price Support tables)

III. Producer Single Commodity Transfers: Sum of transfers to respective single commodity in categories A, B, C and D.

A. Support based on commodity output

A1. Market Price Support [Data for respective commodity from Table 4]

A2. Payments based on output

Payments based on output (A.2) provided to respective single commodity [Data from Table 1]

B. Payments based on input use, single commodity [B.1_{COM} + B.2_{COM} + B.3_{COM}]

B1. Based on variable input use

Payments based on variable input use (B.1_{COM}) provided to respective single commodity [Data from Table 1].

B2. Based on Fixed capital formation

Payments based on fixed capital formation (B.2_{COM}) provided to respective single commodity [Data from Table 1].

B3. Based on on-farm services

Payments based on on-farm services (B.3_{COM}) provided to respective single commodity [Data from Table 1].

C. Payments based on current A/An/R/I, production required, single commodity

Payments based on current A/An/R/I (C_{COM}) provided to respective single commodity [Data from Table 1].

D. Payments based on non-current A/An/R/I, production required, single commodity

Payments based on non-current A/An/R/I, production required (D_{COM}) provided to respective single commodity [Data from Table 1].

IV. Percentage producer SCT : %SCT = 100*(III) / ((II) + (A.2) + (B_{COM}) + (C_{COM}) + (D_{COM}))

TABLE 4. CANADA: MARKET PRICE SUPPORT AND CONSUMER SINGLE COMMODITY TRANSFERS

Tables 4.1 to 4.17, contain calculation of the Market Price Support (MPS) and Consumer Single Commodity Transfers (consumer SCT) for the following commodities: wheat, maize, barley, soybeans, rapeseed, milk, beef and veal, pig meat, poultry, eggs, oats, flaxseed, potato, lentils, drypeas, beans and “other commodities”. The data sets used in calculation of the MPS and consumer SCT by commodity are described below. Values for “other commodities” are derived using information on total Market Price Support and Value of Production, and individual commodity data.

Definitions:

1. Wheat

I. Level of production

Total farm production, including durum wheat

Source: Statistics Canada, Field Crops Reporting Series, Cat. 22-002.

II. Producer prices (at farm gate)

Final Realised Price for Western Canada Red Spring No. 1 minus freight and elevation charges

Source: Canadian Wheat Board, Annual Reports.

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net exporter

V. Market price differential at the farm gate

Implicit price calculated by subtracting unit market price support (MPS) from the producer price

VI. Reference prices at the farm gate (including the definition of the margin)

Implicit price calculated by subtracting unit market price support (MPS) from the producer price, where the MPS elements are the following:

- Transport subsidies (crow rate & others): (Total Average Freight Rate - Shipper Share) x Western Production. A Special Assistance Program is added in 1987 and 1988 [1, 2].

- Two Price Wheat: (Maximum Domestic Price - Final Realised Price for CWRS #1) x Food Consumption of all Wheat [3, 4].

- Corn Competitive: ((Corn Formula Price - (Canadian Western Feed + CWRS3)/2)+4) x Wheat Feed Sales [3].

-- Pool Deficits: (Pool Deficit/Quantity acquired by CWB) x Western Production [1, 3]

Sources: [1] Statistics Canada, *Field Crops Reporting Series*, Cat. 22-002, [2] National Transportation Agency, Annual rate scale orders [3] Canadian Wheat Board, Annual Reports, [4] Statistics Canada, *Cereal and Oilseeds Review*, Cat. 22-007

VII. Level of consumption (at farm gate)

Total domestic use

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

[(VII)*(VIII)]

Level of consumption times consumption price

7. Milk

I. Level of production

Deliveries of fluid milk, industrial milk and cream, plus on-farm food and animal feed uses (1.03 kg = 1 litre)

Source: Deliveries: Statistics Canada, The Dairy Review Monthly, Cat. 23-001. On-farm and animal feed use: Agriculture and Agri-Food Canada, Policy Branch.

II. Producer prices (at farm gate)

Unit farm cash receipts plus unit levies on deliveries, adjusted for milk fed to animals on farms valued at the reference price

Source: Statistics Canada, Agricultural Economic Statistics, Cat. 21-603

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net importer

V. Market price differential at the farm gate

Price gap between border price and producer price

VI. Reference prices at the farm gate (including the definition of the margin)

Border prices of butter and SMP converted into a milk equivalent border price using technical coefficients minus a processing margin, calendar year. The border price of butter is the unit value of imports or exports, using the larger in terms of volume shipped [1], the border price of SMP is calculated in the same manner as for butter. The processing margin is calculated as the average of the processing margins of the four major exporters (NZ, EU, US, AUS).

