

# OECD Centre for Opportunity and Equality

*Evidence-based, policy-oriented research on inequalities*

All on Board for Inclusive Growth

x10

The **richest 10%** earn almost **10 times** the income of the **poorest 10%** in OECD countries and much more in emerging economies...

...this was **7 times** in the **80's**, and **8 times** in the **90's**

33%

**It's about jobs.** A third of the OECD workers are **non-standard workers**....

...this implies **poorer pay, lower access to training, more job strain** and **lower social protection**

It's not only about poverty, it is about the **bottom 40%**

The **bottom 40%** owns 3% of the wealth. The top 10% owns 50% of the wealth

**As inequality rises, social mobility is lowered.** Poorer families struggle to access quality education

**Less inequality** creates more opportunities and strengthens **long term economic growth**
