Austria has partially or fully implemented 89% of the DAC recommendations from the last review (in 2015).

As a valued development partner, Austria...

- works to its comparative advantages.
  - Aligns its strategic interests and development co-operation efforts, to build peace and security in Southeast Europe.
- prioritises multilateral delivery channels.
  - 59% of ODA was provided as core contributions to multilateral organisations in 2018.
- is strengthening the Austrian Development Agency's systems and tools.
  - New guidance for staff and partners is supporting the integration of priority issues – gender and environment – into programming.

Austria can improve by...

- developing a vision for development co-operation that is **owned** and **implemented** across government.
- increasing the **share of bilateral aid reaching partner countries**.
- putting in place the **skills, training and resources** to deliver on its ambitions.
