

1st Meeting of the OECD Water Governance Initiative

27-28 March 2013
OECD Headquarters, 2 rue André Pascal, Paris
Room CC 12 (Conference Centre)

The OECD Water Governance Initiative provides for a **multi-stakeholder network** and **policy forum** to share on-going reforms, projects, lessons and good practices in support of better governance in the water sector.

The initiative builds on the OECD-led Good Governance Core Group of the 6th World Water Forum (Marseille, 12-17 March 2012) and seeks to bridge the gap between two World Water Fora with a community of practice aiming to:

- contributing to the **OECD water governance programme** through peer-reviewing, policy dialogue across decision-makers, exchange of experiences, and technical support to OECD Principles on Water Governance;
- supporting the **implementation of the governance targets** designed in Marseille, up to the 7th WWF in Korea;
- setting an **International Observatory** on water governance to collect innovative tools and success stories;
- developing a **web-based (knowledge) platform on Water Governance** to satisfy various information needs, fill existing information gaps and add substantial value by linking existing water governance platforms, tools, methodologies and programs
- providing **policy guidance** in support of the global water governance agenda such as the International Year on Water Cooperation and the development of Sustainable Development Goals

The Initiative gathers delegates from different geographic and institutional background in OECD and non OECD countries: senior representatives from national governments, local and regional authorities, service providers and their networks, economic and environmental regulators, non-for-profit organisations, river basin organisations and their networks, donors and international financial institutions, international organisations, think tanks and independent experts. Delegates will meet twice a year at OECD Headquarters, Paris to implement the Initiative's programme of work, and several thematic and regional working groups (to be defined during the launch meeting) will contribute to the Initiative's objectives throughout the year. The Initiative is hosted by the OECD Public Governance and Territorial Development Directorate. Its strategic orientation will be on a steering committee that will include thematic and regional working groups' coordinators, a representative from the World Water Council, a representative from the Korea Forum organisation, and sponsors.

This first meeting of the OECD Water Governance Initiative has the following **objectives**:

1. Agree on the **scope, mandate and activities of the Initiative** and define who does what;
2. Take stock of the **progress since the 6th World Water Forum** regarding "good governance targets" related to stakeholder engagement, performance of water supply and sanitation, river basin management, water security, integrity and transparency in the water sector;
3. **Share experiences on recent water governance reforms** in OECD and non OECD countries, cities and rural areas ;
4. Discuss **strategic and operational organisation of the Network** including the value added of an OECD Observatory on Water Governance, Principles on Water Governance, leadership of regional/thematic working groups, inputs to the global water governance agenda, and synergies with forthcoming events.