Sources: [1] Agriculture and Agri-Food Canada, Policy Branch.

VII. Level of consumption (at farm gate)

Estimated by converting sales, production or disappearance of individual dairy products to their whole milk equivalent, on a butterfat equivalent basis

Source: Agriculture and Agri-Food Canada, Policy Branch

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

[(VII)*(VIII)]

Level of consumption times consumption price

8. Beef

I. Level of production

Estimated farm output of cattle multiplied by cold dressed weight of cattle plus farm output of calves multiplied by the cold dressed weight of calves

Source: Statistics Canada, Livestock and Animal Products Statistics, Cat. 23-203

II. Producer prices (at farm gate)

Farm cash receipts minus interprovincial sales, divided by the level of production

Source: Statistics Canada, Agricultural Economic Statistics, Cat. 21-603; Interprovincial sales: Statistics Canada, unpublished data.

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net exporter

V. Market price differential at the farm gate

Price gap between border price and producer price for the manufacturing segment, multiplied by the share of manufacturing meat in total beef production. This assumes the price gap for the non-manufacturing segment is zero, as no policy applies.

The domestic price of Canadian 85 CL fresh domestic beef price is multiplied by 1.10 to bring it to the 90 CL equivalent. The coefficient 1.10 has been used since 1998 as the ratio between US CL 90 and CL 85 prices originally used can no longer be calculated [1].

However, the price gap was set to zero when negative gaps were found, as the estimated negative price gaps reflect factors other than agricultural policies.

Sources: [1] USDA meat outlook.

VI. Reference prices at the farm gate (including the definition of the margin)

Australian manufacturing cow price, Queensland, plus transport costs, plus processing costs, less by-product deduction [1]. Since 1996, transport costs, processing costs, less by-product deduction are estimated using a trend. To calculate MPS, the reference price is compared to the Canadian cow price [2].

Sources: [1] Australian Meat and Livestock Corporation, Statistical Review, various issues; In recent years, the saleyard price of cows is published in ABARES agricultural commodity statistics; [2] Canadian Cattlemen's Federation; Exchange Rate: OECD, Main Economic Indicator, Paris.

VII. Level of consumption (at farm gate)

Total domestic disappearance

Source: Statistics Canada, Apparent Per Capita Food Consumption in Canada, Cat., 32-230 and 32-229.

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

[(VII)*(VIII)]

Level of consumption times consumption price

9. Pig meat

I. Level of production

Hog marketing (domestic slaughter + exports of live hogs - imports of live hogs) multiplied by the average cold trimmed weight

Source: Statistics Canada, Livestock and Animal Products Statistics, Cat. 23-203.

II. *Producer prices (at farm gate)*

Farm cash receipts minus interprovincial sales, divided by the level of production

Farm cash receipts divided by the level of production

Source: Statistics Canada, Agricultural Economic Statistics, Cat. 21-603

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net importer

V. Market price differential at the farm gate

Price gap between border price and producer price

VI. Reference prices at the farm gate (including the definition of the margin)

Chickens: The United States producer price, eviscerated, less EEP correction (market price support/production) plus transport costs to Canada [1]. To calculate MPS, the reference price is compared to the Canadian price of live chicken converted into eviscerated equivalent using a coefficient of 1.4 [2]. However, the price differential was set to zero when negative gaps were found, as the estimated negative price gaps reflect factors other than agricultural policies

Turkeys: The United States producer price, eviscerated, plus transport costs to Canada [1]. To calculate MPS, the reference price is compared to the Canadian price of live turkey converted into eviscerated equivalent using a coefficient of 1.2 [2]. However, the price differential was set to zero when negative gaps were found, as the estimated negative price gaps reflect factors other than agricultural policies

Source: [1] USDA, Agricultural Outlook, Table 5, various issues, in 2020, USDA Long-Term Agricultural Projection, Tables 21 and 22; [2] Agriculture and Agri-Food Canada. Poultry Market Review.

VII. Level of consumption (at farm gate)

Consumption of chicken and turkey

Source: Statistics Canada, Apparent Per Capita Food Consumption in Canada, Cat., 32-230 and 32-229.

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

Net importer

V. *Market price differential at the farm gate*

Price gap between border price and producer price. However, the price gap was set to zero when negative gaps were found, as the estimated negative price gaps reflect factors other than agricultural policies.

