TAIEX SRSP – OECD Workshop

Organised in cooperation with Structural Reform Support Service and
the Spanish Ministry of Labour, Migration and Social Security

EFFICIENT SOLUTIONS IN PRODUCING STATISTICS ON HIGH VOLUME REGISTER DATA

Wednesday, 11 December 2019, Madrid
Ministry of Labour, Migration and Social Security
Paseo de la Castellana, 63
Sala Oval (4th floor)

Aim

The workshop brings together the statistical units of the Spanish Ministry of Labour, Migration and Social Security (MITRAMISS) and experts from other EU countries and organisations. It provides an opportunity for the statistical units in the MITRAMISS to learn from good practices in the management of register data and the production of statistics in other EU countries. The workshop involves presentations from other countries/organisations with a strong focus on implementation and practical aspects, such as how these organisations have addressed specific issues, which models they applied, what were the challenges, lessons learnt, etc.

The workshop will focus on the following topics (ordered by priority):

1. Models and tools to make administrative data accessible within the organisation and facilitate linking datasets (Data Warehouses and BI tools, cloud storage and web services)
2. Solutions that support sharing microdata also externally, additional measures needed for that
3. Efficient and user-friendly tools to disseminate large statistical outputs
4. Automation of statistical production

Agenda

8:45-9:00 Registration

9:00-9:30 Welcome

Ana Guzman de Torres (MITRAMISS, Deputy-Director General of Statistics and Socio-Employment Analysis)

Anne Lauringson (OECD, Directorate for Employment Labour and Social Affairs, Skills and Employability Division)
