Belgium has a larger and more progressive state than most OECD countries. Belgium has the third highest level of government expenditures among OECD countries (52.1% of GDP, Figure 2.22). Belgium’s system of taxes and transfers rank second in the OECD in terms of their net effect in reducing inequality (Figure 13.7).

Chapter 13 – Core government results

Figure 13.7. Differences in household income inequality among the working-age population pre and post-tax and government transfers, 2018

Belgium is lagging on digital government. Belgium ranked 24 of 30 OECD countries in the OECD Digital Government Index (Figure 10.1). However, Belgium is a leader in digitalising public procurement. It is one of only four OECD countries with a full range of functions built in to its e-procurement systems (Figure 8.5).

Chapter 8 – Public procurement

Figure 8.5. Use of green budgeting tools in the recovery, as of end-June 2020

Chapter 10 – Digital government

Figure 10.1. Use of green budgeting tools in the recovery, as of end-June 2020

Belgium has had the largest fall in confidence in national government since 2007 among OECD countries. Confidence in government fell 31 percentage points between 2007 and 2020, to 29% (Figure 13.1).

Chapter 13 – Core government results

Figure 13.1. Confidence in national government in 2020 and its change since 2007

Belgium is lagging on digital government. Belgium ranked 24 of 30 OECD countries in the OECD Digital Government Index (Figure 10.1). However, Belgium is a leader in digitalising public procurement. It is one of only four OECD countries with a full range of functions built in to its e-procurement systems (Figure 8.5).

Figure notes

- Data on public finance and economics, which are based on the System of National Accounts (SNA), were extracted on 11 May 2021 and data on General government employment were extracted on 12 April 2021. The range of country values refers to year 2019.
- Fiscal balance as reported in SNA framework, also referred to as net lending (+) or net borrowing (-) of government, is calculated as total government revenues minus total government expenditures.
- Government gross debt is reported according to the SNA definition, which differs from the definition applied under the Maastricht Treaty. It is defined as all liabilities that require payment or payments of interest or principal by the debtor to the creditor at a date or dates in the future. All debt instruments are liabilities, but some liabilities such as shares, equity and financial derivatives are not debt.
- The range of country values for the central government workforce by age refers to the 18-34 group.
- Data on trust in the civil service and parliament are available for most countries.
- The range of country values for the role of women in management positions in the central government refers to senior management.
- Citizens who express satisfaction with public services with the judiciary and the police, the data reflect the proportion of citizens who express having confidence in the institution.
- The range of country values for income inequality before taxes and post taxes and transfers refers to GINI after taxes and transfers for the working age population.

Government at a Glance 2021

Published every two years, Government at a Glance provides reliable, internationally comparable indicators on government activities and their results in OECD countries.

The 2021 edition includes input indicators on public finance and employment, while processes include data on institutions, budgeting practices and procedures, human resources management, regulatory governance, public procurement, the governance of infrastructure, public sector integrity, open government and digital government. Outcomes cover core government results (e.g. trust, political efficacy, inequality reduction) and indicators on access, responsiveness, quality and citizen satisfaction for the education, health and justice sectors. Governance indicators are especially useful for monitoring and benchmarking governments’ progress in their public sector reforms.

Each indicator in the publication is presented in a user-friendly format, consisting of graphs and/or charts illustrating variations across countries and over time, brief descriptive analyses highlighting the major findings conveyed by the data, and a methodological section on the definition of the indicator and any limitations in data comparability.

The Excel spreadsheets used to create the tables and figures in Government at a Glance 2021 are available via the StatLinks provided throughout the publication: https://doi.org/10.1787/1c258f55-en
