

Table of Contents

Executive Summary	9
Chapter 1. Summary of Key Findings	13
Introduction	14
Structure and summary of the report	14
How to invest to enhance child well-being	16
What to do across a child's life cycle	17
Things to do less of and things to keep an eye on	18
Chapter 2. Comparative Child Well-being across the OECD	21
Introduction	22
An overview of child well-being across OECD member countries	22
What is child well-being?	24
A closer look at child well-being	25
Selecting child well-being dimensions and indicators	28
The OECD child well-being indicator rationalised and compared	33
Summary	56
References	59
Annex 2.A1. Relationships between the OECD Child Well-being Indicators	61
Chapter 3. Social Spending across the Child's Life Cycle	65
Introduction	66
Why consider social spending on children by age?	66
The profiling method and data sources	69
Limitations	70
Discussion of the child age-spending profiles	73
Distributional aspects of tax-benefit policy across the child's life cycle	82
Method	83
Countries considered	84
Eight-country comparison of net income and net transfers by family earned income level	85
Summary	92
Notes	94
References	95
Chapter 4. From Conception to Kindergarten	97
Introduction	98
Pre-natal period	99
Birth	105
Post-natal period	106

Summary	118
Notes	118
References	119
Chapter 5. Child Well-being and Single Parenthood	125
Introduction	126
Family structure across the OECD	127
Why might single-parent family structure matter for enhancing child well-being? ...	128
What is the effect on children of growing up in a single-parent family?	
A cross-OECD meta-analysis	129
Searching for causality	132
Policy implications	138
Summary	141
Notes	141
References	141
Chapter 6. Childhood and Inter-generational Mobility	147
Introduction	148
What's wrong with inter-generational inequality?	148
How much inter-generational inequality is there and how has it been changing over time?	149
Causes of inter-generational inequality	154
Is the degree of inter-generational inequality too high, too low, or just right?	157
Summary	158
Notes	159
References	160
Chapter 7. Doing Better for Children: The Way Forward	163
Introduction	164
The range of policy choices influencing child well-being	164
OECD child well-being measures and child policy	178
Policy recommendations to improve child well-being	178
Notes	186
References	187
Boxes	
2.1. Child well-being by age: what indicators would be desirable?	30
2.2. The well-being of child migrants	44
3.1. Age-spending profiles and Heckman's model of child investment	68
3.2. A Swedish child age-expenditure profile	72
4.1. Does pre-natal care enhance child well-being?	103
4.2. Does parental leave enhance child well-being?	110
4.3. Does child care and early childhood education enhance child well-being? ...	114
5.1. What is meta-analysis?	127
5.2. Does timing of exposure to family structure matter for child well-being?	133
6.1. Parental time investment in children: a factor contributing to inter-generational inequality	155

Figures

2.1.	Average income of children is seven times higher in Luxembourg than in Turkey	34
2.2.	Child poverty is nine times higher in Turkey than in Denmark	35
2.3.	Most 15-year-old children have the basic school necessities	36
2.4.	On average, one in three children across the OECD lives in overcrowded conditions	38
2.5.	Local environmental conditions are poor for a quarter of OECD children	39
2.6.	Average educational achievement of 15-year-olds across the OECD	41
2.7.	Inequality in educational achievement for 15-year-olds across the OECD	42
2.8.	Youth not in education, training or employment (NEET) varies greatly across the OECD	43
2.9.	There is large variation in infant mortality between Turkey and Mexico and the rest of the OECD	47
2.10.	Children born in Nordic countries are least likely to be underweight	47
2.11.	The majority of OECD children are breastfed at some point during infancy	48
2.12.	Eastern European OECD members have the best immunisation rates	48
2.13.	Only one in five older children does the recommended amount of physical activity across the OECD	50
2.14.	There is moderate variation in child mortality across the OECD	51
2.15.	Rates of suicide are higher among male youth in all OECD countries	52
2.16.	No country ranks consistently high or low on risk-taking measures	54
2.17.	Across the OECD there is enormous variation in rates of teen births	55
2.18.	High numbers of children experience bullying in some countries	57
2.19.	Most OECD children do not like school	58
3.1.	Public social expenditure per capita by stage of childhood, 2003	74
3.2.	Cash dominates social expenditure on children during infancy (< 2-years old), 2003	76
3.3.	Child care is important in per capita social expenditure on children in early childhood, 2003	76
3.4.	Education spending dominates during middle childhood, 2003	77
3.5.	Education spending dominates during late childhood, 2003	78
3.6.	Average social expenditure by child age by intervention as a proportion of median working-age household income, 2003	79
3.7.	Financial support for families with children varies with income level	85
3.8.	Net family income over the child life cycle for different levels of family income, families with two parents and two children, 2003	88
3.9.	Ratio of two-parent to single-parent net income over the child life cycle, 2003	91
3.10.	Ratio of four-child family to two-child family net income, 2003	93
4.1.	Medicalisation of the pre-natal system (about 2005)	100
4.2.	Recommended pre-natal care schedule (number of child visits)	101
4.3.	Maximum and minimum pre-natal paid leave (for countries with paid maternal leave)	104
4.4.	Days in hospital following a normal hospital birth	105
4.5.	Medicalisation of the post-natal system (births per paediatrician)	107
4.6.	Enrolment rates in child care/early childhood education around 2005	113

6.1. Estimates of the inter-generational earnings elasticity for selected OECD countries	150
6.2. Inter-generational income elasticity, cross-county income inequality and returns to education	152
6.3. The inter-generational inequality of years of education.....	153

Tables

2.1. Comparative policy-focused child well-being in 30 OECD countries	23
2.2. UNICEF shows high overall levels of child well-being are achieved by the Netherlands and Sweden and low levels by the United States and the United Kingdom	27
2.3. Selection of child well-being indicators: summary	31
2.4. Breakdown of child well-being indicators by sex, age and migrant status	32
2.A1.1. Correlations between child well-being indicators	62
2.A1.2. Correlations between child well-being indicators (without Turkey)	63
3.1. Spending inequalities by age, 2003.....	75
4.1. Scope of early policy interventions to enhance child well-being from conception to kindergarten across the OECD	99
4.2. Child age and the child benefit (or tax rebate) payment rate.....	112
4.3. Dimensions of targeted early childhood interventions.....	116
5.1. Family structure across 25 OECD countries for 11-, 13- and 15-year-olds (%) ...	128
5.2. Effect sizes of the impact of single parenthood on child well-being by country	131
5.3. Effect sizes of single parenthood by child well-being domain: a comparison with Amato (2000)	132
6.1. Inter-generational mobility across the earnings distribution	151
7.1. Patterns of spending by age and type have varied associations with different measures of child well-being.....	178
