

# ***TOWARDS GREEN GROWTH: PROGRESS MONITORING IN UKRAINE***

Olga Khomyakova  
Junior analyst

March 10-11, 2015, Paris

# Objectives of the study:

1. Analysis of green growth in Ukraine
2. Comparison of Ukraine with other countries

# Methodology:

1. Publicly available official sources
2. Period under review: 1990-2012
3. Set of indicators - Towards Green Growth: Monitoring Progress. OECD Indicators (2011)
4. Indicators adapted to the situation in Ukraine

# Overview of groups and numbers of indicators and measures

Group of green growth indicators	Number	
	indicators	measures
Social and economic context	8	14
Environmental and resource productivity of the economy	4	11
Natural assets	6	12
Environmental dimension of the quality of life	3	7
Economic opportunities and policies	3	11

# Correlation between sets of indicators: OECD-Ukraine

Green growth indicators:

1. A complete match
  - From domestic sources
  - From international sources
2. Adapted data for Ukraine
3. Excluded from monitoring:
  - Data not available
  - Calculations too complex

# Sources of data:

## 1. Domestic:

- National Statistical Service
- Publicly available data of government entities

## 2. International

# Difficulties encountered :

1. Absence/restricted access to data
2. Inconvenient data format
3. Discrepancies between databases
4. Lack of uniformity in assessment/understanding of indicators  
by experts
5. Mismatch between statistical data and reality
6. The situation around the Crimea

# Future work:

1. Participation in the development of an integrated set of green growth indicators at the national level
2. Press-conference *The Future of Ukraine in the Context of Green Growth*
3. Preparation of analytical papers on individual groups of indicators
4. Comments on government concept papers
5. Integration of green growth in government policy
6. Implementation of green growth monitoring at sectoral and regional levels
