

Welcome to:

**Expert workshop on tracking
climate finance flows from
the private sector and multilateral
development banks**

10 November 2011

Current status of climate finance: \$100bn commitment; no definitions...

All climate-relevant flows:
>350bn USD in 2008*

Climate-specific:
77-113 bn (2009)**

ODA
<10bn

*Buchner et al 2011 "Monitoring and Tracking Long-Term Finance to Support Climate Action"

** Buchner pers.comm. 2011

How can we improve the picture?

- Political progress (not for this workshop)
 - ◆ Identifying which sources count, defining 'mobilised'
- Technical progress (for this workshop)
 - ◆ What information is already out there?
 - Private: C markets, leveraged, other private flows
 - MDBs: how to account for this
 - Could it be used to fill some of the current gaps?
 - ◆ What else do we need, how to get it (what methods), where from?
 - ◆ Can governments get this data? If not, how to report?
