

OECD EDUCATION POLICY OUTLOOK 2014 SEASON BROCHURE

Learning from other countries' experiences in education

The **OECD Education Policy Outlook series** develops comparative analysis of education policy reforms across all OECD countries and beyond. It provides policy makers with clear and accessible information of policies adopted across countries to respond to their challenges in strengthening equity and quality, preparing students for the future, improving schools, evaluation and assessment, governance and funding. The aim is to engage policy makers, analysts and education stakeholders in the quest for education improvement with a range of products:

Education Policy Outlook: Country Profiles provide a unique assessment of OECD countries education policies by reviewing their current context, challenges and reforms, including links to relevant sources and a statistical annex capturing main education indicators, including PISA data.

Education Policy Outlook: Comparative Edition will look into trends and reforms across all OECD countries and include comparative insight into policies and the reform process itself.

Education Policy Outlook: Reforms Finder is a unique and multi-criteria search engine on real education policies adopted across OECD countries. Users will be able to search based on their own needs and interests, generate charts, maps; and easily save, embed, and share them.

Education Policy Outlook goes social and interactive

Based on the Education Policy Outlook Country Profiles, **Voices of Education Policy** runs short interviews with policy makers who have been asked to respond to two important questions:

1. What are the key elements of countries' education policy that make them successful?
2. What are the most pressing policy challenges and how are countries currently responding to them?

Add your voice to the discussion and tell us your thoughts on **Voices of Education Policy**!

OECD Education Policy Outlook: Reforms Finder

The OECD Education **Policy Outlook: Reforms Finder** aims to be a data base of education reforms across OECD countries which can be sorted by criteria such as country, policy reform area, educational level and many others. The development of the platform will be focused on users' needs and interests. Interactive and connected to social media, it will benefit from users feedback and evolve continually.

You can connect to the **Policy Outlook: Reforms Finder demo version** right now at
