

## **FINANCING CLIMATE FUTURES: RETHINKING INFRASTRUCTURE** *INVESTING IN LOW-EMISSION, RESILIENT DEVELOPMENT*

OECD, UN ENVIRONMENT AND WORLD BANK GROUP  
HIGH-LEVEL BREAKFAST  
WEDNESDAY, 13 MARCH, 8-9.15AM  
TRIBE HOTEL, NAIROBI

An unprecedented transformation of existing infrastructure systems is needed to reach the goals of the Paris Agreement and the 2030 Agenda for Sustainable Development. Infrastructure is responsible for 60% of global greenhouse gas emissions. At the same time, it has suffered from chronic underinvestment for decades, and this investment gap offers a unique opportunity to develop better infrastructure services and avoid locking in high levels of pollution. Governments, public finance institutions, banks, institutional investors, corporations and capital markets have a crucial role to play to ensure the right incentives and frameworks are in place.

To help align financial flows towards a low-emission, resilient future, the OECD, UN Environment and World Bank Group have laid out a transformative agenda to drive systemic change in their *Financing Climate Futures* initiative. This event will provide an opportunity to bring together key actors to discuss this transformative agenda and how we can invest in a low-emission, resilient development pathway.

07.30 **Networking breakfast**

08:00 **Welcome**

Mr Rodolfo Lacy, Director, Environment Directorate, OECD

08:10 **Video Presentation** of *Financing Climate Futures: Rethinking Infrastructure*

08:15 **Panel discussion**