VI. *Reference prices at the farm gate (including the definition of the margin)*

The United States producer price less EEP correction (MPS/production) plus transport cost to Canada [1]. To calculate MPS, the reference price is compared to the Canadian producer price of grade-A large eggs [2], net of the industrial egg levy [3].

VII. *Level of consumption (at farm gate)*

Total domestic disappearance

Source: Statistics Canada, Apparent Per Capita Food Consumption in Canada, Cat., 32-230 and 32-229.

VIII. *Consumption prices (at farm gate)*

Value of production divided by level of consumption

IX. *Value of consumption (at farm gate)*

[(VII)*(VIII)]

Level of consumption times consumption price

12. Beans

I. *Level of production*

Total farm production

Source: Statistics Canada. Table 32-10-0359-01 Estimated areas, yield, production, average farm price and total farm value of principal field crops, in metric and imperial units

II. *Producer prices (at farm gate)*

Dry Beans, Average price over all types, grades and markets

Source: Agriculture and Agri-food Canada, Canada: Outlook for Principal Field Crops

III. *Value of production (at farm gate)*

[(I)*(II)]

IV. *Trade status*

Net exporter

V. *Market price differential at the farm gate*

MPD is set zero as there is no policies leading to market price support

VI. *Reference prices at the farm gate (including the definition of the margin)*

Set equal to producer price

VII. *Level of consumption (at farm gate)*

Total domestic use

Source: Agriculture and Agri-food Canada, Canada: Outlook for Principal Field Crops

VIII. *Consumption prices (at farm gate)*

Value of production divided by level of consumption

IX. *Value of consumption (at farm gate)*

[(VII)*(VIII)]

Level of consumption times consumption price

13. Dry peas

I. *Level of production*

Total farm production

Source: Statistics Canada. Table 32-10-0013-01 Supply and disposition of grains in Canada

II. *Producer prices (at farm gate)*

Dry Peas, Average price over all types, grades and markets

Source: Agriculture and Agri-food Canada, Canada: Outlook for Principal Field Crops

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net exporter

V. Market price differential at the farm gate

MPD is set zero as there is no policies leading to market price support

VI. Reference prices at the farm gate (including the definition of the margin)

Set equal to producer price

VII. Level of consumption (at farm gate)

Total domestic disappearance

Source: Statistics Canada. Table 32-10-0013-01 Supply and disposition of grains in Canada

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

[(VII)*(VIII)]

Level of consumption times consumption price

14. Lentils

I. Level of production

Total farm production

Source: Statistics Canada. Table 32-10-0013-01 Supply and disposition of grains in Canada

II. Producer prices (at farm gate)

Lentils, Average price over all types, grades and markets

Source: Agriculture and Agri-food Canada, Canada: Outlook for Principal Field Crops

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net exporter

V. Market price differential at the farm gate

MPD is set zero as there is no policies leading to market price support

VI. Reference prices at the farm gate (including the definition of the margin)

Set equal to producer price

VII. Level of consumption (at farm gate)

Total domestic disappearance

Source: Statistics Canada. Table 32-10-0013-01 Supply and disposition of grains in Canada

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

[(VII)*(VIII)]

Level of consumption times consumption price

15. Potatoes

I. Level of production

Total farm production

Source: Statistics Canada. Table 32-10-0358-01 Area, production and farm value of potatoes

II. Producer prices (at farm gate)

Potatoes, Average Farm Price, Canada

Source: Statistics Canada. Table 32-10-0358-01 Area, production and farm value of potatoes

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net exporter

V. Market price differential at the farm gate

MPD is set zero as there is no policies leading to market price support

VI. Reference prices at the farm gate (including the definition of the margin)

Set equal to producer price

VII. Level of consumption (at farm gate)

Amount sold, consumed, seeded or fed to livestock, potatoes

Source: Statistics Canada. Table 32-10-0358-01 Area, production and farm value of potatoes

VIII. Consumption prices (at farm gate)

Value of production divided by level of consumption

IX. Value of consumption (at farm gate)

[(VII)*(VIII)]

Level of consumption times consumption price

16. Flaxseed

I. Level of production

Total farm production

Source: Statistics Canada. Table 32-10-0013-01 Supply and disposition of grains in Canada

II. Producer prices (at farm gate)

Flaxseed Cash Price for No. 1 CW, Saskatoon

Source: Agriculture and Agri-food Canada, Canada: Outlook for Principal Field Crops

III. Value of production (at farm gate)

[(I)*(II)]

IV. Trade status

Net exporter

V. Market price differential at the farm gate
