OECD TOURISM TRENDS AND POLICIES 2024

Launch, 8 July 2024

Lamia Kamal-Chaoui, Director
OECD Centre for Entrepreneurship, SMEs, Regions and Cities
#OECDtourism
Tourism had already bounced back in some countries in 2022

**GDP**
- 3.9% on average
- ▲ 1.4 ppt on 2020

**Services exports**
- 14.8%
- ▲ 4.8 ppt on 2020

Direct GDP contribution of tourism to selected OECD countries, pre-COVID-19 and 2022

*Across OECD countries with data available ** Employment refers to accommodation and food services sector which accounts for around half of all direct tourism employment in OECD countries. Note: Australia pre COVID data refers to 2019-20, Costa Rica post COVID data refers to 2023.
Domestic tourism has supported the sector through times of uncertainty

Domestic share of tourism expenditure in selected OECD countries, 2019 and 2022

... to build a strong and sustainable tourism workforce for the future

- Address the needs of tourism workers in wider planning
- Support tourism SMEs and workers to adopt and adapt to digital technology
- Facilitate linkages between the private sector and education providers
- Leverage and support private sector initiatives
- Collect and share data on tourism workforce issues
Strong rebound in tourism has highlighted the need for more balanced and sustainable tourism development.

- Acceptance and inclusion
- Decent tourism jobs
- Resilience to shocks
- Spreading tourism concentration
- Impact of tourist behaviours
- Digital uptake
- Community and visitor sentiment
- Sustainable transport and housing
- Reducing emissions and waste
- Protecting biodiversity

Reinforcing the importance of evidence-based tourism policies for a resilient, sustainable and inclusive future

Bolster co-ordination and delivery structures to empower destinations to manage tourism and drive momentum for change.

Encourage broad stakeholder engagement to deliver more equitable and inclusive benefits to impacted by tourism.

Implement forward-looking strategies to boost tourism’s role in climate action and take advantage of new technologies.
This calls for more timely and reliable data to support tourism decision-making, at all levels of government.

- Better understand the policy priorities for sustainable tourism.
- Address data gaps for priority sustainable tourism development issues.
- Tailored toolkits of evidence to facilitate decision making at the destination level.
- Collaborative approaches to design tools and metrics for sustainable tourism development.
- Develop the data literacy of decision makers.
