

SHI Peijun

Professor Shi Peijun is executive vice-president of Beijing Normal University. He got his Ph. D degree of palaeogeography at Beijing Normal University and had a postdoctoral experience at College of Natural Resources, University of California at Berkeley, USA. He is a member of the Expert Committee under the National Disaster Reduction Committee, housed in Ministry of Civil Affairs of China and also a member of OECD's High Level Advisory Board on Financial Management of Large - Scale Catastrophes. His research focuses on natural disaster theories and risk management. He has been charged with many relative national or ministerial programs and has numerous publications. He established the system of "regional natural disaster system" which consists of "environment, hazard and society"; put forward the technological system of regional agricultural natural disaster assessment. Now he is co-chairing Integrated Risk Governance Core Science project of International Human Dimensions Programme on Global Environmental Change, whose purpose is to study how is risk governance implemented across scale and how could multi-level governance of risks be improved; are accountability, participation, and responsibility necessary for effective risk governance; and how can resilient institutions for effective risk governance be designed.
