1.1. Overview of pension-reform measures, September 2007-February 2012 23 1.A1.1. Details of pension-reform measures, September 2007-February 2012,		23
by primary objective		35

6

2.1.	Different ways of linking pension benefits automatically to life expectancy	55
2.2.	Life expectancy and annuity factors: Baseline data for 2010 and alternative	
	projections for 2050	62
2.3.	Pension ages needed to equalise benefits in 2010 and 2050 under different	
	mortality scenarios: Man on average earnings, selected countries	64
3.1.	Architecture of reformed pension systems	80
3.2.	Structure of the retirement-income package after systemic pension reform	86
3.3.	Design of switching rules in reformed systems by age	87
3.4.	Transition costs and pension fund assets, 2010, per cent of GDP	89
3.5.	Switching and reform reversals: Gross pension replacement rates	92
3.6.	Switching and reform reversals: Lifetime values of contributions	
	and pension benefits	94
4.1.	Coverage of private pension schemes by type of plan, 2010	105
4.2.	Contrasting measures of coverage	108
4.3.	Coverage rate of private pension plans in selected OECD countries	109
4.4.	Most important motivations and barriers to membership	119
5.1.	Description of the minimum return guarantees analysed	138
5.2.	Price of guarantees by type of guarantee and by approach considered	
	to pay the guarantee fee	140
5.3.	Median cost of the guarantee by type	141
5.4.	Impact of a shift of the term structures of interest rate and volatility	
	on the price of guarantees	143
5.5.	Impact of investment strategies and the length of the contribution period	
	on the price of guarantees	144
5.6.	Exercising of the guarantee and cases in which the guarantee provides	
	a higher lump sum	145
	Probability distribution of replacement rates by type of guarantee	145
5.8.	Impact of the investment strategy and of the length of the contribution	
	period on the probability that the guarantee would be exercised	
	and on the replacement rate at the 5th percentile	146
6.1.	Contribution rates needed to achieve a certain target replacement rate	
	– deterministic case	169
	Distribution of retirement income relative to final wages	170
	Comparison of fee levels and impact on benefits	175
	Cost of minimum return guarantees for a 40-year contribution period	177
6.5.	Estimated probability that pension benefits based on life-cycle strategies	
	will be higher than those based on a fixed portfolio strategy	
	for two different contribution periods	180
	Men's pensionable age in OECD countries, 1949-2050	198
	Women's pensionable age in OECD countries, 1949-2050	200
	Life expectancy at normal pension age in OECD countries, men, 1958-2050	202
A4.	Life expectancy at normal pension age in OECD countries, women, 1958-2050	203
ДБ	Gross pension replacement rates from mandatory pensions	200
115.	(public and private) by earnings	204
A6	Gross pension replacement rates from public, mandatory private	201
110.	and voluntary private pension schemes	205

A7.	Net pension replacement rates from mandatory pensions	
	(public and private) by earnings	206
A8.	Net pension replacement rates from public, mandatory private	
	and voluntary private pension schemes	207
A9.	Income poverty rates	208
	Income sources, mid-2000s	209
	Projections of public expenditure on pensions, 2010-2060	210
	PAYG and funded (pension funds only) pension contributions	
	and expenditures	211
A13.	Private pension assets by type of financing vehicle	
	in selected OECD countries, 2001	212
A14.	Private pension assets by type of financing vehicle	
	in selected OECD countries, 2010	213
A15.	Relative shares of DB, DC and hybrid pension fund assets	
	in selected OECD countries, 2001	214
A16.	Relative shares of DB, DC and hybrid pension fund assets	
	in selected OECD countries, 2010	215
A17.	Total investment of pension funds in OECD and selected	
	non-OECD countries, 2001-2010	216
A18.	Total investment of pension funds in OECD and selected	
11101	non-OECD countries, 2001-2010	218
A19.	Pension funds' portfolio allocation in selected OECD countries, 2001	220
	Pension funds' portfolio allocation in selected OECD countries, 2010	222
	Pension funds' real net investment return	
	in selected OECD countries, 2002-2010	224
A22	Pension funds' total contributions in selected OECD countries, 2002-2010	225
	Pension funds' total benefits in selected OECD countries, 2002-2010	226
	Number of pension funds in selected OECD countries, 2001-2010	227
	Assets in public pension reserve funds in OECD and selected	
1125.	non-OECD countries, 2001-2010	228
A26	Assets in public pension reserve funds in OECD and selected	220
1120.	non-OECD countries, 2001-2010	229
Δ27	Public pension reserve funds' portfolio allocation	223
1127.	in selected OECD countries, 2010	230
	in selected of obtaining, 2010	230
Figures		
Figures		
1.1.	Average annual real net investment return of pension funds	
	in selected OECD countries	21
1.2.	Pensionable age under long-term rules, by sex	27
1.3.	Normal pension ages by sex, 1949-2050	27
1.4.	Life expectancy at age 65 by sex, 1960-2050	28
	Life expectancy at normal pension age by sex, 1960-2050	29
2.1.	Difference between public pension contribution revenue and pension	
	expenditure, percentage of GDP, 2007 and 2060	50
2.2.	Ratio of pension expenditure to pension contribution revenue,	
	percentage of GDP, 2007-2060	51
2.3.	Life expectancy at age 60 and 65 by sex, OECD average, 1960-2050	54

