Recommendations for the Organization of Education and Curriculum Adjustments within the School Year 2020/2021

1. To record changes in school curriculum content without the need to make adjustments within the School Education Framework

2. To map individual progress of each student and to plan the teaching accordingly

3. To focus on knowledge application and key competencies in Czech language, mathematics and foreign language

4. To create structured support for students who didn’t have appropriate conditions for distance learning

5. To use acquired experiences for adjusting curriculum content and subject structures

6. To initiate a discussion at the school level on assessment methods, their benefits and their impact on student learning

7. To implement good practices of digital education established during the school closure into common teaching practice

8. To keep and develop the way of communication with parents that was set during the period of distance learning
