

## MAP PROGRAM STATISTICS FOR THE 2013 REPORTING PERIOD<sup>1</sup>

Country: **Germany/Allemagne**

If the reporting period does not correspond to the calendar year, please indicate the date when the reporting period ends:

Year MAP Case was Initiated	Opening Inventory on First Day of Reporting Period		Initiated During Reporting Period		Completed During Reporting Period		Ending Inventory on Last Day of Reporting Period		Closed or Withdrawn with Double Taxation During Reporting Period		Average Cycle Time for Cases Completed, Closed or Withdrawn During Reporting Period (in months) <sup>2</sup>

<sup>1</sup> Please note that the German competent authority (CA) internal case database does currently not allow to record “initiated” and “completed” dates following OECD definitions. While for earlier reporting periods (up to 2010) considerable efforts were made to specifically prepare separate statistics for OECD purposes, the need for a streamlining of resources is no longer permitting to produce additional statistics based on OECD definitions. Therefore the German CA currently provides the statistics used for internal purposes. Consequently, starting with the 2011 reporting period, the “initiated” and “completed” standards used in the reported statistics differ from OECD definitions. Under the definition applied by the German CA, a case is treated as open as soon as the German CA receives a request (which is earlier than under the OECD definition of “initiated”). The “completed” standard is now, since 2013, largely in line with OECD guidance. Requests that are rejected (*e.g.* because of the time limits) are included as “initiated”, and, when rejected, as “closed”. The “closed or withdrawn” column (with a total of 38 in 2013) thus contains rejected requests (10), withdrawn requests (17, it should be noted that it can generally not be established whether in such cases double taxation remains), and cases closed because it was determined that an agreement could not be found (11). The deviating “initiated” definition results in a larger MAP case inventory and makes cases appear older than under OECD definitions. This should be borne in mind when comparing the German 2013 figures with pre-2011 figures and statistics provided by other countries. Of the 858 cases in the ending inventory 2013, 367 concern transfer pricing or attribution of profits to a PE. Of the 267 requests received in 2013 (shown as “initiated”), 106 concern transfer pricing or attribution of profits to a PE.

<sup>2</sup> Due to the streamlining of resources described above, reporting cycle times following OECD definitions and thus suitable for direct comparison is currently not feasible.