8

2.4.	Impact of indexation practice on real value of pensions in payment	60
2.5.	Pension entitlements under different life-expectancy scenarios:	
	Man with average earnings	63
2.6.	Assets in public pension reserves, 2010, per cent of GDP	67
3.1a.	Gross replacement rates by earnings and component of the pension system,	
	before reversal: OECD countries	82
3.1b.	Gross replacement rates by earnings and component of the pension system,	
	before reversal: Non-OECD, EU countries	83
3.2.	Net pension replacement rates by earnings, before reversal	84
	Impact of systemic reforms on pension entitlements by earnings	85
	Switching behaviour: Percentage of employees choosing mixed	
0.1.	public/private provision by age	88
3 5a	Total value of benefits from public and mandatory private pensions	00
J.5a.	before reform reversals: OECD countries	90
3 5h	Total value of benefits from public and mandatory private pensions	50
5.50.	before reform reversals: Non-OECD, EU countries	91
3.6	Net replacement rate of low earner, selected OECD and G20 countries	96
	Net pension replacement rates from PAYG pension systems for average	90
7.1.		101
12	Net pension replacement rates from PAYG and mandatory private pension	101
4.2.		106
4.0	systems for average earners	106
4.3.		107
1 1-	the reform	107
	Coverage rate of private pension plans according to age	110
	Coverage rate of private pension plans according to age	111
	Coverage rate of private pension plans according to income	112
	Coverage rate of private pension plans according to income	113
	Coverage rate of private pension plans according to gender	114
4./.	Coverage rate of private pension plans according to the type	
	of employment	114
	Coverage rate of private pension plans according to the type of contract	115
4.9.	Italy: Coverage rate of private pension funds before and after	
	auto-enrolment	117
4.10.	Germany: Coverage rate of private pension plans according	
	to the income of the household and the type of plan, December 2008	120
4.11.	Germany: Contribution rates in Riester pensions according to the income	
	of the household, December 2008	121
4.12.	Australia (voluntary component): Coverage and contribution rates	
	according to income	122
5.1.	The role of private pensions in the overall retirement income package	
	by type of provision	132
5.2.	Gross pension replacement rate and taxes and contributions paid	
	on pensions with different rates of investment return	134
5.3.	Shapes of the different life cycle investment strategies analysed	
	(LC80, LC50, LC20)	143
6.1.	Contribution and replacement rates	168

6.2.	Combinations of contribution rates and returns on investment to achieve	
	a target retirement income	170
6.3.	Contribution rates linked to age	171
6.4.	Incentives of tax deductions, tax credits and matching contributions	
	by income	173
6.5.	Incentives of adding matching contributions to tax deductions	
	by income	174
6.6.	Trade-off between potential retirement income (median replacement rate)	
	and risk (replacement rate at 5th percentile)	179
6.7.	Accumulated retirement income for different payout arrangements	
	according to life expectancy at 65	183
6.8.	Longevity swaps	188
A.1.	Private pension plan: Functional perspective	197
A.2.	Private pension plan: Institutional perspective	197

## This book has...

Look for the *StatLinks* at the bottom right-hand corner of the tables or graphs in this book. To download the matching Excel® spreadsheet, just type the link into your Internet browser, starting with the *http://dx.doi.org* prefix.

If you're reading the PDF e-book edition, and your PC is connected to the Internet, simply click on the link. You'll find *StatLinks* appearing in more OECD books.
