By 2030, ensure that all girls and boys complete free, equitable and quality primary and secondary education leading to relevant and effective learning outcomes

Target 4.1 will be monitored based on the global and thematic indicators listed below. Some indicators are being developed so placeholder indicators have been identified to the extent possible. The maps present all of the data currently available and will be regularly updated.

Global indicator

4.1.1 Proportion of children and young people: (a) in Grade 2 or 3; (b) at the end of primary education; and (c) at the end of lower secondary education who achieved at least a minimum proficiency level in (i) reading and (ii) mathematics

Placeholder: Proportion of children/young people (i) in Grade 2 or 3; (ii) at the end of primary education; and (iii) at the end of lower secondary education who achieved at least a minimum proficiency level in (a) reading and (b) mathematics, by type of assessment (PASEC, SACMEQ, TERCE, PILNA, PIRLS and TIMSS)

2015

4.6
Wereld

Land	Waarde
Australië	16,7
Canada	14,8
Zuid-Korea	12,9
Hong Kong SAR	12,5
Nederland	12,4
Taiwan	11,5
Kazakhstan	10,5
Rusland	10,3
België	9,9

Global Goal #13: Bestrijdt klimaatverandering en de gevolgen.

De uitstoot van broeikasgassen per hoofd van de bevolking is in Nederland de laatste jaren gestaag afgenomen, naar 12,4 ton in 2015. Maar dit is nog altijd de hoogste waarde binnen de EU.

De broeikasgasintensiteit van de economie (hoeveel CO2 gebruikt het land om één euro BNP te creëren?) is langzaam gedaald naar 0,30 kg in 2014. In vergelijking met andere EU-landen staat Nederland daarmee in de middenmoot.

Met de Sustainable Development Goals (SDG's), ook wel Global Goals genoemd, stimuleren de Verenigde Naties wereldwijd duurzame ontwikkeling. Er zijn 17 doelen gesteld, te bereiken in 2030.

Narrated data

The population of services industry, has a very high average education level. The 19th arrondissement scores lowest, with 29.5% of the population older than 15 (and not currently in school or university) having a university diploma. This is still more than twice the national rate of 13.7%. In the center of Paris and the western arrondissements, at least half of the adult population has been to university.

Not everyone is educated at that level. In the northeastern arrondissements, up to a fifth of the population hasn't got any diploma at all. These proportions are more or less the same for men and women, in all arrondissements.

In France, an 'écrivain public', a public writer, comes to aid for those requiring help with the written word. Some cities have one on their payroll. The social services office in the 18th arrondissement works with volunteers. Iris Péron, journalist at the *L'Express*, is one of them.

"I live in this neighbourhood and was looking for ways to be engaged. As a free-lancer it was a bit difficult to take on scheduled work, but since three months I have got a regular job, making it easier. And well, it's just twelve hours per month, I can manage that."

Iris Péron

A large share of the people coming to see us is of old age, of both French and foreign background. In their youth, education was not yet obligatory. Younger persons also visit us. They can write and read, but want to be sure they got it right. As the social service is only open to French citizens, we cannot help the many persons staying here illegally. I wish we could though.

Most of what we do is helping people out with forms.

Health insurance, pension, applications for social housing. And demands for citizenship. These are obviously very important and quite tricky. If they fail, you can only retry after a number of years."

The application form for social housing. Applicants are invited to argue their case.
