## Qualifying conditions

The old-age pension age is 60 years for men and 55 years for women with at least 120 months of paid or credited contributions. Retirement at any age is possible with 300 months (25 years) of contributions.

## Benefit calculation

### Old-age pension

The pension is based on 2.5% of the insured's average monthly earnings during the last two years for each year of contributions, up to 100%.

The minimum monthly earnings for benefit calculation purposes is SAR 1 500. The maximum monthly earnings for benefit calculation purposes is SAR 45 000.

The average monthly earnings for benefit calculation purposes must not exceed 150% of the insured's monthly earnings at the beginning of the last five-year contribution period.

If the insured's monthly earnings decrease during the last two years before retirement, special provisions apply to adjust the average monthly earnings used for benefit calculation purposes.

The minimum pension is SAR 1 984 per month.

### Old-age settlement

If an individual is not entitled to an old-age pension then they will receive an old-age settlement. A lump sum equal to 10% of the insured's average monthly earnings during the last two years before retirement is paid for each month of the first five years of contributions plus 12% for each additional month.

## Variant careers

### Early retirement

At any age with at least 300 months of contributions and if no longer covered by the programme.

### Late retirement
