

## Greece

### Notes:

This map is for illustrative purposes and is without prejudice to the status of or sovereignty over any territory covered by these maps.

The functional urban areas identified with the methodology described in the book *Redefining "urban": A new way to measure metropolitan areas*, OECD Publishing 2012 are here listed by size, according to four classes:

- Small FUAs, with population between 50,000 and 100,000
- Medium-sized FUAs, with population between 100,000 and 250,000
- Metropolitan FUAs, with population between 250,000 and 1.5 million
- Large metropolitan FUAs, with population above 1.5 million

Functional urban areas are economic units characterised by a city (or core) and a commuting zone that is functionally interconnected to the city.

A city is a local administrative unit (i.e. LAU for European countries, such as municipality, local authorities, etc.) where at

least 50% of its population live in an urban centre. An urban centre is defined as a cluster of contiguous grid cells of 1 km<sup>2</sup> with a density of at least 1,500 inhabitants per km<sup>2</sup> and a population of at least 50,000 inhabitants overall. Urban centres are defined using the population grid from the Global Human Settlement Layer database, referred to circa year 2015.

The commuting zone is composed of the local administrative units for which at least 15% of their workforce commute to the city. Commuting zones of the functional areas are identified based on commuting data (travel from home-to-work). Commuting data are also used to defined whether more than one city share the same commuting zone in a single polycentric functional urban area.

The list of functional urban areas takes into account the results of the consultation with the European National Statistical Institutes launched by Eurostat in June 2011 on the definition of cities and by the OECD with Delegates from the Working Party on Territorial Indicators. This list of functional urban areas may be reviewed on the basis of additional comments provided by countries. The OECD Metropolitan Areas Database which provides a set of economic, environmental, social and demographic estimated indicators on the 649 OECD metropolitan areas (functional urban areas with 250 000 or more inhabitants).

Additionally, interactive maps, histograms and summary profiles of each metropolitan area are available on the tool [MetroExplorer](#).

**Table 1. List of functional Urban Areas**

Fua name	Fua code	Classification	Pop.2015 (GHS)	Share Pop. core (%)
Athens	EL001L2	Large metropolitan area	3 610 000	92
Chania	EL010L1	Medium-sized area	110 000	47
Ioannina	EL007L2	Medium-sized area	150 000	46
Irakleio	EL004L2	Medium-sized area	220 000	62
Kalamata	EL009L2	Small area	70 000	71
Katerini	EL012L1	Small area	90 000	66
Kavala	EL008L2	Small area	20 000	229
Larisa	EL005L2	Medium-sized area	200 000	71
Patras	EL003L2	Medium-sized area	210 000	71
Serres	EL013L1	Small area	90 000	66
Thessaloniki	EL002L2	Metropolitan area	1 040 000	74
Trikala	EL014L1	Small area	90 000	67
Volos	EL006L2	Medium-sized area	140 000	56
Xanthi	EL011L1	Small area	90 000	64
