

What is climate finance effectiveness?

Jane Ellis, OECD

jane.ellis@oecd.org

Based on the discussion paper "Exploring Climate Finance Effectiveness" by Jane Ellis, Randy Caruso, Stephanie Ockenden

CCXG Global Forum
18 September 2013

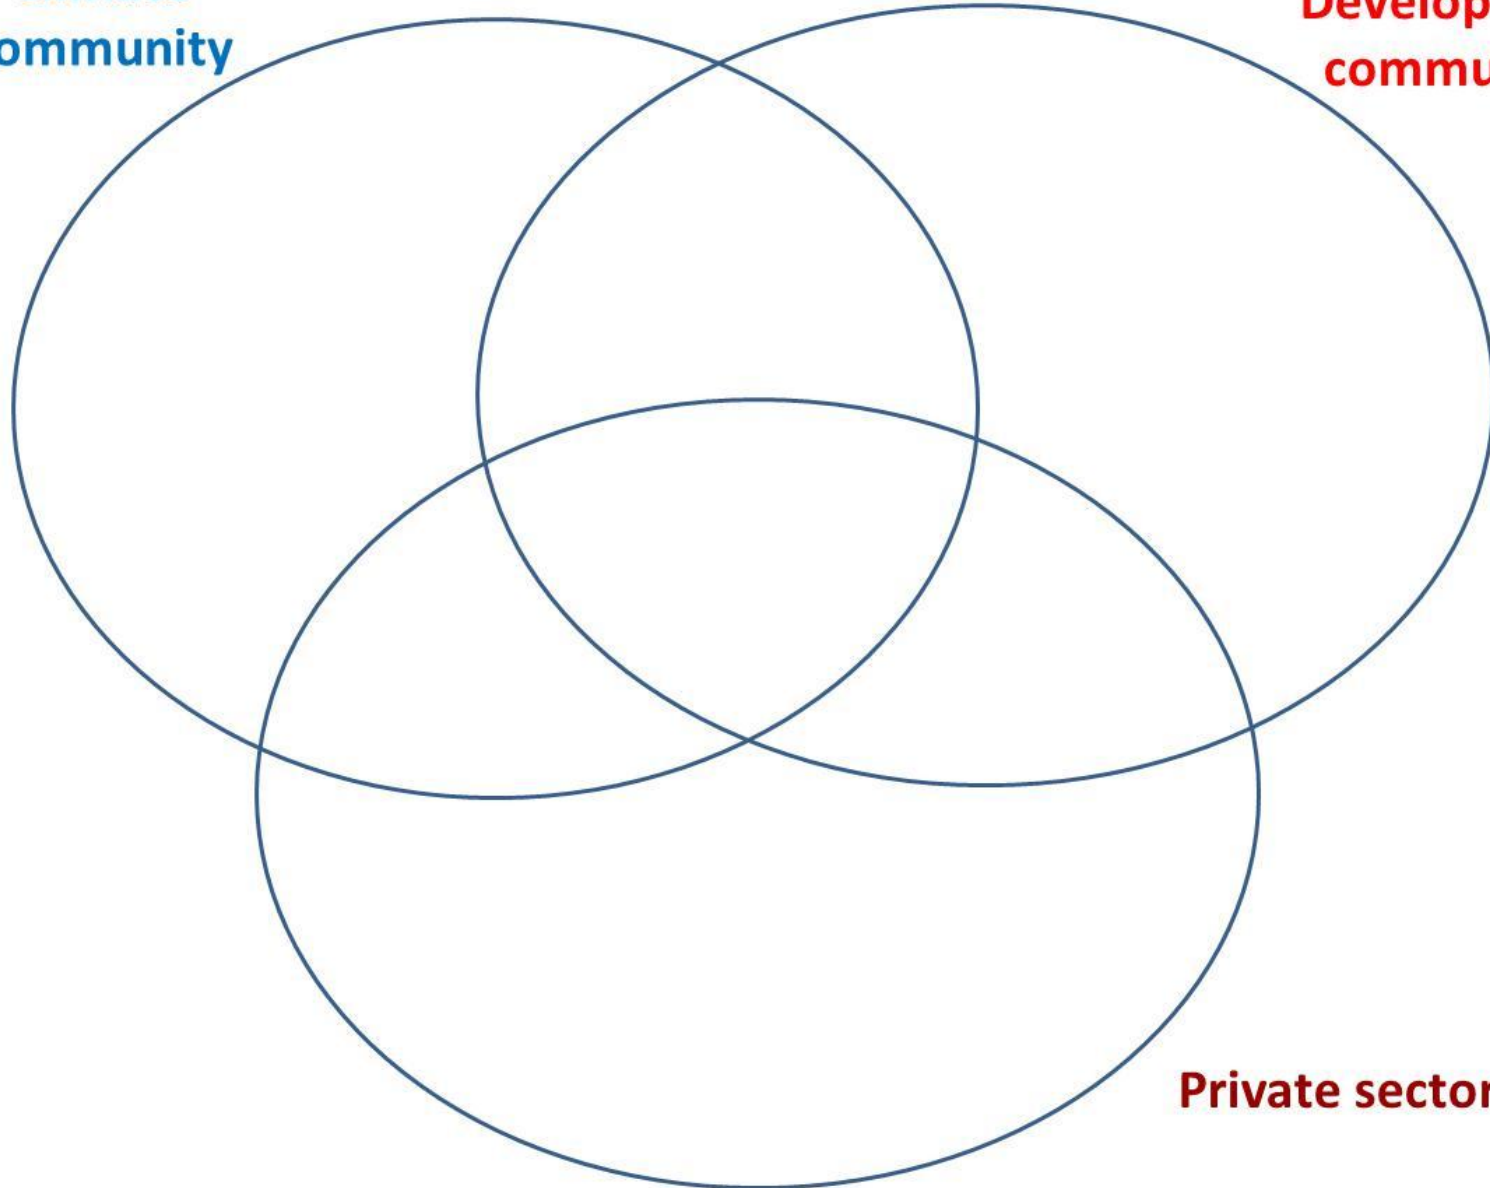

Presentation Outline

- What is climate finance effectiveness?
- How can it be assessed?
- What affects such assessments?
- A possible “A to E” framework for assessing effectiveness
- Discussion questions

Different views of effectiveness

Climate
community

Development

Different views of effectiveness

Different views of effectiveness

Different views of effectiveness

What affects “effectiveness”?

- Aim
- Breadth

How to assess?

- Context
- Duration/timescale
 - ◆ Short, medium, long-term
- Evaluation
 - ◆ Project, programme, national
 - ◆ Different type of results: output, outcome, impact

Initial insights

- Multiple views of climate finance effectiveness
- Multiple “answers”, depending on when, how assessment carried out
- Possible “A to E” framework for considering effectiveness: aims, breadth, context, duration, evaluation methods
- How to balance conflicts and trade-offs e.g.:
 - ◆ Immediate results vs transformational change
 - ◆ Climate finance vs development finance

Discussion questions

- How can the multiple views of climate finance effectiveness be balanced?
 - ◆ What trade-offs does this entail?
 - ◆ To what extent do development effectiveness principles apply to mobilised private climate finance?
- How is effectiveness influenced by the aims and breadth of specific climate finance interventions?
