### SESSION I  
**DIGITAL EVIDENCE GATHERING IN CARTEL INVESTIGATIONS**

**17:00 – 19:45 CEST**

*The advent of digitalisation has radically changed the way competition authorities operate in a number of areas, including the detection of cartel infringements and the collection of evidence. New tools are also increasingly developed, helping authorities to collect high volumes of data in a short time. The new opportunities may raise, on the one hand, some legal challenges linked to the right to privacy and the rights of defence of the investigated company. They may also require, on the other hand, the planning of budgetary and human resources and co-operation with governmental bodies or other authorities to ensure their most effective use. This session will focus on the challenges faced by competition authorities in collecting evidence with digital instruments in cartel investigations and on the practical solutions that can be adopted to overcome them.*

Chair: Mario Umaña, Lead Trade and Competition Specialist, Integration and Trade Sector, IDB  
Presentation: Cristina Volpin, Competition Expert, OECD  
Speaker: Dirk Van Erps, Adviser to the Deputy Director General for Antitrust & Cartels, European Commission

The mechanisms of peer review vary, but it is founded upon the willingness of a country to submit its laws and policies to substantive questioning by other peers. The process provides valuable insights into the country under study, getting to the heart of ways in which each country deals with competition and regulatory issues, from the soundness of its competition laws to the structure and effectiveness of its competition institutions. In 2020, Ecuador’s competition law and policy will be subject to such a review.

Chair: Frédéric Jenny, Chairman, OECD Competition Committee, Latin American and Caribbean Competition Forum
