

Illustrative list of products containing tin, tantalum, and tungsten (3Ts)

The following list is an illustrative list of products containing the 3Ts. This is not an exhaustive list of products. The [cycle 2 interim downstream report](#), which analyses the pilot implementation programme of the OECD Due Diligence Guidance, includes a commodity analysis conducted by one of the downstream pilot participants to determine products that contain the 3Ts. This list is comprised of examples of product categories and products that contain 3Ts.

Tin	Tantalum	Tungsten
<ul style="list-style-type: none"> » All electrical products (toys, phones, computers, audio, GPS, appliances, etc.) » Lighting, including seasonal light » Jewellery, watches » Canned food (e.g. coating for steel cans) » Decorative crafts » Eyeglasses, lenses » Sports/fitness equipment » Power tools » Plastics » Automotive parts (e.g. brake pads) » PVC » Buckles, fasteners, zippers, buttons » Metallicized yarns 	<ul style="list-style-type: none"> » Electronics (including electronic toys, phones, computers, watches, cameras, appliances, GPS, etc.), appliances » Lighting » Eyeglasses and camera lenses » Power tools » Automotive parts (e.g. self-dimming mirrors and fuel pumps, automotive drilling and machining, airbags, skid control, engine controls, etc.) » Alloys for aerospace and gas turbines, jet engines » Corrosion resistant equipment for chemical processing » Coatings and parts for medical devices and implants 	<ul style="list-style-type: none"> » Appliances » Lighting, including seasonal lighting » Phones » Computer » Jewellery » Decorative crafts » Sports/fitness equipment » Power tools, including lawn mowers and grass cutters
